Part I: Intelligent Image Processing

1	Advances in Reasoning-Based Image Processing and Pattern Recognition: Conventional and Intelligent Paradigms.....	3
	<i>Roumen Kountchev, Kazumi Nakamatsu</i>	
1.1	Introduction	3
1.2	Performance Analysis and Comparison of the Dirac Video Codec with H.264/ MPEG-4, Part 10	4
1.3	Linear and Non-linear Inverse Pyramidal Image Representation: Algorithms and Applications	4
1.4	Preserving Data Integrity of Encoded Medical Images: The LAR Compression Framework	5
1.5	Image Processing in Medicine	5
1.6	Attention in Image Sequences: Biology, Computational Models, and Applications	6
1.7	Visual Perception for Mobile Robots Motion Control.....	6
1.8	Motion Estimation for Object Analysis and Detection in Videos.....	6
1.9	Shape-Based Invariant Features Extraction for Object Recognition.....	7
1.10	Object-Based Image Retrieval System Using Rough Set Approach.....	7
1.11	Paraconsistent Artificial Neural Networks and Delta, Theta, Alpha, and Gamma Band Detection	7
1.12	Paraconsistent Artificial Neural Networks and Pattern Recognition: Speech Production Recognition and Cephalometric Analysis.....	8
1.13	On Creativity and Intelligence in Computational Systems	8
1.14	Method for Intelligent Representation of Research Activities of an Organization over Taxonomy of Its Field.....	8
2	Performance Analysis and Comparison of the Dirac Video Codec with H.264/MPEG-4, Part 10.....	9
	<i>Aruna Ravi, K.R. Rao</i>	
2.1	Introduction	9
2.2	Dirac Architecture	10
2.2.1	Dirac Encoder	10
2.2.2	Dirac Decoder	11
2.3	Stages of Encoding and Decoding in Dirac	12
2.3.1	Wavelet Transform	12
2.3.2	Scaling and Quantization	15
2.3.3	Entropy Coding.....	16

2.3.4	Motion Estimation	16
2.3.5	Motion Compensation.....	18
2.3.6	Decoder.....	19
2.4	Implementation	20
2.4.1	Code Structure Overview.....	20
2.4.2	Simplicity and Relative Speed of Encoding.....	20
2.5	Results	22
2.5.1	Compression Ratio Test.....	22
2.5.2	SSIM Test.....	24
2.5.3	PSNR Test	26
2.6	Conclusions	31
2.7	Future Research	31
	References	32
	Abbreviations.....	34
3	Linear and Non-linear Inverse Pyramidal Image Representation: Algorithms and Applications.....	35
	<i>Roumen Kountchev, Vladimir Todorov, Roumiana Kountcheva</i>	
3.1	Basic Methods for Pyramidal Image Decomposition	35
3.2	Basic Principles of the Inverse Pyramid Decomposition	41
3.2.1	Inverse Pyramid Decomposition with Orthogonal Transforms.....	41
3.2.2	Comparison of the Inverse and the Laplacian Pyramid Decompositions	46
3.2.3	Reduced Inverse Pyramid Decomposition.....	50
3.2.4	Inverse Pyramid Decomposition with Non-linear Transforms Based on Neural Networks	58
3.3	Multi-view Image Representation Based on the Inverse Pyramidal Decomposition.....	67
3.3.1	Multi-view 3D Object Representation with Modified IPD.....	68
3.3.2	Experimental Results	73
3.4	Multispectral Images Representation with Modified IPD.....	78
3.4.1	Selection of the Reference Image in Multispectral Sequence.....	80
3.4.2	Experimental Results	81
3.5	Conclusions	84
	References	84
4	Preserving Data Integrity of Encoded Medical Images: The LAR Compression Framework.....	91
	<i>Marie Babel, François Pasteau, Clément Strauss, Maxime Pelcat, Laurent Bédar, Médéric Blestel, Olivier Déforges</i>	
4.1	Introduction	91
4.2	How to Protect Content in an Image?	93
4.2.1	Cryptography	93
4.2.2	Data Hiding and Image Coding.....	96
4.3	Secure Transmission of Encoded Bitstreams.....	97
4.3.1	Error Resilience and Channel Coding.....	98

4.3.2	IP Packets Securitization Processes.....	99
4.3.3	LTE Standard Application Case: Securitization Process for Advanced Functionalities.....	100
4.4	Application Example: LAR Medical Framework.....	105
4.4.1	LAR Codec Overview.....	105
4.4.2	Principles and Properties.....	107
4.4.3	Content Protection Features.....	111
4.4.4	Transmission Error Protection - Error Resilience.....	118
4.5	Conclusion.....	121
	References.....	121
5	Image Processing in Medicine	127
	<i>Baigalmaa Tsagaan, Hiromasa Nakatani</i>	
5.1	Introduction.....	127
5.2	Overview of Medical Imaging.....	128
5.2.1	Imaging Modality.....	128
5.2.2	Image Reconstruction.....	130
5.2.3	Image Format.....	131
5.2.4	Diagnostic Practice Using Medical Images.....	131
5.3	Conventional Approaches of Image Processing.....	132
5.3.1	Image Segmentation.....	132
5.3.2	Image Registration.....	135
5.3.3	Visualization.....	137
5.4	Application.....	137
5.4.1	CAD, CAS and Virtual Endoscopy.....	138
5.4.2	Image-Guided Navigation for Paranasal Sinus Surgery.....	139
5.5	Summary.....	142
	References.....	143
	List of Abbreviations.....	146
6	Attention in Image Sequences: Biology, Computational Models, and Applications	147
	<i>Mariofanna Milanova, Engin Mendi</i>	
6.1	Introduction.....	147
6.2	Computational Models of Visual Attention.....	149
6.2.1	A Taxonomy of Computational Model of Bottom-Up Visual Attention.....	149
6.2.2	Hybrid Computational Models of Visual Attention.....	155
6.3	Selected Datasets.....	160
6.3.1	LABELME.....	160
6.3.2	Amsterdam Library of Object Images (ALOI).....	160
6.3.3	Spatially Independent, Variable Area, and Lighting (SIVAL).....	161
6.3.4	MSRA.....	161
6.3.5	Caltech.....	161
6.3.6	PASCAL VOC.....	161

6.4	Software Implementations of Attention Modeling	161
6.4.1	Itti-Koch Model	162
6.4.2	Matlab Implementations	162
6.4.3	TarzaNN	163
6.4.4	Model Proposed by Matei Mancas.....	163
6.4.5	JAMF	163
6.4.6	LabVIEW.....	163
6.4.7	Attention Models Evaluation and Top-Down Models	163
6.5	Applications.....	163
6.6	Example	164
	References	167

Part II: Pattern Recognition, Image Data Mining and Intelligent Systems

7	Visual Mobile Robots Perception for Motion Control.....	173
	<i>Alexander Bekiarski</i>	
7.1	The Principles and Basic Model of Mobile Robot Visual Perception	173
7.2	Log-Polar Visual Mobile Robot Perception Principles and Properties	177
7.2.1	Definition of Log-Polar Transformation for Mobile Robot Visual Perception	177
7.2.2	Log-Polar Transformation of Image Points in Visual Mobile Robot Perception System	178
7.2.3	The Properties of Log-Polar Transformation Suitable for Visual Mobiles Robot Perception System.....	182
7.2.4	Visual Perception of Objects Rotation in Log-Polar Mobile Robot Visual Perception Systems	182
7.2.5	Visual Perception of Objects Translation and Scaling in Log-Polar Mobile Robot Visual Perception Systems.....	188
7.3	Algorithm for Motion Control with Log-Polar Visual Mobile Robot Perception	194
7.3.1	The Basic Principles and Steps of the Algorithm for Motion Control with Log-Polar Visual Mobile Robot Perception.....	194
7.3.2	Simulation and Test Results for the Algorithm of Motion Control with Log-Polar Visual Mobile Robot Perception.....	200
7.4	Conclusion	206
	References	207
8	Motion Estimation for Objects Analysis and Detection in Videos.....	211
	<i>Margarita Favorskaya</i>	
8.1	Introduction	211
8.2	Classification of Motion Estimation Methods	213
8.2.1	Comparative Motion Estimation Methods	214

8.2.2 Gradient Motion Estimation Methods	226
8.3 Local Motion Estimation Based on Tensor Approach	234
8.3.1 The Initiation Stage	235
8.3.2 Motion Estimation in Visual Imagery	236
8.3.3 Motion Estimation in Infrared Imagery	240
8.3.4 Elaboration of Boundaries of Moving Regions	242
8.3.5 Classification of Dynamic Regions	244
8.4 Experimental Researches	245
8.5 Tasks for Self-testing	248
8.6 Conclusion	250
References	250

9 Shape-Based Invariant Feature Extraction for Object Recognition255

Mingqiang Yang, Kidiyo Kpalma, Joseph Ronsin

9.1 Introduction	255
9.2 One-Dimensional Function for Shape Representation	258
9.2.1 Complex Coordinates	258
9.2.2 Centroid Distance Function	259
9.2.3 Tangent Angle	259
9.2.4 Contour Curvature	260
9.2.5 Area Function	261
9.2.6 Triangle-Area Representation	261
9.2.7 Chord Length Function	262
9.2.8 Discussions	262
9.3 Polygonal Approximation	263
9.3.1 Merging Methods	263
9.3.2 Splitting Methods	265
9.3.3 Discussions	265
9.4 Spatial Interrelation Feature	266
9.4.1 Adaptive Grid Resolution	266
9.4.2 Bounding Box	267
9.4.3 Convex Hull	269
9.4.4 Chain Code	269
9.4.5 Smooth Curve Decomposition	271
9.4.6 Symbolic Representation Based on the Axis of Least Inertia	271
9.4.7 Beam Angle Statistics	272
9.4.8 Shape Matrix	273
9.4.9 Shape Context	275
9.4.10 Chord Distribution	276
9.4.11 Shock Graphs	277
9.4.12 Discussions	278
9.5 Moments	278
9.5.1 Boundary Moments	278
9.5.2 Region Moments	279
9.5.3 Discussions	282

9.6	Scale Space Approaches	282
9.6.1	Curvature Scale-Space	283
9.6.2	Intersection Points Map.....	284
9.6.3	Discussions.....	285
9.7	Shape Transform Domains	285
9.7.1	Fourier Descriptors.....	285
9.7.2	Wavelet Transform.....	288
9.7.3	Angular Radial Transformation.....	288
9.7.4	Shape Signature Harmonic Embedding.....	289
9.7.5	$\mathcal{R}$ -Transform.....	290
9.7.6	Shapelet Descriptor	292
9.7.7	Discussions.....	293
9.8	Summary Table.....	293
9.9	Illustrative Example: A Contour-Based Shape Descriptor	295
9.9.1	Fundamental Concepts	295
9.9.2	Equal Area Normalization.....	296
9.9.3	Normalized Part Area Vector	299
9.9.4	Experimental Results	302
9.10	Conclusion	310
	References	311
10	Object-Based Image Retrieval System Using Rough Set Approach.....	315
	<i>Neveen I. Ghali, Wafaa G. Abd-Elmonim, Aboul Ella Hassanien</i>	
10.1	Introduction.....	315
10.2	Basic Concepts.....	316
10.2.1	Rough Sets: Short Description	316
10.2.2	Rough Image Processing.....	317
10.2.3	Image Retrieval Systems: Problem Definition and Categories	320
10.3	Object-Based Image Retrieval System	321
10.3.1	Pre-processing: Segmentation and Feature Extraction.....	322
10.3.2	Similarity and Retrieval System	323
10.4	Experimental Results and Discussion	325
10.5	Conclusion	327
	References	328
11	Paraconsistent Artificial Neural Networks and Delta, Theta, Alpha, and Beta Bands Detection	331
	<i>Jair Minoro Abe, Helder F.S. Lopes, Kazumi Nakamatsu</i>	
11.1	Introduction.....	331
11.2	Background.....	333
11.3	The Main Artificial Neural Cells	335
11.3.1	Paraconsistent Artificial Neural Cell of Analytic Connection – PANCac	336
11.3.2	Paraconsistent Artificial Neural Cell of Maximization– PANCmax.....	338

11.3.3	Paraconsistent Artificial Neural Cell of Minimization– PANCmin	339
11.3.4	Paraconsistent Artificial Neural Unit	340
11.3.5	Paraconsistent Artificial Neural System	340
11.4	PANN for Morphological Analysis	340
11.4.1	Data Preparation	340
11.4.2	The PANN Architecture	341
11.4.3	Expert System 1 – Checking the Number of Wave Peaks	344
11.4.4	Expert System 2 – Checking Similar Points	346
11.4.5	Expert System 3 – Checking Different Points	347
11.5	A Didactic Sample	348
11.6	Experimental Procedures – Attention-Deficit / Hyperactivity Disorder	351
11.7	Experimental Procedures – Applying in Alzheimer Disease	355
11.7.1	Expert system 1 – Detecting the Diminishing Average Frequency Level	358
11.7.2	Expert System 2 – High Frequency Band Concentration	359
11.7.3	Expert System 3 – Low Frequency Band Concentration	360
11.7.4	Results	360
11.8	Discussion	361
11.9	Conclusions	361
	References	362
12	Paraconsistent Artificial Neural Networks and Pattern Recognition: Speech Production Recognition and Cephalometric Analysis	365
	<i>Jair Minoro Abe, Kazumi Nakamatsu</i>	
12.1	Introduction	365
12.2	Background	367
12.3	The Paraconsistent Artificial Neural Cells – PANC	369
12.4	The Paraconsistent Artificial Neural Cell of Learning - PANC-L	370
12.5	Unlearning of a PANC-1	371
12.6	Using PANN in Speech Production Recognition	373
12.7	Practical Results	374
12.8	Cephalometric Variables	376
12.9	Architecture of the Paraconsistent Artificial Neural Network	377
12.10	Results	379
12.11	Discussion	380
12.12	Conclusions	381
