

Table of Contents

Concepts and approaches to long term and large scale modelling of fluvial systems	9
<i>Andreas Lang, Kirsten Hennrich, Richard Dikau</i>	

I Large scale fluvial system modelling

A LUCIFS Strategy: Modelling the Sediment Budgets of Fluvial Systems .	19
<i>Aleksey Sidorchuk, Desmond Walling, Robert Wasson</i>	
Linking Short- and Long-Term Soil-Erosion Modelling	37
<i>John Wainwright, Anthony J. Parsons, Katerina Michaelides, D. Mark Powell, Richard Brazier</i>	
Modelling sediment fluxes at large spatial and temporal scales	53
<i>Nicholas Preston, Jochen Schmidt</i>	
Modelling the Geomorphic Response to Land Use Changes	73
<i>Anton Van Rompaey, Gerard Govers, Gert Verstraeten, Kristof Van Oost, Jean Poesen</i>	
Modelling Water and Tillage Erosion using Spatially Distributed Models ..	101
<i>Kristof Van Oost, Gerard Govers, Wouter Van Muysen, Jeroen Nachtergaele</i>	
Long-term and large scale high resolution catchment modelling: Innovations and challenges arising from the NERC Land Ocean Interaction Study (LOIS)	123
<i>Tom J. Coulthard, Mark G. Macklin</i>	

II Case studies from the Rhine river catchment and Central Europe

Large to Medium-Scale Sediment Budget Models - the Alpenrhein as a Case Study	137
<i>Matthias Hinderer</i>	
Impact of Climate and Land Use Change on River Discharge and the Production, Transport and Deposition of Fine Sediment in the Rhine basin – a summary of recent results	157
<i>Hans Middelkoop, Nathalie E.M. Asselman</i>	

Changing Human Impact during the Period of Agriculture in Central Europe: The Case Study Biesdorfer Kehlen, Brandenburg, Germany	183
<i>Gabriele Schmidtchen, Hans-Rudolf Bork</i>	
Land Use and Soil Erosion in northern Bavaria during the last 5000 Years. 201	
<i>Markus Dotterweich</i>	
Quantification of past soil erosion and land use / land cover changes in Germany	231
<i>Hans-Rudolf Bork, Andreas Lang</i>	
Subject Index	241
