

Table of Contents

Preface	VII
Acknowledgments	X
Introduction: Nature of Philosophy and Philosophy of Nature.....	1
The Nature of Philosophy and Its Relation to Science.....	3
a) Metaphysics as an Essential Task of Philosophy.....	3
b) Metaphysics Entrenched in Science.....	4
c) Science as Philosophy and Art.....	5
d) The Dialogue Between Philosophy and Science.....	6
The Philosophy of Nature – Universal Darwinism and Its Transcendence.....	7
a) The Glory and Poverty of Gene-Darwinism – The Need for a Third Way.....	8
b) A Strict Definition of Darwinism and Process-Darwinism	10
c) From Darwinism to an Evolutionary Theory of Evolution	12
d) The Philosophy of Nature after Times of Ecological and Economic Crisis.....	16
e) Darwinism, Religion and Philosophy	18
One Long Argument – Outline of the Book.....	22
Part I: Sociobiology and Its Ethical Implications – The Cause of this Investigation	29
Chapter 1: Sociobiology as Discipline and Paradigm.....	31
1.1 Two Basic Postulates	33
a) The Postulate of ‘Selfish’ Genes as the Only Units of Evolution	33
b) The Postulate of Genic or Biological Determinism.....	35
1.2 The Main Theories of the Evolution of Apparent Altruism – Sociobiological Theorems?	36
a) The Theory of Kin Selection	37
b) The Theory of Reciprocal ‘Altruism’	38
Chapter 2: Ethical Implications – The Morality of the Gene?.....	41
2.1 Biology and Ethics: Different but Not Unrelated.....	42
2.2 Philosophical Reactions and Some Accounts of a ‘Sociobiological Ethics’	45

2.3 The Moral of the Gene? – ‘The Currency Used in the Casino of Evolution Is Survival’	51
2.4 Meme ‘Altruisms’? – A Further Extension of the Sociobiological Paradigm	57
a) Memes – A Limited Comeback of the Idea of Logos	57
b) Problems of the Extended Genetic-Memetic Approach as a Basis for Ethics.....	59
2.5 The Need for a New Paradigm in Biology	62

Part II: The Unfolding of Logos in Regard to the Conceptions of ‘Physis’ and Darwinism65

Chapter 3: The Unfolding of the Pre-Darwinian Philosophical Conceptions of Nature..... 69

3.1 The Ancient Views of φύσις – Nature as Organism	69
a) From Myth to the Pre-Socratics – The Development of Basic Notions.....	70
b) Platonism – Physis as ‘Techne’	71
c) Aristotelianism – Physis as ‘Autopoiesis’	72
3.2 Medieval Philosophy – The Divine De-enchantment of Nature	73
a) The World as ‘Machina Mundi’	74
b) The Human as ‘Alter Deus’	75
c) Universalia – From Realism to Nominalism	75
3.3 Modern Philosophy – Nature as Clockwork; Creator as Watchmaker.....	76
a) The Rise of Science – The Alter Deus Explores the Clockwork of God: Copernicus, Bacon, Newton.....	76
b) Humanism – The Alter Deus Replaces the Christian Deus	78
c) Descartes and Kant – Dualism of Human Freedom and the Clockwork of Nature	79
d) Idealism and Romanticism – The Dynamic ‘Trial of a Unification’.....	82
(i) ‘Naturphilosophie’ and Idealism	82
(ii) Unity, Dynamism and Organicism.....	84
(iii) The Breakdown of Romantic Science	86
3.4 The Rise of Biology as Science – Torn between Eternal Form and Evolution	87
a) Hierarchical Taxonomy instead of ‘Scala Naturae’ – Linnaeus.....	89
b) Romanticising Materialistic Biology – Buffon, Lamarck.....	90
c) Transcendental and Essentialist Biology – Cuvier, (early) Owen, Agassiz.....	92

d) Romantic Biology – Oken, Geoffroy Saint-Hilaire, (late) Owen.....	95
e) Conclusion: Overview of the Preceding Three Schools.....	98

Chapter 4: The Internal Logic of Evolutionary Theories –

From Darwin to Dawkins..... 102

4.1 From Darwin to Weismann – The Birth of Darwinism	106
a) Darwin – Not a Darwinist in the Strict Sense.....	106
b) Darwin's Biological Theory – Focus on the Individual Organism.....	110
c) Darwin's Descent of Man – Social Darwinism?	112
(i) Ambivalence about the Universality of Natural Selection	112
(ii) Explaining Man, Culture and Ethics?	115
d) Neo-Darwinism: Weismann Turns Darwin's Theory into 'Darwinism'	118
4.2 Darwinism on Its Deathbed.....	121
4.3 Evolutionary Synthesis	123
a) First Phase – Synthesis of Genetics and Population Statistics	125
b) Second Phase – Population Structure and Macroscopic Mechanisms.....	127
c) Evolutionary Factors and the Importance of Populations	130
d) Disengagement from Ideological Programmes?	134
4.4 'Sociobiology' as Gene-Darwinism – A New Synthesis?	138
a) Germ-Line Reductionism.....	139
b) Gene-Atomism.....	140
c) Darwinian Process Monism	142
4.5 Criticism – A Better Synthesis in Sight?.....	144
a) New Views in Micro- and Macrobiology.....	146
b) A Multilevel Synthesis – Darwinism versus Developmentalism?	152
(i) Multi-Level-Darwinism.....	153
(ii) Multi-Level-Evolutionism: Developmental Approaches and Selforganisational Approaches	156

Chapter 5: The External History of Darwinism –

From Whig Biology to Neo-Liberal Biology?..... 160

5.1 Darwin – A Malthusian Synthesis of Romantic and Newtonian Thought	162
a) Romanticism and Romanticising Materialism.....	163
b) The Impact of Newtonism – Darwin's Process-Monism.....	168
c) Thomas Malthus, Adam Smith – The Influence of Economic Thought and Practice	173
d) God – A Blind and Brute Creator?	183

5.2 Evolutionary Synthesis –	
Thermodynamics and the Philosophical Zeitgeist.....	184
a) The Influence of Thermodynamics	184
b) The Impact of the Philosophical Zeitgeist and the Development of	
Logical Positivism and Logical Atomism?.....	186
(i.) Philosophy at the Time of the Eclipse of Darwinism.....	187
(ii) Parallels of Logical Atomism and Logical Positivism	
to Fisherism?	188
(iii) Contextual Turns in Philosophy and Biology.....	190
5.3 Gene-Darwinism – Reductionism Generalised.....	191
a) The Different Biological Legacies of the Schools of	
Evolutionary Biology	193
b) A Mised Neo-Romantic Aspiration for Unification and	
Interdisciplinarity	193
c) ‘Naturalistic Turn’ – Reductionism and Materialism in Philosophy....	197
d) ‘Import’ of Economical Concepts – Gene-Capitalism?	198
5.4 Summary: Biology as ‘Geisteswissenschaft’?.....	202

Part III: Universal Darwinism 205

Chapter 6: Darwinian Metaphysics –

Biologistic and Process-Darwinism 207

6.1 The Problem of Induction –	
The Necessity of Blind Variation and External Elimination?.....	209
a) Darwinism Seen as Universal Principle.....	209
b) The Problem of Induction (Hume and Popper)	210
c) Toward a Critique of a Falsificationist Necessity of	
Universal Darwinism.....	212
6.2 Biologistic Darwinism – Gene-Darwinism as Prototype.....	215
6.3 Universal Process-Darwinism – A New Alkahest	216

Chapter 7: Process-Darwinism in Particular Subject Areas 221

7.1 Darwinian Epistemologies and Darwinian Philosophies of Science	221
a) Darwinian Biological Epistemology and	
Darwinian Process Epistemology	221
b) Operant Conditioning – Learning as Darwinian Process?.....	227
c) Popper’s Falsificationism – Science as Darwinian Process?.....	232
7.2 Other Components of Process-Darwinism	235
a) Antibodies and Neurones.....	235
b) Darwinian Economics?.....	236

Conclusion – The Universal War of Entities	240
---	------------

Part IV: Transcendence of Gene-Darwinism and Universal Process-Darwinism	243
---	------------

Chapter 8: Transcendence of Substance-Reductionism.....	245
--	------------

8.1 Problems of Physicalism and Reductionism in General	245
a) The Difference between Explanation and (Downward) Reduction....	245
b) Problems of Modern Physicalism with Traditional Materialism.....	246
c) Logical Problems of the Modern Understanding of Substance – Is a Tree a Million Matches?	248
d) The Inconsistency between Biologism and Physicalism – Genes or Information versus Quarks?	255
8.2 Genetic Reductionism I:	
Gene-Atomistic Reductionism and Its Transcendence.....	264
a) Gene-Atomism – Empty or Wrong Claim?	264
b) Higher Genetic Units – Despite the Meiotic Shuffle.....	267
(i) The General Possibility of Emergent Higher Genic Units	267
(ii) Higher Genic Units Despite the Meiotic Shuffle	269
c) Top-Down Causation and Higher-Level Genes at Different Loci.....	272
(i) The Relationship of Higher-Level Genes and Downward Causation.....	272
(ii) The Stability of Higher-Level Genes on Different Loci	274
d) The Fallacy of Claiming Gene-Atomism Tautologically	277
(i) The Testable Claim of Gene-Atomism.....	279
(ii) The Tautological Claim of Gene-Atomism.....	280
e) Higher-Level Properties of Different Organisms – Four Possibilities for Achieving the Good of the Group.....	284
(i) Wholes in the Individual and the Many – Loci and Alleles	284
(ii) Four Possibilities for Achieving the Good of the Group.....	289
f) Stable Synergetic Properties and Selection above Groups – Species and Ecosystems.....	301
(i) Species	302
(ii) Ecosystems	304
8.3 Genetic Reductionism II:	
Germ-Line Reductionism and Its Transcendence	311
a) Germ-Line Reductionism – The Strong Interpretation of the Weismann Barrier	311
(i) Different Interpretations of the Central Dogma.....	312
(ii) Violations of the Weismannian Dogma?	313

(iii) The Central Dogma as Only Partial Description of the Relationships between Genotype and Phenotype.....	315
b) Information, Exformation and Phenotype as Evolutionary Factors.....	316
(i) The General Concept of Exformation.....	316
(ii) Exformation and the Stuffness of the Phenotype.....	317
(iii) Phenotype Interpreting Genotype.....	319
(iv) Stuffness and Inner Dynamics of the Phenotype.....	321
(v) Phenotype as Evolutionary Factor in Its Own Right	322
c) Forms, Fields and the Concept of External Memory.....	324
(i) Environmental Forms and Fields	324
(ii) External Memory.....	326
d) A Partial Revival of Morphological Taxonomy?	329
(i) The Evolutionary Factor of Constraints as Object of Taxonomy.....	330
(ii) Morphological Resonance as Object of Taxonomy.....	331
e) Summary	331
Chapter 9: Transcendence of Process-Reductionism	333
9.1 Inconsistencies and Tautologies of a Darwinian Mono-Mechanistic Metaphysic.....	336
a) Inconsistencies of Different Levels of Multilevel Darwinism.....	336
b) On the Tautological Basis of Pan-Adaptationism.....	339
c) On the Tautological Basis of Pan-Selectionism.....	350
9.2 Re-defining the Notions of Darwinism and Lamarckism.....	358
a) A Strict Definition of Darwinism	358
b) A Spectrum between Darwinism and Lamarckism.....	359
9.3 Toward Radical Evolutionism – The Evolution of Evolutionary Mechanisms	363
a) Synthesis versus Pure Diversification of Information – Discussion of the First Criterion for a Darwinian Process.....	364
b) Directed Variation versus Blind Variation – Discussion of the Second Criterion.....	368
(i) Not Blind by Definition	371
(ii) Different Types of Variation	374
(iii) Is There Adaptive Variation?.....	377
(iv) Adaptive Variation as Reaction to the Environment?.....	389
(v) Summary and Conclusion	392
c) From Hetero-Selection to Auto-Selection – Discussion of the Third Criterion.....	394
(i) Darwinian Externalism	395

(ii) Opportunistic Response to the Moment?	396
(iii) Auto-Selection and Autonomy	398
d) The Evolution of Evolutionary Mechanisms	405
(i) The Necessary Concept of an Evolution of Evolutionary Mechanisms	405
(ii) Process-Emergence, Circularity and Autonomy	409
9.4 Summary of the Chapter on Process-Reductionism	415
Chapter 10: Towards the Transcendence of Selfishness	418

Summary and Outlook – Towards Ecological Idealism	427
Beyond the Two Cultures?	427
Summary	428
An Outlook – Towards Ecological Idealism	434

Bibliography	437
Index	471
