1	Feature Local Binary Patterns	1
	<i>Jiayu Gu, Chengjun Liu</i>	
1.1	Introduction	1
1.2	Feature Local Binary Patterns	2
1.3	Feature Local Binary Patterns Form 1	6
1.4	Feature Local Binary Patterns Form 2	7
1.5	LBP with Relative Bias Thresholding for Feature Pixel Extraction	9
1.6	Conclusion	11
	References	11
2	New Color Features for Pattern Recognition	15
	<i>Chengjun Liu</i>	
2.1	Introduction	15
2.2	Innovative Color Features from the Primary and the Subtraction of the Primary Colors	17
2.3	A New Pattern Recognition Framework Using the Effective Color Features	19
2.4	A New Similarity Measure for the Proposed Pattern Recognition Framework	21
2.5	Experiments	23
2.6	Conclusions	32
	References	32
3	Gabor-DCT Features with Application to Face Recognition	35
	<i>Zhiming Liu, Chengjun Liu</i>	
3.1	Introduction	35
3.2	Background	37
3.3	Discriminative Color Facial Parts	38
3.4	Multiple Scale and Multiple Orientation Gabor Image Representation	39

3.5	The Gabor-DCT Features (GDF) Method	41
3.6	Experiments	43
3.6.1	Data Sets	43
3.6.2	Experiments on FRGC	44
3.6.3	Experiments on Multi-PIE	48
3.7	Conclusions	49
	References	49
4	Frequency and Color Fusion for Face Verification	53
	<i>Zhiming Liu, Chengjun Liu</i>	
4.1	Introduction	53
4.2	The Hybrid Color Space: R/Q	55
4.3	Multiple Frequency Feature Fusion for Face Representation	57
4.4	Feature Extraction Using an Improved Fisher Model	58
4.5	Experiments	59
4.5.1	FRGC Database	59
4.5.2	Effectiveness of the Hybrid Color Space	61
4.5.3	Multiple Frequency Feature Fusion for Face Verification	62
4.5.4	Multiple Spatial Feature Fusion for Face Verification	64
4.5.5	Illumination Normalization for Face Verification	65
4.6	Conclusion	69
	References	70
5	Mixture of Classifiers for Face Recognition across Pose	73
	<i>Chengjun Liu</i>	
5.1	Introduction	73
5.2	Background	74
5.3	Pose Classification	75
5.4	Face Recognition in a Pose Class	76
5.5	Face Recognition across Pose	78
5.6	Experiments of Face Recognition across Pose	80
5.6.1	The CMU PIE Database and Data Preparation	80
5.6.2	Experimental Results of Pose Classification	82
5.6.3	Experimental Results of Face Recognition in a Pose Class	84
5.6.4	Experimental Results of Face Recognition across Pose	88
5.7	Conclusions	91
	References	91
6	Wavelet Features for 3D Face Recognition	93
	<i>Peichung Shih, Chengjun Liu</i>	
6.1	Introduction	93
6.2	Convolution Filters	95
6.2.1	Gaussian Derivative Filter	95

6.2.2	Morlet Filter	98
6.2.3	Complex Morlet Filter	100
6.2.4	Complex Frequency B-Spline Filter	101
6.3	Face Recognition Algorithms	103
6.3.1	FRGC and the BEE Baseline Algorithm	105
6.3.2	Convolution Features and Decision Fusion	107
6.4	Experiments	107
6.5	Conclusion	113
	References	114
7	Minutiae-Based Fingerprint Matching	117
	<i>Raffaele Cappelli, Matteo Ferrara, Davide Maltoni</i>	
7.1	Introduction	117
7.2	Minutiae-Based Techniques	119
7.2.1	Problem Formulation	119
7.2.2	Similarity Score	120
7.2.3	Local Minutiae Matching	121
7.3	Minutia Cylinder-Code	123
7.3.1	The Local Descriptors	123
7.3.2	Global Score and Consolidation	133
7.3.3	Performance Evaluation of Local Minutia Descriptors ...	137
7.3.4	Performance Evaluation of Recent MCC Improvements	143
7.4	Conclusions	148
	References	149
8	Iris Segmentation: State of the Art and Innovative Methods	151
	<i>Ruggero Donida Labati, Angelo Genovese, Vincenzo Piuri, Fabio Scotti</i>	
8.1	Introduction	151
8.2	Segmentation of the Iris Pattern	153
8.3	Methods That Approximate the Iris Boundaries by Two Circumferences	156
8.4	Methods Based on A-Priori Models	160
8.5	Methods Based on the Analysis of Local Characteristics	161
8.6	Approaches Based on Active Contours	163
8.7	Hybrid and Incremental Methods	164
8.8	Other Methods	169
8.9	Reflections and Occlusions	171
8.10	Performance Evaluation	172
8.10.1	Techniques for Performance Evaluation	172
8.10.2	Public Datasets	174
8.10.3	Recent Results	175
8.11	Summary	177
	References	178

9	Various Discriminatory Features for Eye Detection	183
	<i>Shuo Chen, Chengjun Liu</i>	
9.1	Introduction	183
9.2	Image Representation Methods for Eye Detection	185
9.2.1	Grayscale and Color Images	185
9.2.2	Haar Wavelet Transformed Images	185
9.2.3	Histograms of Oriented Gradients (HOG)	187
9.2.4	Local Binary Patterns (LBP)	187
9.3	Discriminatory Feature Extraction (DFE)	189
9.4	Experiments	191
9.4.1	Database	192
9.4.2	Overview of Our Eye Detection Method	192
9.4.3	Results and Comparison	193
9.5	Conclusion	201
	References	201
10	LBP and Color Descriptors for Image Classification	205
	<i>Sugata Banerji, Abhishek Verma, Chengjun Liu</i>	
10.1	Introduction	205
10.2	Related Work	206
10.3	Color Spaces and the New Color LBP Descriptors	208
10.4	The EFM-NN Classifier	211
10.5	Experiments	213
10.5.1	Datasets and Experimental Methodology	213
10.5.2	Evaluation of Novel Color Descriptors and EFM-Nearest Neighbor Classifier on the MIT Scene Dataset	216
10.5.3	Evaluation of the Color LBP Descriptors and EFM-Nearest Neighbor Classifier on the KTH-TIPS2-b and the KTH-TIPS Datasets	219
10.6	Conclusion	222
	References	222
