

Table of Contents

1	Introduction	4
2	Extrusion Technology	5
2.1	The Solids Conveying Zone	10
2.2	The Melting Zone	16
2.3	Extruder Pumping Capability	19
2.4	Scaling	20
3	Useful Equations and Theory	22
4	Examples	29
4.1	Tadmor's Model for Melting in the Solids Conveying Zone.	29
4.2	Tadmor's Model for Constant Depth Channel	34
4.3	Characteristic Curve	35
4.4	Estimation of the Shear Rate in Single Screw Extruders	37
4.5	Determining Viscosity Constants from Curve	37
4.6	Estimation of Pressure Drop Using Viscosity Curve	39
4.7	Estimation of Theoretical Energy Consumption and Frozen Line Height (FLH)	40

5	Polymer Data	48
5.1	Polyolefins	48
5.2	Styrenics	60
5.3	Polycondensates	76
5.4	Vinyls	108
5.5	Other	116
6	Glossary	124
7	Further Reading	128
