1	Introduction	1
2	Generalities on Fuzzy Sets	5
2.1	Fuzzy Sets. Operations	5
2.2	Zadeh's Extension Principle	8
2.3	Fuzzy Numbers	10
2.4	Operations with Fuzzy Numbers	13
3	Possibilistic Indicators	15
3.1	Probabilistic Indicators	16
3.2	Possibility and Necessity. Possibility Distributions	19
3.3	Possibilistic Expected Value	23
3.4	Possibilistic Variances of Fuzzy Numbers	25
3.5	Possibilistic Covariances of Fuzzy Numbers	29
4	Possibilistic Risk Aversion	35
4.1	Preliminaries on Probabilistic Risk Aversion	36
4.2	Possibilistic Expected Utilities	37
4.3	Possibilistic Risk Aversion: The First Approach	40
4.4	Possibilistic Risk Aversion: The Second Approach	44
5	Expected Utility Operators and Possibilistic Risk Aversion	47
5.1	Expected Utility Operators	47
5.2	Possibilistic Covariances	50
5.3	Abstract Possibilistic Risk Aversion	53
5.4	A Possibilistic Pratt Theorem	55
5.5	A Portfolio Selection Problem	57
6	Multidimensional Possibilistic Risk Aversion	59
6.1	Possibilistic Expected Utility: The Multidimensional Case	60
6.2	Multidimensional Possibilistic Risk Aversion	63

6.3	Specific Possibilistic Risk Aversion	67
6.4	Possibilistic Risk Aversion in Grid Computing	73
7	Risk Aversion with Mixed Parameters	77
7.1	Mixed Expected Utility	78
7.2	Mixed Risk Aversion	81
7.3	Mixed Risk Premium Vectors	84
7.4	Application of Risk Aversion Evaluation in Grid Computing	86
8	Credibility Theory	89
8.1	Credibility Measures	90
8.2	Membership Function	95
8.3	Credibilistic Indicators	97
8.4	Credibility Distribution	103
8.5	Credibilistic Risk Aversion	104
9	Concluding Remarks	111
