Preface	6
Acknowledgments	7
Introduction	9
Materials and Methods	11
The Cycles of the White-crowned Sparrow and Other Taxa of <i>Zonotrichia</i>	12
The Hypothalamo-Hypophysial System of <i>Zonotrichia leucophrys gambelii</i>	16
1. General Outline (Gross Anatomy) and Development.	16
2. Hypothalamic Nuclei—General Considerations and Magnocellular Neurons	18
3. Parvocellular Tuberal Nuclei of the Hypothalamus	27
4. Parvocellular Nuclei of the Rostral Hypothalamus	37
5. Hypothalamic Tracts to the Neural Lobe (= <i>Pars Nervosa</i> , = <i>Lobus Infundibularis</i>) and to the Median Eminence	40
a) The Tracts to the Neural Lobe	40
b) The Tracts to the Median Eminence.	41
c) Evidence from Silver Impregnation	41
d) Monoaminergic Fiber Systems in the Basal Hypothalamus	47
6. Structural Principles of the Median Eminence	53
7. Neural Structures of the Anterior and the Posterior Median Eminence	61
a) Sagittal Sections at Different Levels.	61
b) Frontal Sections at Different Levels.	70
c) Complementary Information from Bodian Preparations Post-stained with Alde- hyde Fuchsin.	72
d) Tuberal Neurons in Nissl and Golgi Preparations	72
8. Further Remarks Concerning the Gomori-positive Structures in the Palisade Layer of the Median Eminence	72
a) Tinctorial Properties	81
b) Functional Observations	88
9. Further Remarks Concerning the Tubero-Hypophysial Fiber System of the Median Eminence	92
a) Histochemical Properties of the Median Eminence.	92
b) Effects of Lesions and Implants.	93
10. Electron-microscopic Findings: Types of Granules in the Median Eminence	95
11. Ependymal and Glial Cells of the Median Eminence and the Nuclear Regions of the Basal Tuber Cinereum	98
Discussion	106
Summary	113
Addendum	115
