

Table of Contents

Virtual Colonoscopy and CAD

Inverse Consistency Error in the Registration of Prone and Supine Images in CT Colonography	1
<i>Holger R. Roth, Thomas E. Hampshire, Jamie R. McClelland, Mingxing Hu, Darren J. Boone, Greg G. Slabaugh, Steve Halligan, and David J. Hawkes</i>	
Dual-Energy Electronic Cleansing for Artifact-Free Visualization of the Colon in Fecal-Tagging CT Colonography	8
<i>Wenli Cai, June-Goo Lee, Se Hyung Kim, and Hiroyuki Yoshida</i>	
Computer-Aided Polyp Detection for Laxative-Free CT Colonography	18
<i>Neil Panjwani, Marius George Linguraru, Joel G. Fletcher, and Ronald M. Summers</i>	
Comparative Performance of Random Forest and Support Vector Machine Classifiers for Detection of Colorectal Lesions in CT Colonography	27
<i>Janne J. Näppi, Daniele Regge, and Hiroyuki Yoshida</i>	
Image-Enhanced Capsule Endoscopy Preserving the Original Color Tones	35
<i>Hai Vu, Tomio Echigo, Keiko Yagi, Hirotoshi Okazaki, Yasuhiro Fujiwara, Yasushi Yagi, and Tetsuo Arakawa</i>	
3D Non-rigid Motion Correction of Free-Breathing Abdominal DCE-MRI Data	44
<i>Zhang Li, Matthan W.A. Caan, Manon L. Ziech, Japp Stoker, Lucas J. van Vliet, and Frans M. Vos</i>	
Segmentation of Liver Tumor Using Efficient Global Optimal Tree Metrics Graph Cuts	51
<i>Ruogu Fang, Ramin Zabih, Ashish Raj, and Tsuhan Chen</i>	
Ensemble Detection of Colorectal Lesions for CT Colonography	60
<i>Janne J. Näppi, Daniele Regge, and Hiroyuki Yoshida</i>	
Automated Detection of Colorectal Lesions in Non-cathartic CT Colonography	68
<i>Janne J. Näppi, Stefan Gryspeerdt, Philippe Lefere, Michael Zalis, and Hiroyuki Yoshida</i>	

Integration of Valley Orientation Distribution for Polyp Region Identification in Colonoscopy	76
<i>Jorge Bernal, Javier Sánchez, and Fernando Vilarinho</i>	
Automated Detection and Diagnosis of Crohn's Disease in CT Enterography	84
<i>Janne J. Näppi, Dushyant V. Sahani, Joel G. Fletcher, and Hiroyuki Yoshida</i>	
Quantitative Evaluation of Lumbar Disc Herniation Based on MRI Image	91
<i>Hongtao Jiang, Wei Qi, Qimei Liao, Haitao Zhao, Wei Lei, Li Guo, and Hongbing Lu</i>	
Liver Tumor Segmentation Using Kernel-Based FGCM and PGCM	99
<i>Rajeswari Mandava, Lee Song Yeow, Bhavik Anil Chandra, Ong Kok Haur, Muhammad Fermi Pasha, and Ibrahim Lutfi Shuaib</i>	
Abdominal Intervention	
Improving Diagnosis and Intervention: A Complete Approach for Registration of Liver CT Data	108
<i>Marius Erdt, Cristina Oyarzun Laura, Klaus Drechsler, Stefano De Beni, and Luigi Solbiati</i>	
Abdominal Images Non-rigid Registration Using Local-Affine Diffeomorphic Demons	116
<i>Moti Freiman, Stephan D. Voss, and Simon Keith Warfield</i>	
FIST: Fast Interactive Segmentation of Tumors	125
<i>Sebastian Steger and Georgios Sakas</i>	
Intraoperative Registration for Liver Tumor Ablation	133
<i>Cristina Oyarzun Laura, Klaus Drechsler, Marius Erdt, Matthias Keil, Matthias Noll, Stefano De Beni, Georgios Sakas, and Luigi Solbiati</i>	
Sliding Geometries in Deformable Image Registration	141
<i>Danielle F. Pace, Marc Niethammer, and Stephen R. Aylward</i>	
Simulation of Portal Vein Clamping and the Impact of Safety Margins for Liver Resection Planning	149
<i>Klaus Drechsler and Cristina Oyarzun Laura</i>	
Liver Segmentation in CT Images for Intervention Using a Graph-Cut Based Model	157
<i>Yufei Chen, Weidong Zhao, Qidi Wu, Zhicheng Wang, and Jinyong Hu</i>	

Anatomical Feature-Guided Mutual Information Registration of Multimodal Prostate MRI	165
<i>Xin Zhao and Arie Kaufman</i>	

Computational Abdominal Anatomy

Abdominal Multi-organ Segmentation of CT Images Based on Hierarchical Spatial Modeling of Organ Interrelations	173
<i>Toshiyuki Okada, Marius George Linguraru, Yasuhide Yoshida, Masatoshi Hori, Ronald M. Summers, Yen-Wei Chen, Noriyuki Tomiyama, and Yoshinobu Sato</i>	
Organ Segmentation from 3D Abdominal CT Images Based on Atlas Selection and Graph Cut	181
<i>Masahiro Oda, Teruhisa Nakaoka, Takayuki Kitasaka, Kazuhiro Furukawa, Kazunari Misawa, Michitaka Fujiwara, and Kensaku Mori</i>	
Liver Segmental Anatomy and Analysis from Vessel and Tumor Segmentation via Optimized Graph Cuts	189
<i>Vivek Pamulapati, Aradhana Venkatesan, Bradford J. Wood, and Marius George Linguraru</i>	
Liver and Tumor Segmentation and Analysis from CT of Diseased Patients via a Generic Affine Invariant Shape Parameterization and Graph Cuts	198
<i>Marius George Linguraru, William J. Richbourg, Jeremy M. Watt, Vivek Pamulapati, and Ronald M. Summers</i>	
A Bayesian Framework for Estimating Respiratory Liver Motion from Sparse Measurements	207
<i>Frank Preiswerk, Patrik Arnold, Beat Fasel, and Philippe C. Cattin</i>	
Semi-automated Subcutaneous and Visceral Adipose Tissue Quantification in Computed Tomography	215
<i>Marcel Koek, Frederico Bastos Goncalves, Don Poldermans, Wiro Niessen, and Rashindra Manniesing</i>	
Computation and Evaluation of Medial Surfaces for Shape Representation of Abdominal Organs	223
<i>Sergio Vera, Debora Gil, Agnès Borràs, Xavi Sánchez, Frederic Pérez, Marius George Linguraru, and Miguel A. González Ballester</i>	
Discontinuity Preserving Registration of Abdominal MR Images with Apparent Sliding Organ Motion	231
<i>Silja Kiriyanthan, Ketut Fundana, and Philippe C. Cattin</i>	

Segmentation of Cervical Images by Inter-subject Registration with a Statistical Organ Model	240
<i>Floris F. Berendsen, Ulke A. van der Heide, Thomas R. Langerak, Aleris N.T.J. Kotte, and Josien P.W. Pluim</i>	
A New Method for Contour Determination of the Prostate in Ultrasound Images	248
<i>Farhang Sahba</i>	
Analyses of Missing Organs in Abdominal Multi-Organ Segmentation...	256
<i>Miyuki Suzuki, Marius George Linguraru, Ronald M. Summers, and Kazunori Okada</i>	
Geometric Modelling of Patient-Specific Hepatic Structures Using Cubic Hermite Elements	264
<i>Harvey Ho, Adam Bartlett, and Peter Hunter</i>	
Author Index	273
