Part I Indiscernibility Relation Based Rough Sets

Chapter 1 Indiscernibility Relation, Rough Sets and Information System	3
1.1 Pawlak's Rough Approximation	3
1.1.1 Rough Set	3
1.1.2 Uncertainty Measurements and Knowledge Granulation	7
1.1.3 Knowledge Reductions	10
1.1.4 Knowledge Dependency	12
1.2 Variable Precision Rough Set	13
1.2.1 Inclusion Error and Variable Precision Rough Set	13
1.2.2 Several Reducts in Variable Precision Rough Set	14
1.3 Multigranulation Rough Set	16
1.3.1 Optimistic Multigranulation Rough Set	16
1.3.2 Pessimistic Multigranulation Rough Set	20
1.3.3 Multigranulation Rough Memberships	23
1.4 Hierarchical Structures on Multigranulation Spaces	24
1.4.1 Definitions of Three Hierarchical Structures	25
1.4.2 Relationships Between Hierarchical Structures and Multigranulation Rough Sets	28
1.5 Information System	33
1.5.1 Information System and Rough Set	33
1.5.2 Rough Sets in Multiple-source Information Systems	34
1.5.3 Several Reducts in Decision System	35
1.6 Conclusions	38
References	39

Part II Incomplete Information Systems and Rough Sets

Chapter 2 Expansions of Rough Sets in Incomplete Information Systems	45
2.1 Tolerance Relation Based Rough Set Approach	46
2.1.1 Tolerance Relation and Its Reducts	46
2.1.2 Tolerance Relation Based Rough Set and Generalized Decision Reduct	49
2.2 Valued Tolerance Relation Based Rough Set Approach	54
2.2.1 Valued Tolerance Relation	54
2.2.2 Valued Tolerance Relation Based Fuzzy Rough Set	55
2.3 Maximal Consistent Block Based Rough Set Approach	56
2.3.1 Maximal Consistent Block and Its Reducts	56
2.3.2 Maximal Consistent Block Based Rough Set and Approximate	

	Distribution Reducts	59
2.4	Descriptor Based Rough Set	63
2.4.1	Descriptor and Reduct Descriptor	63
2.4.2	Descriptor Based Rough Set and Generalized Decision Reduct of Descriptor	66
2.5	Similarity Relation Based Rough Set Approach	70
2.5.1	Similarity Relation and Similarity Based Rough Set	70
2.5.2	Approximate Distribution Reducts in Similarity Relation Based Rough Set	73
2.6	Difference Relation Based Rough Set Approach	77
2.6.1	Difference Relation and Its Reducts	77
2.6.2	Rough Set Based on Difference Relation	81
2.6.3	Approximate Distribution Reducts in Difference Relation Based Rough Set	85
2.7	Limited Tolerance Relation Based Rough Set Approach	89
2.7.1	Limited Tolerance Relation	89
2.7.2	Limited Tolerance Relation Based Rough Set	90
2.8	Characteristic Relation Based Rough Set Approach	92
2.8.1	Characteristic Relation and Characteristic Relation Based Rough Set	92
2.8.2	Approximate Distribution Reducts in Characteristic Relation Based Rough Set	94
2.9	Conclusions	97
	References	97
Chapter 3 Neighborhood System and Rough Set in Incomplete Information System		101
3.1	Neighborhood System	101
3.1.1	From Granular Computing to Neighborhood System	101
3.1.2	Binary Neighborhood System	104
3.1.3	Covering and Neighborhood System	104
3.1.4	Fuzzy Neighborhood System	106
3.1.5	Neighborhood System and Topological Space	107
3.1.6	Knowledge Operation in Neighborhood System	108
3.2	Neighborhood System and Rough Approximations	112
3.2.1	Neighborhood System Based Rough Sets	112
3.2.2	Relationship Between Neighborhood System Based Rough Set and VPRS	113
3.2.3	Neighborhood System Based Rough Approximations in Incomplete Information System	115
3.3	Reducts Neighborhood Systems	118
3.3.1	Reducts Neighborhood Systems in Incomplete Information System	118
3.3.2	Neighborhood Systems Based Approximate Distribution Reducts	123
3.4	Conclusions	129
	References	129

Part III Dominance-based Rough Sets and Incomplete Information Systems

Chapter 4 Dominance-based Rough Sets in “*” Incomplete Information System	133
4.1 Dominance-based Rough Set	134
4.2 Expanded Dominance-based Rough Set in Incomplete Information System with “*” Unknown Values	136
4.3 Valued Dominance-based Fuzzy Rough Set Approach	141
4.3.1 Valued Dominance Relation	141
4.3.2 Fuzzy Rough Approximations	143
4.3.3 Extraction of Decision Rules	146
4.4 \uparrow and \downarrow Descriptors and Certain Rules	148
4.4.1 Definition of \uparrow and \downarrow Descriptors	149
4.4.2 Reduct of \uparrow and \downarrow Descriptors	151
4.4.3 \uparrow and \downarrow Certain Rules	154
4.4.4 Optimal \uparrow and \downarrow Certain Rules	155
4.4.5 An Illustrative Example	157
4.5 Limited Dominance-based Rough Set Approach	161
4.5.1 Limited Dominance-based Rough Set	161
4.5.2 Comparisons Between Expanded and Limited Dominance-based Rough Sets	163
4.6 Conclusions	166
References	166
Chapter 5 Dominance-based Rough Sets in “?” Incomplete Information System	169
5.1 Similarity Dominance Relation	170
5.1.1 Definition of Similarity Dominance Relation	170
5.1.2 Reducts of Similarity Dominance Relations	171
5.2 Similarity Dominance-based Rough Set and Approximate Distribution Reducts	174
5.2.1 Similarity Dominance-based Rough Set	174
5.2.2 Approximate Distribute Reducts in Similarity Dominance-based Rough Set	176
5.3 Similarity Dominance-based Rough Sets in Fuzzy Decision System	184
5.3.1 Similarity Dominance-based Rough Fuzzy Set	184
5.3.2 Relative Approximate Distribution Reducts of Similarity Dominance-based Rough Fuzzy Set	187
5.4 Conclusions	190
References	191

Part IV Incomplete Information Systems and Multigranulation Rough Sets

Chapter 6 Multigranulation Rough Sets in Incomplete Information System	195
6.1 Tolerance Relations Based Multigranulation Rough Sets	195

6.1.1	Optimistic and Pessimistic Tolerance Relations Based Multigranulation Rough Sets	195
6.1.2	Properties of Multigranulation Rough Sets Based on Tolerance Relations	199
6.1.3	Comparisons Among Several Rough Sets	201
6.1.4	Approximation Distribution Reducts in Tolerance Relations Based Multigranulation Rough Sets	202
6.2	Similarity Relations Based Multigranulation Rough Sets	209
6.2.1	Optimistic and Pessimistic Similarity Relations Based Multigranulation Rough Sets	209
6.2.2	Properties of Multigranulation Rough Sets Based on Similarity Relations	212
6.2.3	Comparisons Among Several Rough Sets	212
6.2.4	Approximate Distribution Reducts in Similarity Relations Based Multigranulation Rough Sets	214
6.3	Conclusions	221
	References	222
	Glossary	223
	Index	227
