

Contents

1	Introduction and Background.	1
1.1	Thesis Summary	1
1.2	The “Step Economy”	2
1.3	The Arene–Alkene Meta Photocycloaddition.	4
1.3.1	Introduction: Photocycloaddition of an Alkene to a Benzene Derivative	4
1.3.2	Mechanism of the Meta Photocycloaddition Reaction	9
1.3.3	Regio- and Stereo-Selectivity Issues.	11
1.3.4	The Importance of Tether Length	15
1.3.5	Reactions of Meta Photocycloadducts and Their Use in Natural Product Synthesis.	17
1.4	Previous Penkett Group Studies: Palladium Catalyzed Reactions of Meta Photocycloadducts.	21
	References	24
2	Discovery of the Double [3+2] Photocycloaddition.	27
2.1	Introduction: Original Aim	27
2.2	Preliminary Studies	28
2.3	Discovery of the Double [3+2] Photocycloaddition and Structural Elucidation.	34
	References	39
3	A Brief Discussion on Fenestranes	41
3.1	Introduction.	41
3.2	Synthesis of Fenestranes	42
3.3	Naturally Occurring Fenestranes	45
	References	47

4	Investigation of the Double [3+2] Photocycloaddition Reaction for the Synthesis of Fenestranes	49
4.1	Investigating the Synthesis of Dioxafenestrane 4	49
4.2	Thermally Induced Fragmentation-Re-Addition of a Linear Meta Adduct	54
4.3	Deuterium Study of Dioxafenestrane 4 and Characterization of the Oxasilphinene Product 5	56
4.4	Triplet Sensitization and Quenching Studies: Optimisation and Mechanistic Analysis of the Double [3+2] Photocycloaddition	60
4.5	Mechanistic Summary for the Irradiation of the Acetal Photosubstrate 1	63
4.6	Synthesis of a Methyl Dioxafenestrane and Confirmation of Oxygen's Importance in the Pathway Toward Silphinene 5	64
4.7	Attempted Synthesis of Dioxafenestrans from Photosubstrates with an Additional Aromatic Para Substituent	67
4.8	Synthesis of Oxafenestrans Derived from Ether Photosubstrates	71
4.8.1	Introduction	71
4.8.2	Synthesis of Two Methoxy Oxafenestrans	72
4.8.3	Synthesis of Two Methyl Oxafenestrans	78
4.9	Attempted Formation of an All Carbon [5.5.5.5] Fenestrane	81
4.10	Attempted Formation of a [5.5.5.6] Fenestrane	82
4.11	Synthesis of a Novel Azafenestrane	85
4.12	Attempted Double [3+2] Photocycloaddition Reaction Involving a C=N Double Bond	93
	References	98
5	Attempted Synthesis of a "Criss-Cross" Double [3+2] Photocycloadduct	101
5.1	Introduction	101
5.2	Irradiation of Butenyl Tether Photosubstrate 321	101
5.3	Irradiation of Pentenyl Tether Photosubstrate 322	104
	References	105
6	Attempts Toward the Synthesis of Alternative Structures Via the Double [3+2] Photocycloaddition	107
6.1	Introduction	107
6.2	Attempt Toward a Type II Motif	107
6.3	Attempt Toward a Type III Motif	109
	References	111

7 Conclusion	113
8 Experimental	115
8.1 General Procedures	115
8.1.1 Reagents and Solvents	115
8.1.2 Spectroscopy and Naming	115
8.1.3 Chromatography	116
8.1.4 Photochemistry	116
8.2 Experimental Data	117
References	176
Appendix	177
