Introduction	1
1. Ionosphere: Structure and Basic Methods for Radio Sounding and Monitoring	5
1.1 An Outline of Ionospheric Structure	5
1.2 Basic Methods for Radio Sounding and Monitoring the Ionosphere	8
2. Ray Radio Tomography	21
2.1 Statement of the Problems and Methods of Ray Radio Tomography	21
2.2 Construction of Projection Operator Approximations	40
2.3 Algorithms for Solving Systems of Linear Equations	50
2.4 Ray Radio Tomography Problems and Assembly of Solutions	58
2.5 Bayesian Approach in Ionospheric Tomography	67
2.6 Experimental Tools in Ionospheric Radio Tomography	73
2.7 Experimental Images	78
3. Inverse Scattering Problems	91
3.1 Statement of Inverse Scattering Problems in Ionospheric Radio Probing	91
3.2 Inverse Scattering Problem for Weak Irregularities	94
3.3 Determining the Location and the Parameters of Irregularities	103
3.4 Inverse Scattering Problem in a Stratified Medium	107
3.5 Inverse Scattering Problem for Strong Irregularities	110
3.6 Holographic Approach	119
4. Diffraction Radio Tomography of Ionospheric Irregularities	129
4.1 Fresnel Diffraction Tomography	129
4.2 Reconstructing Irregularities from a Limited Data Set	135
4.3 Linear-Array and Single-Point Measurements	138
4.4 Diffraction Radio Tomography Based on Discrete Data	140

VIII Contents

4.5	Effects of Noise and Distortion on the Reconstruction of Irregularities	143
4.6	Reconstruction of Isolated Irregularities	148
5.	Statistical Radio Tomography of a Randomly Inhomogeneous Ionosphere	157
5.1	Reconstruction of a Randomly Inhomogeneous Ionosphere ...	157
5.2	Stochastic Inverse Problems	158
5.3	Reconstructing Projections of Correlation Functions	164
5.4	Tomography of Randomly Inhomogeneous Isotropic Media ...	174
5.5	Tomography of Randomly Inhomogeneous Anisotropic Media	179
5.6	Reconstruction of the Variance of Electron Density Fluctuations from Amplitude Data	189
6.	Further Development of Tomographic Methods	195
6.1	Radio Tomography Based on Quasi-Tangential Sounding	195
6.2	Tomography Using High-Orbiting Satellites. Space-Time Radio Tomography	203
6.3	Frequency-Space Radio Tomography	213
6.4	Optical Tomography of the Ionosphere	217
	Summary	223
	References	243
	Index	257
