

Contents

1 General Considerations	1
2 Historical Origins of Embryology	3
3 Genetics	7
4 Vascularization of the Spinal Cord and Variations in Myelitic Blood Flow	9
5 Case Reports	15
6 Clinical Symptoms	23
6.1 Regionally Localized Pain	23
6.2 Sensory Radicular Symptoms	28
6.3 Cervical Root Syndrome	31
6.4 Dorsal Root Syndrome	32
6.5 Lumbar Root Syndrome	37
6.6 Sensory Cord Syndrome	37
6.7 Motor Cord Syndrome	37
6.8 Brown-Sequard Syndrome	38
6.9 Clinical Signs in the Development of Meningiomas	39
6.9.1 Cervical Tract	39
6.9.2 Dorsal Tract	40
6.9.3 Lumbar Tract	44
6.10 Differential Diagnosis	44
6.11 Causes of Diagnostic Error and Delay	46
6.12 Supra- and Sublesional Symptoms	50
6.13 Von Recklinghausen's Disease	51
6.14 Rare Cases	56
6.15 Conclusions	66

7 Neurophysiopathology	69
7.1 Evoked Potentials	69
7.2 Somatosensory and Motor Evoked Potentials	69
7.3 Intraoperative Neurophysiological Monitoring	70
7.4 Materials, Methods, Case Reports	70
7.5 Results, Discussion, Conclusions	80
8 Neuroradiology	83
8.1 Bone Alterations from Compression of the Meningioma on the Vertebral Sac	83
8.1.1 Modification of a Single Pedicle	86
8.1.2 Bilateral Peduncular Alterations	88
8.1.3 Morphological Alterations in the Vertebral Body	91
8.2 Calcifying Features of a Meningioma	100
8.3 Neuroradiological Diagnostic Examinations	111
8.3.1 Myelography	111
8.3.2 Computed Tomography	117
8.3.3 Myelo-Computed Tomography	119
8.3.4 Magnetic Resonance Imaging	129
8.3.5 Angiography	143
8.4 Conclusions	143
9 Surgical Techniques	147
9.1 Microscopic Features and Variations in the Relationship with the Spinal Dura and Leptomeningeal and Myeloradicular Structures	147
9.2 Neighbouring Relationships with the Leptomeninges	147
9.3 Position of the Patient	148
9.4 Laminectomy, Lamina-arthrectomy with Foraminotomy	149
9.5 Deformations of the Spinal Dura as Seen in the Operative Microscope	150
9.6 Microsurgical Splitting of the Dura and Variations in Dural Incisions	156
9.7 Opening the Arachnoid	168
9.8 Radicotomy	171
9.9 Modes of Excision	171
9.10 Complications and Follow-Up	189
9.11 Conclusions	190
10 Other Anatomical-Clinical Observations	193
