

Contents

Introduction: Radio and IR Studies of Molecular Clouds C.H. Townes	1
The Evolution of Molecular Clouds R.B. Larson	13
Interstellar Chemistry in the Last Two Decades E. Herbst	29
Hunting Oxygen in the Interstellar Medium L. Pagani, P.J. Encrenaz	55
Interstellar CNO Isotope Ratios C. Henkel, T.L. Wilson, N. Langer, Y.-N. Chin, R. Mauersberger	72
Angular Structure and Motions of Interstellar Masers J.M. Moran	89
Interpretations for Observations of Astronomical Masers W.D. Watson	109
Molecular Excitation and Galactic Interstellar Clouds T.L. Wilson	123
High Resolution Studies of Molecular Clouds W.J. Welch	138
Dense Molecular Gas in Star-Forming Regions – The Importance of Submillimeter Observations K.M. Menten	150
Conditions in Regions of High Mass Star Formation C.M. Walmsley, R. Güsten	164
H₂O Masers and Star Formation M. Felli	175
Where Is the Heavy Molecule Heimat in SgrB2? L.E. Snyder, Y.-J. Kuan, Y. Miao	187
The Relation Between OB Stars, HII Regions & Molecular Clouds R.A. Gaume	199

From Cores to Stars	
P.C. Myers	207
Surveying Giant Molecular Clouds for Low Mass Stars: NIR Imaging of the DR22 and S184 Regions	
S.T. Megeath	215
The Search for Protostars – With Dust Emission as a Tracer	
P.G. Mezger	232
Molecular Emission from Disks Around Young Stars	
S.V.W. Beckwith, A.I. Sargent	243
Late Type Stars Associated with Maser Emission	
K.J. Johnston	256
Mapping the Molecular Emission of Circumstellar Envelopes with the Plateau de Bure Interferometer	
M. Guélin	260
High Resolution Studies of SiO Masers	
A. Baudry	271
Intergalactic Cloud and Protogalaxy? An Unusual Molecular Complex	
C. Henkel	283
Dense Gas in Galactic Nuclei	
R. Mauersberger, C. Henkel	293
CO at High Redshifts	
P.A. Vanden Bout, R.L. Brown	304
