

Table of Contents

1	Introduction	1
2	Examination Methods	4
■	History	4
■	Functional Tests	4
	Visual Acuity	5
	Visual Field	5
	Color Vision	6
	Contrast Sensitivity	6
■	Ophthalmoscopy	7
	Direct Ophthalmoscopy	7
	Indirect Ophthalmoscopy	7
	High Refractive Power Lenses in Conjunction with the Slit Lamp	7
	Contact Optics with Deflecting Mirrors	7
	Special Considerations when Examining Infants and Newborns	7
■	Objective Imaging Studies and Their Evaluation	8
	Fundus Photography	8
	Scanning Laser Ophthalmoscope	8
	Fluorescence Angiography	11
■	Electrophysiological Studies	14
	Electro-oculography (EOG)	14
	Electroretinography (ERG)	14
	Visual Evoked Cortical Potentials (VECP)	15
■	Ultrasound Studies	18
	A-Mode Ultrasonography	18
	B-Mode Ultrasonography	18
	Doppler Ultrasonography	18
	Color Doppler Imaging	19
	Ultrasound Biomicroscopy	19
■	Biopsy	19
	Anterior Chamber	19
	Vitreous Body	19
	Tumors	20
3	Appearance of Retinal and Choroidal Disorders	21
■	Retinopathy with Focal or Mottled Lesions ..	21
	White Mottled Deposits	21
	Sharply Demarcated, Bright, and Pigmented Areas	23
	Blurred, Fluffy, White Focal Lesions	26
■	Prominence of the Macula	42
	Secondary Macular Edema	42
	Macular Edema with Retinal Vascular Disease ..	45
	Macular Edema from Choroidal Neovascularization	47
	Choroidal Neovascularization of Other Causes ..	54
■	Proliferation, Scarring, and Holes in the Macula	55
	Epiretinal Membranes (Macular Pucker)	55
	Idiopathic Macular Hole	55
	Choroidal Folds	58
■	Depigmented and Pigmented Focal Lesions in the Macula	59
	Solar Retinopathy	59
	Injuries from Laser Beams and Autogenous Welding	59
	Pigmented Macular Scars Secondary to Contusion	60
	Maculopathy in Myopia	61
	Pattern Dystrophies	61
	Central Areolar Macular Atrophy	62
	Bull's Eye Dystrophy	63
■	Macular Dystrophies with Mottled Lesions ..	65
	Vitelliform Macular Dystrophy (Best Disease) ..	66
	Sorsby Macular Dystrophy	68
	Stargardt Disease	68

■ Large Areas of Yellowish-White Exudative Retinopathy	71
Necrotizing Retinitis	71
Serpiginous Choroiditis	74
Vogt–Koyanagi–Harada Syndrome	75
Berlin Edema in the Fundus	76
Ischemic Edema in Central Retinal Artery Occlusion	76
■ Scattered Pigment Changes with Large Areas of Retinal and Choroidal Dystrophy	79
Atrophic and Pigmented Areas	80
Fields with Coarse Pigmentation and Depigmentation	82
Large Areas of Progressive Retinal Degeneration in Both Eyes—Cancer-Associated Retinopathy (CAR)	83
Significance of Rare Types of Retinal Degeneration and Dystrophy	86
Fundi with Typical Pigmentations and Chorioretinal Atrophy—Tapetoretinal Degenerations	86
Albinism	96
Pediatric Retinal Dystrophies with Maculopathies	98
■ Peripheral Retinal and Choroidal Lesions	104
Pigmentation, Bright White–Yellow Spots and Cobblestone Degeneration	104
Lattice Degeneration and Vitreous Adhesion	105
Retinal Holes and Tears	105
Pigmented Flecks and Fields at the Level of the Fundus	106
Vitreoretinal Degeneration	107
■ Retinal Detachments	110
Broad Gray Bubblelike Bulging of the Retina	110
Glassy, Transparent Retinal Detachments	116
Choroidal Detachment	117
Retinal Detachment due to Solid Protrusions	118
■ Retinal Tumors	123
White Tumors—Retinoblastoma	123
“Mulberry” Tumors: Tuberous Sclerosis	124
Vascular Tumors: Hemangiomas	125
Brown Tumor in Coats Disease	125

4 Appearance of Vascular Disorders

127

■ Ophthalmoscopic Structure of Fundus Vessels	127
■ Variants in the Course of the Retinal Vessels	128
Cilioretinal Artery	128
Atypical Branching of the Retinal Arterioles	128
Retinal Vessels in Macular Aplasia	128
■ Abnormal Vessels in the Retina	128
Telangiectasia	128
Multiple Leber Miliary Aneurysms	129
Solitary Retinal Macroaneurysms	129
Angiomatosis Retinae (Von Hippel–Lindau Disease)	130
■ Rarefied and Elongated Vessels	131
Wide and Irregular Reflexes on Retinal Arterioles in Arteriosclerosis	131
Choroidal Sclerosis with Bright Vascular Bands and Thin Columns of Blood	132
Thin Vessels, Minimal Microvasculature, and Pale Fundus in Ischemic Ophthalmopathy	132
Thin Vessels, Pale Fundus, and Occasional Retinal Bleeding in Anemia	132
■ Narrowed Arterioles and Congested Veins	133
Pathophysiology of the Retinal Vessels in Arterial Hypertension	133
Changes in the Retinal Vessels in Arterial Hypertension	133
Distinguishing Arteriosclerosis from Hypertension	133
Hypertensive Fundus	134
■ Bleeding, Cotton-Wool Spots, Hard Exudates, and Retinal Edema	135
Hypertensive Retinopathy	135
Classification of Fundus Changes in Arterial Hypertension	136
Stenoses of the Arterioles, Cotton-Wool Spots, and Retinal Edema in Retinopathy in Pregnancy	137
Purtscher Retinopathy (Traumatic Retinal Angiopathy)	138
■ Capillary Aneurysms, Hard Exudates, Bleeding, and Neovascularization	138
Nonproliferative Diabetic Retinopathy (NPDR)	139
Proliferative Diabetic Retinopathy (PDR)	141
Macular Edema in Diabetic Maculopathy	143
■ Disorders Involving Primarily Retinal Bleeding	145
Bleeding in the Region Drained by the Retinal Veins	145

Cockade Hemorrhagic Lesions in	
Chronic Myelosis	151
Bleeding between the Venules and Arterioles	
in Waldenström Macroglobulinemia	152
Large Areas of Bleeding in Multiple	
Myelomas (Plasmacytoma)	152
Engorged Blood Vessels in Polycythemia Vera	152
Idiopathic Macular Bleeding—Macular	
Bleeding Following the Valsalva Maneuver ...	152
Characteristic Fundus Findings in	
Hemoglobin Disorders	153

■ Peripheral Neovascularization in the Retina	155
Retinopathy of Prematurity (ROP)	155
Peripheral Vascular Proliferation in Eales	
Disease	160
■ Perivascular Infiltrates, Vascular Obliteration,	
and Retinal Bleeding in Inflammatory	
Vascular Disorders	161
Peripheral Vascular Obliteration in Eales	
Disease	161
Perivascular Infiltrates in Retinal Periphlebitis	162
Inflammatory Infiltration in Specific Types	
of Retinal Vasculitis	163

5 Phenomenology of Disease of Vitreous Body

167

■ Symptoms with Vitreous Opacities and	
Specific Examinations	167
■ Leukocoria	167
■ Blood Vessels in the Vitreous Body	168
Persistent Hyaloid Artery arising from	
the Optic Disc	168
Active Neovascularization in the Vitreous	
Body in Proliferative Retinopathy	169
■ Small Opacities in the Vitreous Body	171
Floaters—Moving Spots against a Bright	
Background	171
Distressing Subjective Perceptions in	
Posterior Vitreous Detachment	171

Multiple White Dots like Snow Flakes	
Synchysis Scintillans—Cholesterol Hyalosis ...	172
Multiple White Globules—Asteroid Hyalosis—	
Scintillatio Nivea	172
■ Diffuse Opacities in the Vitreous Body	172
Opacities from Chronic Cellular and	
Fibrinous Infiltration of the Vitreous Body	172
Opacities from Acute Cellular and	
Fibrinous Infiltration of the Vitreous Body	174
■ Large Opacities in the Vitreous Body	178
Vitreous Hemorrhage	178

6 Appearance of Optic Nerve Disorders

181

■ Blurred Appearance, Hyperemia,	
and Protrusion—Optic Disc Edema	181
Bilateral Blurring of the Optic Disc with	
Hyperemia and Prominence	181
Unilateral Blurring of the Optic Disc with	
Hyperemia, Prominence, and Impaired Vision	189
■ Pale, Often White, Sharply Demarcated	
Optic Disc—Optic Nerve Atrophy	196
Diagnosis and Pathogenesis of	
Optic Nerve Atrophy	196
Partial or Localized Pallor of the Optic Disc ...	199
Completely White Optic Disc—	
Optic Nerve Atrophy	202
Hereditary Optic Nerve Atrophy	203

■ Excavations of the Optic Nerve	206
Physiologic Cupping of the Optic Disc	206
Cupping of the Optic Disc in Myopia	207
Cupping and Atrophy of the Optic Nerve in	
Glaucoma	207
Excavation Filled with Grayish-White Tissue—	
Optic Pit	209
■ Anomalous Tissue on and	
adjacent to the Optic Disc	209
Scleral Crescent—Pigment Crescent—	
Myopic Crescent	209
Persistent Embryonic Tissue on the Optic Disc	210
Optic Disc Coloboma—Morning Glory Disc ...	211
Optic Disc Melanocytoma	211
Optic Disc Hemangioma	211
Optic Disc Osteoma	211

7 Disorders without Conspicuous Changes of the Fundus	213
■ Floaters 213 ■ Unilateral Visual Impairment in Children—Amblyopia 213 ■ Acute Visual Impairment with Normal Optic Disc 214 - Retrobulbar Optic Neuritis 214 - Visual Impairment with Normal Optic Disc ... 215 - Example of Compression Neuropathy of the Optic Nerve—Severe Endocrine Orbitopathy (Graves Disease) 215 ■ Color Vision Defects 217 - Congenital Hereditary Color Vision Defects .. 217 - Achromatopsia—Stationary Cone Dysfunction 218 ■ Incipient Tapetoretinal Degeneration 218 - Incipient Stargardt Disease 218 - Incipient Retinitis Pigmentosa 219 ■ Congenital Stationary Night Blindness (CSNB) 219 ■ Night Blindness with Hereditary Deficiency of the Retinol-Binding Protein 219 ■ Simulation 220 ■ Visual Agnosia 220
