

Contents

Nomenclature	xi
Abbreviations	xvi
Organization of the Book - Target Groups and Icons.....	xvii
1 Introduction	1
1.1 Current Situation of Wind Energy and Perspectives	1
1.2 Advantages of Wind Energy	3
1.3 Current Problems of Wind Energy	4
1.4 Road Map of the Book	10
2 Noise and its Effects	13
2.1 Sound and Noise	13
2.2 Definitions	14
2.3 Noise Regulations	24
3 Introduction to Aeroacoustics	27
3.1 Introduction	27
3.2 Definitions	27
3.3 The Linear Wave Equation.....	32
3.4 Elementary Solutions of the Wave Equation.....	36
3.5 Lighthill's Acoustic Analogy	43
3.6 The Influence of Boundaries	53
3.7 Application of Aeroacoustic Theory	57
3.8 Conclusions	65
4 Noise Mechanisms of Wind Turbines.....	67
4.1 Classification of Noise Mechanisms	67
4.2 Low-Frequency Noise	73
4.3 Inflow-Turbulence Noise	77
4.4 Airfoil Self-Noise	82
4.5 Summary	90

5	Noise Prediction.....	93
5.1	Introduction	93
5.2	Low-Frequency Noise	98
5.3	High-Frequency Noise.....	106
5.4	Summary	121
6	Noise Propagation	125
6.1	Introduction	125
6.2	Mechanisms.....	127
6.3	Prediction	135
6.4	Results	140
6.5	Summary	143
7	Measurement of Noise and Flow Field	145
7.1	Acoustic Measurement in the Wind Tunnel.....	145
7.2	Acoustic Measurements on Operating Turbines	152
7.3	Flow Visualization on Operating Turbines	158
8	Noise Reduction.....	163
8.1	Introduction	163
8.2	Reduction of Tip Speed and Angle of Attack	164
8.3	Reduction of Trailing-Edge Noise	167
8.4	Reduction of Tip Noise	172
8.5	Reduction of Inflow-Turbulence Noise.....	177
8.6	Reduction of Blunt-Trailing-Edge Noise	178
8.7	Conclusions	179
9	Future Work	181
10	References	183
10.1	Recommended References	183
10.2	List of References.....	184
	Annex: Description of Tip Planform Shapes	195
