

Table of Contents

I Invited Papers

Optimizing Two-Level Preconditionings for the Conjugate Gradient Method	3
<i>O. Axelsson and I. Kaporin</i>	
On the Parallelization of the Sparse Grid Approach for Data Mining	22
<i>J. Garcke and M. Griebel</i>	
Java Communications for Large-Scale Parallel Computing	33
<i>V. Getov and M. Philippsen</i>	
Continuous Path Brownian Trajectories for Diffusion Monte Carlo via First- and Last-Passage Distributions	46
<i>J.A. Given, M. Mascagni, and Ch.-O. Hwang</i>	
Multilevel Monte Carlo Methods	58
<i>S. Heinrich</i>	
Iterative Aggregation/Disaggregation Methods for Computing Some Characteristics of Markov Chains	68
<i>I. Marek and P. Mayer</i>	
Time-Integration Algorithms for the Computer Treatment of the Horizontal Advection in Air Pollution Models	81
<i>Z. Zlatev</i>	

II Robust Preconditioning Algorithms

MIC(0) Preconditioning of Rotated Trilinear FEM Elliptic Systems	95
<i>I. Georgiev and S. Margenov</i>	
Sobolev Space Preconditioning for Mixed Nonlinear Elliptic Boundary Value Problems	104
<i>J. Karátson and I. Faragó</i>	
On a Schur Complement Approach for Solving Two-Level Finite Element Systems	113
<i>M. Neytcheva and O. Axelsson</i>	

III Monte Carlo Methods

On-Line State Estimation of Maneuvering Objects by Sequential Monte Carlo Algorithm	125
<i>D. Angelova, E. Semerdjiev, Tz. Semerdjiev, and P. Konstantinova</i>	
On the Dyadic Diaphony of the Sobol' Sequences	133
<i>E.I. Atanassov</i>	
An Improved Monte Carlo Algorithm for Elastic Electron Backscattering from Surfaces	141
<i>I.T. Dimov, E.I. Atanassov, and M.K. Durchova</i>	
Statistical Algorithms for Simulation of Electron Quantum Kinetics in Semiconductors – Part I	149
<i>T.V. Gurov and P.A. Whitlock</i>	
A Quasi-Monte Carlo Method for Integration with Improved Convergence	158
<i>A. Karaivanova, I. Dimov, and S. Ivanovska</i>	
Solving Systems of Linear Algebraic Equations Using Quasirandom Numbers	166
<i>A. Karaivanova and R. Georgieva</i>	
Monte Carlo Analysis of the Small-Signal Response of Charge Carriers . . .	175
<i>H. Kosina, M. Nedjalkov, and S. Selberherr</i>	
Statistical Algorithms for Simulation of Electron Quantum Kinetics in Semiconductors - Part II	183
<i>M. Nedjalkov, T.V. Gurov, H. Kosina, and P.A. Whitlock</i>	

**IV Advanced Programming Environments
for Scientific Computations**

IC2D: Interactive Control and Debugging of Distribution	193
<i>F. Baude, A. Bergel, D. Caromel, F. Huet, O. Nano, and J. Vayssière</i>	
JaMake: A Java Compiler Environment	201
<i>Z. Budimlić and K. Kennedy</i>	
Program Development Environment for OpenMP Programs on ccNUMA Architectures	210
<i>B. Chapman, O. Hernandez, A. Patil, and A. Prabhakar</i>	
Global Computing Systems	218
<i>C. Germain, G. Fedak, V. Néri, and F. Cappello</i>	

Java for Large-Scale Scientific Computations?	228
<i>A. Krall and Ph. Tomsich</i>	
Java for Scientific Computation: Prospects and Problems	236
<i>H.J. Sips and K. van Reeuwijk</i>	

V Large-Scale Computations in Air Pollution Modelling

Object-Oriented Framework for Large Scale Air Pollution Modeling	247
<i>A. Antonov</i>	
Evaluation and Reliability of Meso-scale Air Pollution Simulations	255
<i>A. Ebel</i>	
The Mathematical Background of Operator Splitting and the Effect of Non-commutativity	264
<i>I. Faragó and Á. Havasi</i>	
Fine-Grid Resolution in Danish Eulerian Model and an Implementation on SGI Origin 2000 Computer	272
<i>K. Georgiev and Z. Zlatev</i>	
Modelling Framework for Atmospheric Mercury over the Mediterranean Region: Model Development and Applications	281
<i>G. Kallos, A. Voudouri, I. Pytharoulis, and O. Kakaliagou</i>	
Iterative Load Balancing Schemes for Air Pollution Models	291
<i>G. Karagiorgos and N.M. Missirlis</i>	
Computational Aspects of Air Quality Modelling in Urban Regions Using an Optimal Resolution Approach (AURORA)	299
<i>C. Mensink, K. De Ridder, N. Lewyckyj, L. Delobbe, L. Janssen, and Ph. Van Haver</i>	
Parallel Implementation of a Large-Scale 3-D Air Pollution Model	309
<i>Tz. Ostromsky and Z. Zlatev</i>	
Long-Term Estimates of Sulfur Deposition in the Region of Southeastern Europe	317
<i>D. Syrakov, M. Prodanova, Ch. Zerefos, K. Ganev, and N. Miloshev</i>	
Computationally Efficient Atmospheric Chemical Kinetic Modeling by Means of High Dimensional Model Representation (HDMR)	326
<i>S.W. Wang, P.G. Georgopoulos, G. Li, and H. Rabitz</i>	

VI Large-Scale Computations for Mechanical Engineering Problems

Computer Simulation of the Air Flow and the Distribution of Combustion Generated Pollutants around Buildings	337
<i>J.A. Denev, D.G. Markov, and P. Stankov</i>	
On Multigrid Methods for the Compressible Navier-Stokes Equations	344
<i>D. Drikakis, O. Iliev, and D. Vassileva</i>	
Structural Optimization of Biomorphic Microcellular Ceramics by Homogenization Approach	353
<i>R.H.W. Hoppe and S.I. Petrova</i>	
Multigrid – Adaptive Local Refinement Solver for Incompressible Flows ...	361
<i>O. Iliev and D. Stoyanov</i>	
Handling Systems From Non-linear Theory of Elasticity	369
<i>D. Langemann</i>	
Numerical Modelling of the Flow in Magnetic Liquid Seals	378
<i>T. Mitkova and L. Tobiska</i>	
Dynamic Mesh Schemes for Fluid–Structure Interaction	387
<i>R. Sieber and M. Schäfer</i>	

VII Numerical Methods for Incompressible Flow

Boundary Integral Method for 3D Simulation of Foam Dynamics	401
<i>I.B. Bazhlekov, F.N. van de Vosse, and H.E.H. Meijer</i>	
A Lagrange Multipliers/Fictitious Domain Approach for Particulate Flow	409
<i>C. Diaz-Goano, P. Minev, and K. Nandakumar</i>	
Primal vs. Dual Variable Approach for Mixed-Hybrid Finite Element Approximation of the Potential Fluid Flow Problem in Porous Media	417
<i>J. Maryška, M. Rozložník, and M. Tůma</i>	
Wave Evolution of Heated Falling Films. Numerical Analysis Using Finite-Difference Method	425
<i>S. Miladinova</i>	
Picard-Uzawa Schemes: Errors, Convergence and Stopping Criterion	433
<i>L.W. Vijfvinkel</i>	

VIII Contributed Papers

Finite Element Method for Plates with Dynamic Loads	445
<i>A.B. Andreev, J.T. Maximov, and M.R. Racheva</i>	
MPI Parallel Implementation of a Fast Separable Solver	454
<i>G. Bencheva</i>	
A Comparison of Subspace Methods for Sylvester Equations	462
<i>J. Brandts</i>	
Studying the Performance Nonlinear Systems Solvers Applied to the Random Vibration Test	471
<i>D. Dent, M. Paprzycki, A. Kucaba-Piętal, and L. Laudański</i>	
Parameter Identification in a Two-Dimensional Parabolic Equation Using an ADI Based Solver	479
<i>G. Dimitriu</i>	
Numerical Simulation of a Model for Transport and Reaction of Radionuclides	487
<i>J. Geiser</i>	
Author Index	497
