1	Introduction	1
1.1	Energetic Materials	1
1.1.1	Definition	1
1.1.2	Classification	2
1.1.3	Energetic Performance	5
1.2	Polymorphism	6
1.2.1	Definition	6
1.2.2	Implications of Polymorphism	8
1.3	High Pressure	12
1.3.1	General Concept	12
1.3.2	Previous High-Pressure Research	14
1.4	General Aims and Outline of Research	23
	References	24
2	Experimental Techniques	29
2.1	Complementarity of High-Pressure Techniques	29
2.2	The Merrill-Bassett Diamond-Anvil Cell	29
2.2.1	DAC Components	29
2.2.2	Pressure Measurement	33
2.2.3	Sample Loading	34
2.3	Experimental Techniques Using the Diamond-Anvil Cell	35
2.3.1	X-Ray Single-Crystal Diffraction	35
2.3.2	High-Pressure Single-Crystal X-Ray Diffraction	38
2.3.3	X-Ray Powder Diffraction	40
2.3.4	High-Pressure X-Ray Powder Diffraction	42
2.3.5	X-Ray Sources: Laboratory Versus Synchrotron	43
2.3.6	Raman Spectroscopy	44

2.4	The Paris-Edinburgh Cell	46
2.4.1	Construction of the Paris-Edinburgh Cell	46
2.4.2	Variable-Temperature Insert for the Paris-Edinburgh Cell	46
2.4.3	Pressure Measurement	48
2.5	Experimental Techniques Using the Paris-Edinburgh Cell	48
2.5.1	Neutron Powder Diffraction	48
2.5.2	Neutron Sources	49
2.6	Equations of State	51
	References	53
3	Structural Studies of RDX	55
3.1	Introduction	55
3.2	Polymorphism of RDX	56
3.3	Aims	61
3.4	Experimental.	62
3.4.1	Materials	62
3.4.2	High-Pressure Neutron Powder Diffraction.	64
3.4.3	Ambient-Pressure Single-Crystal X-Ray Diffraction	64
3.4.4	High-Pressure Single-Crystal X-Ray Diffraction	64
3.4.5	High-Pressure X-Ray Powder Diffraction.	65
3.4.6	DFT-MD Calculations	66
3.5	Results and Discussion.	66
3.5.1	β -RDX: A Highly Metastable Polymorph at Ambient Conditions.	66
3.5.2	Investigation of the High-Pressure/High-Temperature Form of RDX.	72
3.5.3	δ -RDX: The Very-High-Pressure Form of RDX	82
3.6	Conclusions	88
3.7	Suggestions for Further Work	89
	References	91
4	High-Pressure Structural Studies of CL-20	95
4.1	Introduction	95
4.2	Polymorphism of CL-20.	95
4.2.1	Ambient-Pressure Studies.	95
4.2.2	High-Pressure Studies	98
4.3	Aims	100
4.4	Experimental.	100
4.4.1	Materials	100
4.4.2	High-Pressure X-Ray Powder Diffraction.	100
4.4.3	High-Pressure Neutron Powder Diffraction.	101
4.4.4	High-Pressure Single-Crystal X-Ray Diffraction	101
4.4.5	Ambient-Pressure Single-Crystal X-Ray Diffraction	102

4.5	Results and Discussion	102
4.5.1	Compression of ϵ -CL-20	102
4.5.2	Compression of γ -CL-20	106
4.6	Conclusions	121
4.7	Suggestions for Further Work	122
