

Contents

1. Basic Concepts of Continuum Mechanics	1
1.1 General Remarks	1
1.2 Stresses	1
1.3 Strains	9
1.4 Compatibility Conditions	11
1.5 Equations of Motion	12
1.6 Energy	14
1.7 Principle of Virtual Work	15
1.8 Exercises to Chapter 1	16
2. Elastic Material	19
2.1 Hooke's Law	19
2.2 Strain Energy, Complementary Energy	21
2.3 Fundamental Equations	22
2.4 Influence of Temperature	23
2.5 Hooke's Law in Two Dimensions	24
2.6 Strength Criteria	26
2.7 Principle of Complementary Virtual Work	31
2.8 Exercises to Chapter 2	34
3. The Theory of Simple Beams I	37
3.1 General, Normal Stresses	37
3.2 Shear Stresses	44
3.3 Shear Center of Thin-Walled Open Sections	53
3.4 Influence of Distributed Loads	55
3.5 Stresses in Non-prismatic Beams	60
3.6 Deflections of Beams	63
3.7 Exercises to Chapter 3	67
4. Torsion of Prismatic Bars	71
4.1 Solid Cross Sections	71
4.2 Thin-Walled Closed Cross Sections	77
4.3 Thin-Walled Open Sections	80
4.4 Influence of Restrained Warping	85

4.4.1	Closed profiles	87
4.4.2	Open profiles	88
4.5	Exercises to Chapter 4	91
5.	Curved Beams	95
5.1	General, Statics	95
5.2	Large Curvature	96
5.3	Small Curvature	99
5.4	Deflections of Curved Beams	99
5.5	Exercises to Chapter 5	102
6.	Simple Beams II: Energy Principles	103
6.1	Reciprocity Theorems of Betti and Maxwell	103
6.2	Theorems of Engesser and Castigliano	104
6.3	Statically Indeterminate Systems	105
6.4	The Complementary Energy of Beams	106
6.5	Strain Energy of Beams	110
6.6	Application to Beams	111
6.7	Exercises to Chapter 6	117
7.	Two-dimensional Problems	121
7.1	Plane Stress and Plane Strain	121
7.2	Body Forces Derived From a Potential	123
7.3	Plane Problems in Polar Coordinates	123
7.4	Exercises to Chapter 7	128
8.	Plates and Shells	131
8.1	General Remarks	131
8.2	Disks	132
8.3	Thin Plates	134
8.3.1	Fundamental equations	134
8.3.2	Kirchhoff's theory	135
8.3.3	Boundary conditions	137
8.3.4	Axially symmetric bending of circular plates	137
8.3.5	Elastic energy of plates	142
8.4	Membrane Theory of Shells of Revolution	143
8.5	Exercises to Chapter 8	147
9.	Stability of Equilibrium	149
9.1	General Remarks	149
9.2	Bifurcation Problems with Finite Degrees of Freedom	150
9.3	A Snap-Through Problem	152
9.4	Column Buckling	153
9.5	Exercises to Chapter 9	158

10. Some Basic Concepts of Dynamics	161
10.1 Principle of Virtual Work	161
10.2 Hamilton's Principle	162
10.3 The Euler-Lagrange Equations	162
10.4 The Lagrangian Multiplier Method	164
11. Oscillators With One Degree of Freedom	165
11.1 Undamped Free Vibration	165
11.2 Damped Free Vibration	169
11.3 Forced Vibration with Harmonic Excitation	171
11.4 Vibration Isolation	174
11.5 Exercises to Chapter 11	175
12. Systems of Several Degrees of Freedom	177
12.1 A Typical Example	177
12.2 General Equations and Solution	178
12.3 Forced Vibration with Harmonic Excitation	179
12.4 Exercises to Chapter 12	183
13. Answers to the Exercises	185
Index	201
