

Table of contents

Preface	v
---------------	---

M. S. Baouendi, Linda Preiss Rothschild and Dmitri Zaitsev Points in general position in real-analytic submanifolds in $\mathbb{C}^N$ and applications	1
---	---

David E. Barrett Holomorphic motion of circles through affine bundles	21
---	----

Bo Berndtsson Weighted estimates for the $\bar{\partial}$ -equation	43
---	----

Michael Christ Hypoellipticity in the infinitely degenerate regime	59
--	----

Michael Christ Spiraling and nonhypoellipticity	85
---	----

John P. D'Angelo Positivity conditions for real-analytic functions	103
--	-----

Peter Ebenfelt and Xiaojun Huang On a generalized reflection principle in $\mathbb{C}^2$	125
--	-----

Siqi Fu and Emil J. Straube Compactness in the $\bar{\partial}$ -Neumann problem	141
--	-----

Joseph J. Kohn Hypoellipticity at non-subelliptic points	161
--	-----

Yum-Tong Siu Very ampleness part of Fujita's conjecture and multiplier ideal sheaves of Kohn and Nadel	171
---	-----
