Preface	xi
Acknowledgements	xv
1 Introduction	1
1.1 Basic concepts	1
1.2 Related results	4
2 Auxiliary Results, Tools	7
2.1 Baker's method, effective finiteness theorems	8
2.2 Reduction	9
2.2.1 Davenport lemma	9
2.2.2 The general case	10
2.3 Enumeration methods	12
2.4 Software, hardware	16
3 Auxiliary Equations	19
3.1 Thue equations	19
3.1.1 Elementary estimates	20
3.1.2 Thue's theorem	20
3.1.3 Fast algorithm for finding "small" solutions	21
3.1.4 Effective methods	22
3.1.5 The method of Bilu and Hanrot	23
3.2 Inhomogeneous Thue equations	24

3.2.1	Elementary estimates	25
3.2.2	Baker's method	26
3.2.3	Reduction, test	27
3.2.4	An analogue of the Bilu–Hanrot method	27
3.3	Relative Thue equations	28
3.3.1	Baker's method, reduction	29
3.3.2	Enumeration	31
3.3.3	An example	32
3.4	The resolution of norm form equations	34
3.4.1	Preliminaries	34
3.4.2	Solving the unit equation	36
3.4.3	Calculating the solutions of the norm form equation	38
3.4.4	Examples	39
4	Index Form Equations in General	45
4.1	The structure of the index form	45
4.2	Using resolvents	47
4.3	Factorizing the index form when proper subfields exist	47
4.4	Composite fields	48
4.4.1	Coprime discriminants	48
4.4.2	Non-coprime discriminants	50
5	Cubic Fields	53
5.1	Arbitrary cubic fields	53
5.2	Simplest cubic fields	54
6	Quartic Fields	55
6.1	Algorithm for arbitrary quartic fields	56
6.1.1	The resolvent equation	56
6.1.2	The quartic Thue equations	57
6.1.3	Proof of the theorem on the quartic Thue equations	60
6.1.4	Examples	64
6.2	Simplest quartic fields	65
6.3	An interesting application to mixed dihedral quartic fields	66
6.4	Totally complex quartic fields	67
6.4.1	Parametric families of totally complex quartic fields	68
6.5	Bicyclic biquadratic number fields	70
6.5.1	Integral basis, index form	70
6.5.2	The totally real case	71
6.5.3	The totally complex case	74
6.5.4	The field index of bicyclic biquadratic number fields	75
7	Quintic Fields	79
7.1	Algorithm for arbitrary quintic fields	79
7.1.1	Preliminaries	80

7.1.2	Baker's method, reduction	81
7.1.3	Enumeration	82
7.1.4	Examples	84
7.2	Lehmer's quintics	88
7.2.1	Integer basis, unit group	89
7.2.2	The index form	91
7.2.3	The index form equation	92
7.2.4	The exceptional case	94
8	Sextic Fields	97
8.1	Sextic fields with a quadratic subfield	97
8.1.1	Real quadratic subfield	99
8.1.2	Totally real sextic fields with a quadratic and a cubic subfield	100
8.1.3	Imaginary quadratic subfield	101
8.1.4	Sextic fields with an imaginary quadratic and a real cubic subfield	101
8.1.5	Parametric families of sextic fields with imaginary quadratic and real cubic subfields	106
8.2	Sextic fields with a cubic subfield	109
8.3	Sextic fields as composite fields	110
8.3.1	A cyclic sextic field	111
8.3.2	A non-cyclic sextic field	111
8.3.3	The parametric family of simplest sextic fields	111
9	Relative Power Integral Bases	113
9.1	Basic concepts	113
9.2	Relative cubic extensions	114
9.2.1	Example 1. Cubic extension of a quintic field	115
9.2.2	Example 2. Cubic extension of a sextic field	116
9.2.3	Computational experiences	121
9.3	Relative quartic extensions	121
9.3.1	Preliminaries	121
9.3.2	The cubic relative Thue equation	121
9.3.3	Representing the variables as binary quadratic forms	123
9.3.4	The quartic relative Thue equations	124
9.3.5	An example for computing relative power integral bases in a field of degree 12 with a cubic subfield	125
10	Some Higher Degree Fields	129
10.1	Octic fields with a quadratic subfield	129
10.1.1	Preliminaries	129
10.1.2	The unit equation	131
10.1.3	The inhomogeneous Thue equation	132
10.1.4	Sieving	133

10.1.5	An example for computing power integral bases in an octic field with a quadratic subfield	134
10.2	Nonic fields with cubic subfields	136
10.2.1	The relative Thue equations	137
10.2.2	The unit equation over the normal closure	138
10.2.3	The common variables	140
10.2.4	Examples	143
10.3	Some more fields of higher degree	143
10.3.1	Power integral bases in imaginary quadratic extensions of totally real cyclic fields of prime degree . . .	144
10.3.2	Power integral bases in imaginary quadratic extensions of Lehmer's quintics	146
10.3.3	One more composite field	147
11	Tables	149
11.1	Cubic fields	149
11.1.1	Totally real cubic fields	150
11.1.2	Complex cubic fields	152
11.2	Quartic fields	152
11.2.1	The distribution of the minimal indices	153
11.2.2	The average behavior of the minimal indices	153
11.2.3	Totally real cyclic quartic fields	154
11.2.4	Monogenic mixed dihedral extensions of real quadratic fields	155
11.2.5	Totally real bicyclic biquadratic number fields	156
11.2.6	Totally complex bicyclic biquadratic number fields	160
11.2.7	Some more quartic fields	161
11.3	Sextic fields	167
11.3.1	Totally real cyclic sextic fields	167
11.3.2	Sextic fields with imaginary quadratic subfields	168
