

Contents

Introduction	1
------------------------	---

Chapter I

Neutral Atmospheres

I.1	Nomenclature	3
I.2	Barosphere: Distribution Laws	6
I.3	Thermosphere—Thermal Structure	17
I.4	Exosphere—Atmospheric Escape (Evaporation).	26
I.5	Physical Properties of Planetary Atmospheres	40

Chapter II

Sources of Ionization

II.1	Solar EUV Radiation and X-Rays	45
II.2	Corpuscular Radiation	57
II.3	Meteor Ionization.	62

Chapter III

Thermal Structure of Planetary Ionospheres

III.1	Departures from Thermal Equilibrium	67
III.2	Electron and Ion Temperatures	69
III.3	Heat Sources not Related to Photoionization	78

Chapter IV

Chemical Processes

IV.1	General Comments	82
IV.2	Recombination	84
IV.3	Charge Exchange Reactions	86
IV.4	Negative Ion Reactions	90
IV.5	Chemical Reactions and Airglow	93

Chapter V

Plasma Transport Processes

V.1	Plasma (Ambipolar) Diffusion	96
V.2	Plasma Drift and Winds	104
V.3	Plasma Escape	108

Chapter VI

Models of Planetary Ionospheres

VI.1	Equilibrium Models	113
VI.2	Observables and Derived Parameters	115
VI.3	Ionospheric Regions.	120
VI.4	Realistic Models of Planetary Ionospheres	122
VI.5	The Extent of Planetary Ionospheres.	123

Chapter VII

The Ionosphere as a Plasma

VII.1	General Plasma Properties	132
VII.2	The Ionosphere as a Dispersive Medium	134
VII.3	Ionospheric Plasma Instabilities	149

Chapter VIII

Experimental Techniques

VIII.1	Remote Sensing Radio Techniques	154
VIII.2	Direct Measurement Techniques	168

Chapter IX

Observed Properties of Planetary Ionospheres

IX.1	The Terrestrial Ionosphere	178
IX.2	The Ionosphere of Mars	194
IX.3	The Ionosphere of Venus.	198
IX.4	The Ionosphere of Jupiter	203

Appendix. Physical Data for the Planets and their Atmospheres	204
