

Table of Contents

1	Introduction	1	Rheumatic Inflammation of the Intervertebral Disk	37	
2	History and Terminology	3	Tumors	37	
	History	3	Involve ment of the Intervertebral Disks in Systemic Illness	37	
	Pre-Christian Times	4	Possible Reactions	37	
	AD 1–1700	4	Achondroplasia	37	
	1700–1900	4	Ochronosis (Alkaptonuria)	38	
	From 1900 Onward	4	Loss of Bone Density in the Vertebral Bodies ..	38	
	Terminology	5	Disk Calcification and Ossification	40	
	Anatomy and Pathology	5			
	Clinical Syndromes	6			
3	Epidemiology	11	6	Discosis	43
	Lifetime Prevalence	11	Definition	43	
	Point and Annual Prevalence	11	Classification	43	
	Localization and Frequency	11	Etiology	46	
	International Figures	12	Pathogenesis	47	
4	General Anatomy, Physiology, and Biomechanics	15	Biochemical Changes of Aging	51	
	Development of the Intervertebral Disk	15	Biomechanical Basis of Disk Tissue	51	
	Anatomy	18	Displacement	51	
	Ligaments	20	Effects on the Osmotic System	53	
	Fine Structure and Biochemistry	21	Instability of the Motion Segment	53	
	Biomechanics	22	Definition	53	
	The Disk as an Osmotic System	22	Pathogenesis of Instability	53	
	Changes of Intervertebral Disk Height	25	Clinical Significance	54	
	Traction and the Intervertebral Disk	26	Surgical Indications	54	
	Vibration and the Intervertebral Disk	27	Prognosis and Course of Discogenic Degenerative Instability	54	
	Mechanical Functions of the Intervertebral Disks	27	Prediscotic Deformities	55	
	The Disk and the Intervertebral Joints	29	Definition	55	
	Therapeutic Approaches	31			
5	Nondegenerative Disk Diseases	33	7	Traumatology	59
	Developmental Disturbances	33	Etiologies and Types of Spinal Injury, and the Role of Pre-existing Degenerative Changes	59	
	Notochord Remnants	33	Sprains of the Motion Segment	60	
	Developmental Disturbances of the Vertebral Bodies and Intervertebral Disks in Childhood ..	33	Isolated Traumatic Disk Rupture	60	
	Congenital Anomalies	35	Vertebral Body Fracture with Injury of the Intervertebral Disk	62	
	Inflammatory and Infectious Disorders	36			
	Bacterial Infection of the Intervertebral Disk ..	36			
8	Pain: Its Pathogenesis and the Evolution of Chronic Pain	63			
	Local and Radiating Pain	63			
	Nerve Supply of the Spine	63			
	The Foramino-articular Region	65			

Discogenic Pain	65	10 Thoracic Syndrome	127
Spinal Deformities without Pain	66	Definition and Prevalence	127
Pain Arising from the Posterior Longitudinal Ligament	66	Special Anatomy, Biomechanics, and Patho-anatomy of the Thoracic Motion Segments	127
Radicular Pain	66	Classification	128
Intervertebral Joint Pain (Facet Syndrome, Pseudoradicular Syndrome)	68	Clinical Features of Thoracic Disk Prolapse	129
Muscle Pain	69	Intercostal Neuralgia	129
Combined Types of Pain	70	Differential Diagnosis	129
Nociception and the Transition from Acute to Chronic Pain	71	Treatment	130
Physiology of Nociception in the Spine	71		
Evolution of Chronic Pain	72		
Pharmacological Pain Therapy	75	11 Lumbar syndrome	133
Definition	75	Definition and Prevalence	133
Classification	75	Special Anatomy of the Lumbar Motion Segments	134
9 Cervical Syndrome	79	Lumbar Disks	134
Definition and Prevalence	79	Intervertebral Foramina	135
Special Anatomy and Physiology of the Cervical Motion Segments	80	Ventral Epidural Space	135
Uncinate Processes	80	Ligamentum Flavum	136
Horizontal Fissures	81	Venous System	136
Vertebral Artery and Cervical Sympathetic Chain	81	Numerical Variations and Transitional Vertebrae	137
Cervical Nerve Roots and Nerve Root Sleeves	82	Topographical Relationships Between the Spinal Nerve Roots and Disks in the Lumbar Spinal Canal	138
Biomechanics	84	Radiological/Surgical Subdivisions of the Lumbar Motion Segments	139
Special Pathoanatomy and Pathophysiology	85	Special Biomechanics of the Lumbar Spine (H.J. Wilke)	144
Clinical Features of Cervical Syndromes	88	Mechanical Stress on the Lumbar Disks	144
Overview of Symptoms and Their Classification	88	Methods of Measuring Stress on the Lumbar Motion Segments	144
Patients' Description of Symptoms	88	Special Pathological Anatomy and Pathophysiology	153
Clinical Findings	89	Protrusions and Prolapses	153
Radiological Studies	90	Disk Slackening and Instability	160
CT and MRI	92	Bony Deformation	161
Neurophysiological Testing: EMG	92	Clinical Features of Lumbar Syndromes	162
General Differential Diagnosis	93	Introduction	162
Classification of Cervical Syndromes	93	Symptoms	163
Local Cervical Syndrome	94	Findings of Clinical Examination	165
Acute Torticollis (Wry Neck)	96	Neurophysiologic Testing—EMG	169
Cervicobrachial Syndrome	97	Plain Radiographs	169
Brachialgia Due to Soft Disk Protrusion	98	Lumbar Myelography	171
Brachialgia Due to Uncinate Process Exostosis	98	CT	172
Segmental Syndromes	99	Diagnostic Study of the CSF	179
Cervicocephalic Syndrome	103	Discography	179
Cervicomедullary Syndrome	107	MRI	181
Post-traumatic Cervical Syndrome	108	Clinical Syndromes	192
Treatment of Cervical Syndromes	110	Classification of Lumbar Syndromes	192
Overview of Treatment Methods	110	Local Lumbar Syndrome, Low Back Pain	192
Conservative Treatment	111	Lumbago, Discogenic Back Pain	194
Operative Treatment	120	Low Back Pain of Arthroligamentous Origin	194
Special Patient Exercises, Rehabilitation, and Back School	124	Facet Syndrome	195
Treatment Planning	125	Imaging Studies in Patients with Low Back Pain	198
		Differential Diagnosis of Low Back Pain	198

Red Flags in Low Back Pain	201	Exercise Points	333
Discogenic Hip and Thigh Extension Stiffness ..	202	Stepwise Program	333
Lumbar Root Syndromes	203	EPFRM Units	333
Red Flags in Lumbar Root Syndromes	217	Running	333
Treatment of Lumbar Syndromes	218	Running with Simultaneous Activation of the Arms	334
Classification of Treatment Methods	218	Running with a Reduced Load	334
Conservative Treatment	218	Swimming	334
Minimally Invasive Therapy of Lumbar Syndromes	241	Cycling	335
Surgical Treatment	259	Gymnastics	336
Post-discectomy Syndrome	286	Arm-jogging	336
Fusion Procedures	291	Dynamic Work at Home, in the Garden, and at Work	336
Intervertebral Disk Prostheses	297		
Treatment Planning—Integrated Care	301		
12 Natural Course and Prognosis of Intervertebral Disk Diseases	305	16 Sports	337
Pathoanatomical Changes of the Intervertebral Disk	305	Introduction and Literature	337
Disk Disease over the Course of Life	306	Sports and the Cervical Spine	337
The Spontaneous Course of Acute Intervertebral Disk Disease	307	Sports and the Lumbar Spine	338
L5/S1 Case Illustration: Prolapse with Infradiscal Extension and Spontaneous Resorption ..	308	Sporting Activities that are Good and Bad for the Intervertebral Disks	338
L4/5 Case Illustration: Spontaneous Resorption of an Infradiscal L4/5 Disk Prolapse	310		
13 The Spine and the Mind	313	17 Medicolegal Assessment	341
Psychosomatic Processes	313	Introduction	341
Mind-Body Interactions as Described in the Literature	313	Frequency of Medicolegal Assessment of Disk-Related Diseases	341
The Spine as a Projective Field for Mental Disturbances (Psychosomatic Changes)	315	Problems	341
The Effect of Disk Disease on the Mind (Somatopsychic Changes)	317	Disk Herniations and Accidents	342
Deliberate Simulation or Exaggeration of Disk Disease	317	Problems	342
Psychotherapy and Relaxation Techniques	319	Pre-existing Damage	342
14 Back School	321	The Accident	342
The Biomechanical Principles Of Back School	321	Damage to the Intervertebral Disks After the Loss or Permanent Injury of a Limb	345
Sitting	323	Cervical Spine	345
Sitting Forward	323	Lumbar Spine	345
Sitting Back	324	Medicolegal Assessment	345
Dynamic Sitting	325	Whiplash: Acceleration Injury of the Cervical Spine	346
Standing	326	Epidemiology	346
Lying	327	Terminology	346
15 Exercise in a Pain-Free Range of Motion	331	Degree of Severity	347
Exercise and Nociception	331	Treatment	348
Which Exercises are Suitable?	332	Course and Prognosis	348
		Symptoms That Become Chronic	348
		Medicolegal Assessment	349
		Assessment of Loss of Earning Capacity in Lumbar Intervertebral Disk Disease	351
		Definition and Classification of Loss of Earning Capacity	351
		Levels of Loss of Earning Capacity	353
		Problems in Medicolegal Assessment	355
		Course and Prognosis	355
		Index	357
