

Contents

1	Introduction	1
1.1	Scope and Purpose of Book	1
1.2	Data Sources	2
2	Historical Background	5
2.1	Introduction	5
2.2	Early Developments in the Study of Fluvial Sediments	5
2.2.1	From the Ancient Greeks to Playfair	5
2.2.2	From Lyell to Davis	8
2.3	Growth of Present-Day Concepts, up to 1977	13
2.3.1	Increasing Specialization of the Twentieth Century	13
2.3.2	Descriptive Fluvial Geomorphology	13
2.3.3	Quantitative Fluvial Geomorphology	16
2.3.4	Sediment Transport and Textural Studies	17
2.3.5	Bedforms and Paleocurrents	19
2.3.6	Fluvial Facies Models	22
2.3.6.1	From Hobbs to Fisk	22
2.3.6.2	Meandering River Deposits: Development of Modern Facies Model Concepts	26
2.3.6.3	Braided Rivers	30
2.3.6.4	Alluvial Fans	31
2.3.6.5	Other Facies Models	32
2.3.7	Fluvial Architecture	34
2.3.8	Paleohydraulics	35
2.4	Growth of Present-Day Concepts, 1978–1988	37
2.4.1	Bedforms and Sedimentary Structures	37
2.4.2	The Decline and Fall of the Vertical Profile	38
2.4.3	Fluvial Architecture	42
2.4.3.1	Architectural Scale and the Bounding-Surface Concept	42
2.4.3.2	Alluvial Basin Architecture	45
2.4.4	Fluvial Styles	47
2.4.4.1	High-Sinuosity Rivers	49
2.4.4.2	Low-Sinuosity Rivers	50
2.4.4.3	Anastomosed Rivers	52
2.4.4.4	Ephemeral Rivers	54
2.4.4.5	Large Rivers	54
2.4.4.6	Floodplain Environments	54
2.5	Conclusions	55

3	Concepts of Scale	57
3.1	Time Scales and Physical Scales in Sedimentation	57
3.2	The Grouping of Architectural Units in Clastic Rocks According to Depositional Time Scale	60
3.3	Definition of Sediment Groups by Bounding Surfaces	69
3.4	Sedimentation Rate and Its Relation to Depositional Recurrence Interval	71
3.5	Application of Scale Concepts to Basin Analysis and Petroleum Geology	74
4	Methods of Architectural-Element Analysis	75
4.1	Introduction	75
4.2	Construction of Outcrop Profiles	75
4.3	Classification of Lithofacies	77
4.4	Principles of Paleocurrent Analysis	78
4.5	Classification of Bounding Surfaces	81
4.6	Classification of Architectural Elements	89
4.7	Classification of Channels and Larger Bodies	94
4.8	Annotation of Outcrop Profiles	95
4.9	Summary of Methods	98
5	Lithofacies	99
5.1	Introduction	99
5.2	Gravel Facies	99
5.2.1	Depositional Processes in Gravel-Bed Rivers	99
5.2.1.1	Introduction	99
5.2.1.2	Traction Currents, Fluid Flows	99
5.2.1.3	Sediment Gravity Flows	105
5.2.2	Gravel Lithofacies	106
5.3	Sand Facies	109
5.3.1	Sand Bedform Genesis and Classification	109
5.3.2	Sand Lithofacies	112
5.4	Fine-Grained Clastic Facies	123
5.5	Nonclastic Facies	127
5.6	Associated Facies	130
6	Architectural Elements Formed Within Channels	131
6.1	Introduction	131
6.2	Channels (Element CH)	131
6.3	Gravel Bars and Bedforms (Element GB)	139
6.4	Sediment-Gravity-Flow Deposits (Element SG)	145
6.5	Sandy Bedforms (Element SB)	146
6.6	Downstream-Accretion Macroforms (Element DA)	151
6.7	Lateral-Accretion Deposits (Element LA)	155
6.8	Laminated Sand Sheets (Element LS)	163
6.9	Hollows (Element HO)	163
7	Architectural Elements of the Overbank Environment	169
7.1	Introduction	169
7.2	Levee and Crevasse Deposits	172
7.2.1	Levee Deposits (Element LV)	172
7.2.2	Crevasse-Channel Deposits (Element CR)	173

Contents	XIII
7.2.3 Crevasse-Splay Deposits (Element CS)	174
7.3 Fine-Grained Clastic Deposits	176
7.3.1 Floodplain Fines (Element FF)	177
7.3.2 Abandoned Channel Fills (Element FF(CH))	177
7.4 Biochemical Sediments	178
7.4.1 Coal	179
7.4.2 Paleosols	183
7.4.3 Evaporites	190
8 Fluvial Styles and Facies Models	191
8.1 Controls on Channel Style	191
8.2 Facies Models	198
8.2.1 Gravel-Bed Braided River with Sediment-Gravity-Flow Deposits	206
8.2.2 Shallow, Gravel-Bed Braided River	208
8.2.3 Deep, Gravel-Bed Braided River	209
8.2.4 Gravel-Bed, Wandering River	211
8.2.5 Gravel-Bed, Meandering River	212
8.2.6 Gravel-Sand Meandering River	215
8.2.7 Sand-Bed Meandering River	217
8.2.8 Ephemeral, Sand-Bed Meandering River	219
8.2.9 Fine-Grained Meandering River	222
8.2.10 Anastomosed River	229
8.2.11 Low-Sinuosity River, with Alternate Bars	233
8.2.12 Shallow, Perennial, Sand-Bed Braided River	234
8.2.13 Deep, Perennial, Sand-Bed Braided River	235
8.2.14 High-Energy, Sand-Bed Braided River	238
8.2.15 Distal, Sheetflood, Sand-Bed River	240
8.2.16 Flashy, Ephemeral, Sheetflood, Sand-Bed River	243
8.3 Alluvial Fans and Other Fluvial Distributary Systems	245
9 The Stratigraphic Architecture of Fluvial Depositional Systems	251
9.1 Introduction	251
9.2 Channel Belts	251
9.3 Depositional Systems	261
9.4 Basin-fill Complexes	265
9.5 Methods of Correlation and Mapping	272
9.5.1 The Use of Marker Beds	272
9.5.2 Wireline Logs	273
9.5.3 Lithofacies Mapping	276
9.5.4 Seismic Methods	283
9.5.5 Ground-Penetrating Radar	292
9.5.6 Magnetostratigraphy	293
9.5.7 Paleocurrent Analysis	293
9.5.8 The Dipmeter	298
9.5.9 Surveillance Geology	302
9.6 Stratigraphic Nomenclature	306
10 Fluvial Depositional Systems and Autogenic Sedimentary Controls ...	311
10.1 Introduction	311
10.2 The Evolution of Distributary Fluvial Systems	311
10.3 Avulsion in Fluvial Systems and Its Effect on Alluvial Stratigraphy	317

10.3.1	The Development of Meander Belts	318
10.3.2	Avulsion in Braided Fluvial Systems	322
10.3.3	Avulsion in Anastomosed Fluvial Systems	325
10.4	Quantitative Studies of Alluvial Architecture	327
10.4.1	The Dimensions of Fluvial Sand Bodies	328
10.4.2	Estimating Probabilities of Sand Body Penetration and Interconnectedness in the Subsurface	334
10.4.3	Alluvial Stratigraphy Models	337
11	Tectonic Control of Fluvial Sedimentation	343
11.1	Introduction	343
11.2	Tectonic Control of Alluvial Stratigraphy	343
11.2.1	The Effects of Syndepositional Fault and Fold Movements	344
11.2.1.1	The Effects of Basin-Margin Faulting	344
11.2.1.2	The Effects of Faulting and Folding Within Basins	348
11.2.2	Base-Level Changes	352
11.3	Tectonic Control of Basin Style and Basin-Scale Fluvial Patterns	362
11.3.1	Big Rivers	362
11.3.2	Axial and Transverse Drainage	364
11.3.3	Regional Tectonic Control Revealed by Basin Analysis	365
11.3.4	Tectonism and Sediment Supply	367
11.3.5	Intraplate Stress	370
11.3.6	Quantitative Models of Sediment Supply, Transfer, and Accumulation	372
11.4	Plate-Tectonic Setting of Alluvial Basins	376
11.4.1	Basin Classification	376
11.4.2	Extensional Basins	377
11.4.2.1	Rift Basins	379
11.4.2.2	Continental-margin Basins	381
11.4.2.3	Failed Rifts and Aulacogens	382
11.4.3	Convergent-margin Basins	386
11.4.3.1	Forearc Basins	386
11.4.3.2	Backarc Basins	386
11.4.3.3	Retroarc (Foreland) Basins	387
11.4.4	Basins Formed Along Strike-Slip Faults	393
11.4.4.1	Basins Associated with Intracontinental Transform Faults	393
11.4.4.2	Basins Associated with Divergent Plate Boundaries	394
11.4.5	Basins Related to Plate Collision	395
11.4.5.1	Peripheral Foreland Basins	397
11.4.5.2	Hinterland Basins	400
11.4.6	Structural and Stratigraphic Patterns Common to Foreland Basins	402
11.4.7	Sedimentary Basins and Allochthonous Terranes	409
11.4.8	Cratonic Basins	412
11.5	Basic Paleogeographic Models for Nonmarine Basins	412
12	What Does Fluvial Lithofacies Reveal About Climate?	421
12.1	Introduction	421
12.2	Climatic Variables	422
12.3	Distinguishing Tectonic from Climatic Control	423
12.4	Review of Climatic Criteria	425
12.5	Conglomerates: The Significance of Texture and Petrology	425

12.5.1	Mass-flow Versus Traction-current Processes	425
12.5.1.1	Arid Climates	428
12.5.1.2	Temperate-Humid Climates	430
12.5.1.3	Tropical-Humid Climates	430
12.5.1.4	Boreal-Paraglacial Climates	431
12.5.1.5	Summary and Conclusions	431
12.5.2	The Influence of Climate on Texture and Composition of Gravels	432
12.6	Sandstones: The Significance of Sand Body Architecture and Sedimentary Structures	433
12.6.1	Fluvial Style in Sand-bed Rivers	433
12.6.2	Sand Body Architecture	434
12.6.3	Bedforms and Cycles	436
12.7	Overbank Fines: The Significance of Bedding and Minor Sedimentary Structures	437
12.8	The Significance of Color	439
12.9	Associated Clastic, Chemical, and Biochemical Sediments	439
12.9.1	Coal	439
12.9.2	Paleosols	440
12.9.3	Evaporites	441
12.9.4	Eolian Interbeds	441
12.9.5	Palustrine Limestones	442
12.10	Contrasting Climatic Indicators	442
12.11	The Interrelationship Between Tectonics and Climate	443
12.12	Orbital Forcing	444
12.12.1	Sedimentary Evidence of Orbital Forcing	444
12.12.2	Fluvial Response to the Late Cenozoic Glaciations	447
12.12.3	Conclusions	450
12.13	Discussion	450
13	Sequence Stratigraphy	453
13.1	Introduction	453
13.2	Accommodation Space	456
13.3	Main Components of the Fluvial Sequence Model	459
13.3.1	Sequence Boundary	459
13.3.2	Lowstand Systems Tract	466
13.3.3	Transgressive Systems Tract	471
13.3.4	Equivalent of Maximum Flooding Surface	474
13.3.5	Highstand Systems Tract	474
13.3.6	Falling-stage Systems Tract	475
13.4	Time Scales of Nonmarine Sequences and Their Causes	475
13.4.1	First-order Cycles	476
13.4.2	Second-order Cycles	476
13.4.3	Third-order Cycles	477
13.4.4	Fourth- and Fifth-order Cycles	477
13.5	Discussion	477
14	Stratigraphic and Tectonic Controls on the Distribution and Architecture of Fluvial Oil and Gas Reservoirs	479
14.1	Introduction	479
14.2	The Geometry of Fluvial Reservoirs	480
14.2.1	Geometry and Origin of Depositional Systems	480

14.2.1.1	Clastic Wedges	480
14.2.1.2	Paleovalley Fills	482
14.2.2	Geometry of Reservoir Bodies	484
14.2.2.1	Sheet Sandstones	484
14.2.2.2	Sandstone Ribbons and Lenses	484
14.2.2.3	Stratigraphic Variations in Reservoir Geometry	485
14.3	Tectonic Setting of Fluvial Reservoirs	486
14.3.1	Retroarc (Backarc) Foreland Basins	486
14.3.2	Backarc Basins	486
14.3.3	Forearc Basins	486
14.3.4	Collision-Related Basins	486
14.3.5	Basins in Continental-Transform Settings	487
14.3.6	Rift Basins	487
14.3.7	Basins on Extensional Continental Margins	487
14.3.8	Intracratonic Basins	487
14.4	Styles of Fluvial Reservoir	489
14.4.1	Paleovalley Bodies (PV Type)	490
14.4.2	Sheet Bodies (SH Type)	491
14.4.3	Channel-and-Bar Bodies (CB Type)	492
14.5	Conclusions	494
15	Case Studies of Oil and Gas Fields in Fluvial Reservoirs	495
15.1	Introduction	495
15.2	Paleovalley Fields (PV Type)	495
15.2.1	Little Bow Area, Alberta	495
15.2.2	Cut Bank Sandstone, Montana	501
15.2.3	Zenith Field, Colorado	502
15.2.4	South Ceres Field, Oklahoma	506
15.3	Sheet Reservoirs (SH Type)	506
15.3.1	Prudhoe Bay Field, Alaska	506
15.3.2	Messla Field, Libya	509
15.3.3	Statfjord Field, North Sea	511
15.4	Channel-and-Bar Reservoirs (CB Type)	513
15.4.1	Little Creek Field, Mississippi	513
15.4.2	Daqing Field, China	515
15.4.3	Red Wash Field, Utah	519
16	Future Research Trends	523
	References	525
	Author Index	567
	Subject Index	575
