

TABLE OF CONTENTS

1	INTRODUCTION.....	1
2	REVIEW OF LITERATURE.....	3
2.1	Prominent features of the <i>Azolla-Anabaena</i> symbiosis.....	3
2.2	Endophyte <i>Anabaena</i>	5
2.3	Interaction of <i>Azolla-Anabaena</i> symbiosis.....	7
2.3.1	Photosynthesis and carbon exchange.....	7
2.3.2	N metabolism.....	9
2.4	Regulation of photosynthetic sucrose formation in leaves.....	11
2.5	<i>Anabaena</i> -free <i>Azolla</i>	12
2.6	The effect of a combined N ₂ source.....	14
3	MATERIALS AND METHODS.....	15
3.1	<i>Azolla</i> growth conditions.....	15
3.2	Asymbiotic (<i>Anabaena</i> -free) <i>Azolla</i>	15
3.3	Isolation of <i>Anabaena</i> filaments.....	16
3.4	Isolation of <i>Anabaena</i> packets.....	16
3.5	Chlorophyll measurements.....	19
3.6	Acetylene reduction activity (ARA) determination.....	19
3.7	CO ₂ concentration measurement.....	20
3.8	Radioactivity measurements.....	20
4	EXPERIMENTS.....	21
4.1	<i>Azolla</i> photosynthesis and respiration rates during day and night cycle.....	21
4.1.1	Experimental procedure.....	21
4.1.2	Results.....	25
4.2	Transfer of photosynthetically assimilated C from <i>Azolla</i> to its endophyte <i>Anabaena</i>	30
4.2.1	Experimental procedure.....	30
4.2.2	Results.....	33
4.3	Physiological characterization of freshly isolated <i>Anabaena</i> filaments.....	34
4.3.1	¹⁴ CO ₂ fixation.....	35
4.3.2	Conversion of sugar carbon atoms to CO ₂	36
4.3.3	Acetylene reduction assay (Nitrogenase activity).....	39
5	GENERAL DISCUSSION.....	44
6	SUMMARY.....	49
7	REFERENCES.....	51
