Basics

1 Anatomy of the Breast	3	2 Breast Implants	7
Structure of the Female Breast	4	Implant Types	7
Blood Supply	4	Risks and Complications	7
Nerve Supply	4	<i>Implant Defects</i>	7
Lymphatic System	4	<i>Capsular Contracture</i>	8
Musculature of the Thoracic Wall	5	<i>Infection</i>	8
		<i>Breast Cancer</i>	8
		Safety of Silicone Implants	9

Aesthetic and Plastic Surgery of the Breast

Introduction	14	4 Mastopexy and Reduction Mammoplasty	37
3 Augmentation Mammoplasty	15	Reduction Mammoplasty with a Short/Vertical Scar (Based on the Lejour Technique)	38
Choice of Implant	16	<i>Surgical Marking</i>	38
Choice of Incision	17	<i>Infiltration</i>	41
<i>Periareolar Approach</i>	17	<i>De-epithelialization</i>	41
<i>Inframammary Approach</i>	18	<i>Liposuction</i>	41
<i>Axillary Approach</i>	18	<i>Surgical Procedure</i>	41
<i>Comparison of Different Approaches</i>	18	Reduction Mammoplasty Using the T-Scar Technique	55
Implant Position	18	<i>Preventing Lowering of the Inframammary Fold</i>	55
<i>Subpectoral Implantation</i>	19	<i>Marking T-Scar Incisions</i>	55
<i>Subglandular Implantation</i>	19	<i>Managing Venous Congestion of the Nipple-Areola Complex</i>	55
Temporary Implant Sizers	19		
Wound Closure	19		
Drainage	20		
Breast Ptosis (Augmentation Mastopexy)	20		
Surgical Approaches in Secondary Procedures	20		

Reconstructive Surgery of the Breast

5 Breast Deformities	69	6 Delayed Breast Reconstruction	85
Classification of Congenital Breast Deformities	69	Timing of Breast Reconstruction	85
Breast Asymmetry	69	Choice of Reconstructive Procedure	85
Tuberous (Tubular) Breast Deformity	72		
Poland Syndrome	72		
Deformities of the Chest Wall	76		

6.1 Implants/Expanders	87	Free TRAM Flaps	132
Indications	87	<i>Dissection of the Internal Thoracic Artery and Vein</i>	141
Surgical Technique	88	<i>Dissection of the Thoracodorsal Vessels</i>	141
Postoperative Expander Inflation	93	<i>Flap Harvesting</i>	141
Expander Exchange and Contour Reconstruction	93	<i>Closure of the Fascia</i>	145
6.2 Latissimus Dorsi Flap	100	<i>Reconnecting the Flap</i>	145
Principles	100	<i>Insetting the Flap</i>	157
Anatomy of the Latissimus Dorsi Flap	101	<i>Postoperative Care</i>	157
Indications for a Latissimus Dorsi Flap	102	Deep Inferior Epigastric Perforator (DIEP) Flap	157
Preoperative Planning	103	<i>Surgical Technique</i>	158
<i>Assessment of the Latissimus Dorsi</i>	103	<i>Management of Flap Congestion</i>	160
<i>Assessment of the Mastectomy Defect</i>	103	6.4 SGAP Flap	167
<i>Strategic Placement of the Skin Island</i>	103	Regional Anatomy	167
Surgical Technique	105	Preoperative Preparation	168
<i>Preoperative Marking</i>	105	<i>Preoperative Marking</i>	168
<i>Flap Elevation</i>	105	Surgical Technique	170
<i>Flap Placement</i>	109	<i>Positioning Sequence</i>	170
Breast Reconstruction Using an Autologous		<i>Flap Harvesting</i>	170
Latissimus Dorsi Flap	110	<i>Microanastomoses</i>	170
Indications	110	<i>Flap Shaping</i>	171
Surgical Technique	110	Postoperative Care	171
<i>Perforator-Sparing or Muscle-Sparing Latissimus</i>		6.5 Free Transverse Myocutaneous Gracilis Flap	179
<i>Flap Harvesting</i>	110	Patient Selection	179
6.3 TRAM/DIEP Flap	119	Anatomy of the TMG Flap	179
Anatomy of the Lower Abdominal Flap	120	Preoperative Marking	180
Principles of the TRAM/DIEP Flap Techniques	120	Surgical Technique	180
Historical Development	121	<i>Breast Shaping</i>	180
Indications	121	<i>Donor-Site Closure</i>	180
Patient Suitability	121	<i>Donor-Site Morbidity</i>	180
Contraindications	122	6.6 Bilateral Breast Reconstruction	187
Preoperative Preparation	122	7 Reconstruction of the Nipple–Areola Complex	189
<i>Preoperative Marking</i>	122	Nipple Grafting from the Contralateral Breast	189
<i>Preoperative Measures</i>	126	Local Flaps	189
Surgical Technique for Unipedicled Rectus Flaps	126	Full-Thickness Skin Grafting from the Labia Minora	189
<i>Preparing the Mastectomy Defect</i>	126	Alternative Approaches	190
<i>Dissection of the Unipedicled Rectus Flap</i>	126	Tattooing	190
<i>Fascial Closure</i>	131	Full-Thickness Skin Grafting	190
<i>Creation of the Breast Mound</i>	131		
Postoperative Care	132		
Surgical Technique for (Microvascular)			

Oncologic Surgery of the Breast

8 Prophylactic Subcutaneous Mastectomy	199	10 Breast-Conserving Therapy	219
Indications	199	Indications	219
Surgical Technique	199	Surgical Technique	220
Implant Reconstruction	200	<i>Axillary Lymph-Node Dissection</i>	227
Autologous Tissue Reconstruction	200	<i>Surgical Technique</i>	228
9 Modified Radical Mastectomy	211	<i>Sentinel Lymph-Node Dissection</i>	230
Indications	211	<i>Plastic Surgery Measures in Breast-Conserving Therapy</i>	230
Surgical Technique	211	General Guidelines	230
		<i>Reduction Mammoplasty in Breast-Conserving Surgery</i>	231
		<i>Breast Recontouring using a Latissimus Dorsi Flap</i>	241

<i>Breast Recontouring for Poor Cosmetic Results after Breast-Conserving Surgery</i>	241	<i>Nipple-Sparing Mastectomy</i>	251
		<i>Choice of Reconstructive Procedure</i>	251
11 Immediate Reconstruction of the Breast	249	11.2 Immediate Reconstruction with Implants	257
11.1 Indications and Approaches for Immediate Reconstruction of the Breast	250	<i>Anatomic Considerations</i>	257
<i>Introduction</i>	250	<i>Placement of an Expander</i>	257
<i>Indications</i>	250	<i>Primary Implant Reconstruction in Skin-Sparing Mastectomy</i>	261
<i>Approaches</i>	250	11.3 Immediate Reconstruction Using a Skin or Myocutaneous Flap	268
<i>Skin-Sparing Mastectomy</i>	250		
<i>Skin-Sparing Periareolar Mastectomy</i>	251	Index	280
<i>Mastectomy with Nipple Resection and Preservation of the Areola</i>	251
