Preface to the Second Edition — VII

Preface to the First Edition — IX

1 Basic Topology — 1

- 1.1 Basic Notions — **1**
- 1.2 Separation and Countability Properties – Convergence — **10**
- 1.3 Weak, Product, and Quotient Topologies — **19**
- 1.4 Connectedness and Compactness — **25**
- 1.5 Metric Spaces – Baire Category — **44**
- 1.6 Function Spaces — **60**
- 1.7 Semicontinuous Functions – Miscellaneous Notions — **67**
- 1.8 Remarks — **75**

2 Measure Theory — 84

- 2.1 Basic Notions, Measures, and Outer Measures — **84**
- 2.2 Measurable Functions – Integration — **100**
- 2.3 Convergence Theorems and L^p -Spaces — **112**
- 2.4 Signed Measures and Radon–Nikodym Theorem — **130**
- 2.5 Regular and Radon Measures — **141**
- 2.6 Analytic (Souslin) Sets — **152**
- 2.7 Selection and Projection Theorems — **161**
- 2.8 Hausdorff Measures — **172**
- 2.9 Remarks — **183**

3 Basic Functional Analysis — 195

- 3.1 Topological Vector Spaces, Hahn–Banach Theorem — **195**
- 3.2 Three Fundamental Theorems — **213**
- 3.3 Weak and Weak* Topologies — **224**
- 3.4 Separable and Reflexive Banach Spaces — **234**
- 3.5 Hilbert Spaces — **244**
- 3.6 Bounded and Unbounded Linear Operators — **257**
- 3.7 Compact Operators – Fredholm Operators — **273**
- 3.8 Remarks — **289**

4 Banach Spaces of Functions and Measures — 301

- 4.1 L^p -Spaces — **301**
- 4.2 Lebesgue–Bochner Spaces — **321**
- 4.3 Functions of Bounded Variations — **345**
- 4.4 Absolutely Continuous Functions — **364**

4.5	Sobolev Spaces —	375
4.6	Spaces of Measures —	386
4.7	Young Measures —	400
4.8	Semigroups of Operators —	408
4.9	Generalized Orlicz Spaces —	430
4.10	Remarks —	452
5	Convex Functions – Nonsmooth Analysis —	464
5.1	Convex Functions – Continuity Properties —	464
5.2	Differentiability of Convex Functions —	474
5.3	Conjugate Functions – Convex Subdifferential —	485
5.4	Proximinal and Chebyshev Sets —	500
5.5	Smoothness of the Norm —	505
5.6	Multifunctions – Integral Functionals —	510
5.7	Lipschitz and Locally Lipschitz Functions —	536
5.8	Remarks —	550
6	Nonlinear Analysis —	560
6.1	Operators of Monotone Type —	560
6.2	Brouwer Degree —	590
6.3	Leray–Schauder Degree —	608
6.4	Fixed Point Theory —	617
6.4.1	Metric Fixed Point Theory —	617
6.4.2	Topological Fixed Point Theory —	628
6.5	Fixed Point Index —	634
6.6	Variational Principles —	643
6.7	Variational Convergence —	653
6.8	Nonlinear Operators, Identities and Inequalities —	662
6.9	Remarks —	686

Bibliography — 695

Index — 707

List of Symbols — 719
