

CONTENTS

1. Introduction	1
2. Spondyloarthropathies: Classification and Clinical Considerations	3
Classification	3
Clinical Considerations	4
3. Molecular Pathogenic Mechanisms	11
Immunogenetic Factors	11
Biochemistry of the HLA System	12
HLA Class I Molecules	12
Class II Molecules	14
Genetics of the HLA System	17
4. HLA Antigens and Disease Associations	23
HLA Antigens and Rheumatic Diseases	23
5. HLA Antigens and Seronegative Spondyloarthropathies	29
HLA System: Psoriasis and Psoriatic Arthritis	31
Genetics of Psoriasis and Psoriatic Arthritis	31
HLA System and Psoriasis	32
HLA System and Psoriatic Arthritis	33
HLA System and Psoriatic Arthritis Variants	34
6. HLA Antigens and Seronegative Spondyloarthropathies: Significance of the Association	41
HLA-B27 Molecule	42
HLA-B27 Subtypes	42
Mechanisms Proposed to Explain the Association of HLA-B27 and Spondyloarthropathies	46
7. Experimental Animal Models of Spondyloarthropathies: Transgenic Animals	57
8. Role of Microorganisms in the Pathogenesis of Spondyloarthropathies	65
Organisms Involved	66
9. Immune Dysfunction in Spondyloarthropathies	77
Humoral Immune Studies	77
Cellular Immune Studies	80

10. Role of Cytokines and Growth Factors in the Pathogenesis of Spondyloarthropathies with Emphasis on Psoriatic Arthritis	93
11. Role of Genetic Factors Other Than HLA-B27 and Other Factors in the Spondyloarthropathies	111
Miscellaneous Factors	113
12. Advances in Therapy: Future Perspectives	117
Index	121
