Abbreviations	IX
1 Introduction	1
2 Indications for operative hysteroscopy	2
3 Instrumentation and technical equipment	3
4 Positioning, preparation of surgery and ergonomics	19
5 Technique and procedure of operative hysteroscopy	22
6 Staff requirements	23
7 Surgical interventions	24
7.1 Septum dissection	24
7.2 Intrauterine adhesiolysis	39
7.3 Myoma resection	49
7.4 Polyp resection	62
7.5 Endometrial ablation/-resection	64
7.6 Alternative techniques of endometrial ablation	94
7.7 Special features of the bipolar surgical technique	103
8 General complications of operative hysteroscopy: management and prevention	109
8.1 Perforation	109
8.2 Intra- and postoperative bleedings	112
8.3 Infections	113
8.4 TUR-syndrome (Transurethral resection syndrome)	114
8.5 Burns	118
8.6 Air embolism	119
8.7 Frequency of complications	122
9 Special clinical cases	123
9.1 Hysteroscopic surgery of a hemihaematometra	123
9.2 Hysteroscopic resection of large residual placenta	125
9.3 Myoma resection of a leiomyosarcoma	127
10 Summary	129
11 Further reading	131
12 Index	133
