Foreword to the SAP Expert Knowledge Book Series 7

Acknowledgments 9

Introduction 19

How This Book Is Organized 19

1 Technical Implementation of Client/Server

Architecture in R/3 23

Client/Server Architecture in R/3 23

Distributed Presentation 24

Three-tier Architecture 25

Presentation 26

The Application Layer 26

Instance 26

The Database Layer 26

Network Technology 27

Internet Transaction Server 28

The Presentation Layer 28

SAPGUI 29

SAPLOGON 29

SAP Session Manager 29

Client 30

Default Clients 30

Default Users 31

Menu Bar 33

Button Bar 33

Transaction Code 35

Status Bar 35

Multilingual Capability 35

Component Manager 37

The Application Layer 38

Message Server 39

Dispatcher and Work Processes 39

Dialog Service 40

Background Service 40

Update Service 40

Spool Service 41

Enqueue Service 41

R/3 Transaction 41

Gateway Service 42

The Database Layer	44
Native SQL and Open SQL	44
Table Types	45
Example: Clusters	47
Availability	48
Network	49
The Operating System	51
Directory Structure	51
Users	53
UNIX	53
Questions	54

2

First Steps 57

Starting the Database and R/3 Instances	57
Windows NT	57
UNIX	58
Instances	59
Using Logs	59
Instance Profiles	62
Stopping the Database and R/3 Instances	63
Starting the Front End	64
Performing General Administration Tasks	65
Checking the Status	65
Monitoring the System	66
Checking the System Log	71
Sending System Messages	71
Using Lists	72
Using Table Maintenance Tools	72
Questions	73

3

The Online Service System 75

Security Issues	75
The SAProuter Connection	75
SAProuter and Saprountab	77
Establishing a Connection	78
Online Service System Functions	79
Messages	81
Service Connections	82
Notes	84
Questions	85

4	Installation Concepts	87
	Preparing for Installation	87
	Sizing	87
	Hardware Requirements	87
	Checklist	88
	Software Requirements	88
	RAID	90
	R3Setup	90
	UNIX	90
	Architecture of the Installation Tool	91
	Installation Procedures	92
	SAP Naming Conventions	94
	After Installation	99
	SAP License Key	99
	Installation Check	99
	Backing Up	100
	Performing a Language Import	100
	Questions	101

5	Setting Up a System Landscape	103
	Tasks of a System Landscape	103
	Two-System Landscapes	104
	Three-System Landscapes	104
	Multi-System Landscapes	105
	Technical Implementation	106
	Initialization	106
	Transport Domain and Transport Domain Controller (TDC)	106
	Virtual Systems	110
	External Systems	110
	Transport Group	112
	The Transport Control Program tp	112
	Transport Paths	114
	Editors	115
	System Change Options	121
	Changing SAP-Specific Objects	122
	RFC Connections	122
	Questions	126

6	Software Logistics 127
	Implementation Guide 127
	Tasks and Change Requests 129
	Customizing Requests 129
	Transportable Change Requests 129
	Local Change Request 130
	Request Number 130
	Customizing Organizer and Workbench Organizer 130
	Using the WBO 136
	Logs 144
	Transport Organizer 148
	Importing Transport Requests 148
	Sequence of the Import Queue 150
	Manual Use of the Transport Control Program tp 151
	Questions 152
 7	Client Administration 153
	Client Basics 153
	Understanding Clients 153
	Technical Implementation 154
	Standard Clients 154
	Standard Users 154
	Creating a Client 154
	Client Role 155
	Change Options 156
	Scope of the Changes 156
	Local Copy 159
	Data Profiles 159
	Using Remote Copy 164
	Client Transport 166
	Special Functions 170
	Tips 171
	Questions 171
 8	R/3 Users and Authorizations 173
	User Master Records 173
	Superusers 174
	User Addresses 174
	User Group 177
	Authorizations 177
	Authorizations and Authorization Objects 178

Authorization Profiles	180
Important Profiles in System Administration	184
The Profile Generator	185
Generating the Enterprise Menu	186
Copying the SAP Defaults to Customer Tables	188
Defining Activity Groups	190
Additional Functionality	199
Personal Settings	201
Internet Users	202
Questions	203

9	Background Processing	205
	Background Dialog Concepts	205
	Background Scheduler	205
	Event Scheduler	206
	System Events	206
	User Events	206
	Triggering Events	206
	sapevt	206
	Defining Jobs	207
	General Information	208
	Start Time	209
	Processing Steps	210
	Analyzing Jobs	213
	Analysis Functions	215
	Authorizations	216
	Maintenance Jobs	216
	Questions	218

10	Update Service	219
	Update Concepts	219
	V1 and V2 Updates	219
	Configuration of the Update	220
	Monitoring the Update Service	220
	Checking the Update Status	221
	Analyzing the Cause of a Termination	222
	Updating Specific Records	223
	Analyzing Errors	224
	Questions	225

	11	Output Configuration and Administration 227
		Output Basics 227
		Dedicated Spool Servers 228
		Processing Sequence 230
		Configuring the Landscape of Output Devices 230
		Logical Servers 231
		Classification 233
		Configuring Output Devices 233
		Access Methods 234
		Output Management Systems 236
		Administration Procedure 237
		Defining the Spool Servers 238
		Defining the External OMS 239
		Analyzing and Resolving Errors 242
		Using Authorizations 244
		Device Authorizations 244
		Display Authorizations 245
		Action Authorizations 245
		Questions 245
	12	Data Archiving 247
		What Is Archiving? 247
		Reasons for Archiving 247
		Archiving Requirements 247
		Archive Development Kit 247
		Hierarchical Storage Management 249
		Customizing 250
		Which Data? 250
		How Much Data? 250
		Where? 252
		Controlling and Analysis 255
		Questions 257
	13	Data Distribution and Transfer 259
		Application Link Enabling 259
		Technical Basics 259
		ALE Configuration 262
		First Steps 263
		Basic Settings 263
		Maintaining the Distribution Model 265
		Data-Specific Settings 266

Communication	267
Distributing Model Settings	270
Monitoring and Analysis	271
Data Transfer with Batch Input	275
Batch Input Sessions	275
Questions	279

14 Maintaining Instances 281

Maintaining Profiles	281
Importing Profiles	281
Copying Profiles	284
Maintaining Profiles	285
Maintaining an Instance Profile	287
Checking Up on Parameters	289
Operation Modes	290
Creating an Operation Mode	290
Registering Instances	291
Setting Operation Modes in the Timetable	295
The Control Panel	297
Logon Groups	298
Defining a Logon Group	299
Assigning an IP Address to the Application Server	300
Questions	301

15 System Monitoring 303

The Alert Monitor	303
Monitor Terminology	304
Customizing	306
Handling the Alert Monitors	312
Server and Process Overview	312
Server Overview	313
Process Overview	313
User Overview	315
Global Process Overview	316
System Log	316
Optimizing Performance	317
Performance Analysis Basics	318
Getting Started with Analysis	318
Database Administration	320
Weekly Planning	320
Monitoring Database Fill Level and Objects	322

	Lock Entries	323
	Runtime Errors	325
	Developer Traces	325
	SAP System Trace	326
	SQL Trace	326
	An Overview of Regular Tasks	327 *
	Questions	329
A	Transaction Codes	331
B	Profile Parameters	339
C	Glossary	345
D	Bibliography	351
E	Menu Structures	353
F	Questions and Answers	357
	Index	371
