

TABLE OF CONTENTS

Techniques in Polarization Physics	
G. Clausnitzer (Giessen).....	1
Theory of Polarization Measurements, Observables, Amplitudes and Symmetries	
M. Simonius (Zürich).....	38
The Nucleon-Nucleon Force	
J.S.C. Mc Kee (Birmingham).....	88
Hyperfine Interaction and Polarization	
E. Matthias (Berlin).....	114
Remarks on the Organization of the Material and the Division of Subject Matter	
H.A. Weidenmüller (Heidelberg).....	161
Resonances, Poles and Polarization	
R. Plattner (Basel).....	162
Isobaric Analog Resonances	
G. Graw (Erlangen).....	184
Fine Structure of Isobaric Analog Resonances and Polarization	
H.L. Harney (Heidelberg).....	212
Direct Interaction	
W. Haeberli (Madison).....	229
Polarization Phenomena in Inelastic Scattering	
B.J. Verhaar (Eindhoven).....	268
