Abstract	v
Table of Contents	vii
List of Figures	xv
List of Tables	xvii
List of Abbreviations and Acronyms	xix
1 Introduction	1
1.1 The Problem of Complexity in Software Management	2
1.1.1 Static and Dynamic Complexity	3
1.1.2 Established Modelling Approaches in Software Engineering	4
1.1.3 Models that Capture Static Complexity	8
1.1.4 Models that Capture Dynamic Complexity	8
1.1.5 Models are Tools for Learning	9
1.2 An Existing Framework for Model-Based Learning and Improvement	10
1.2.1 The Quality Improvement Paradigm (QIP)	10
1.2.2 The Experience Factory	12
1.2.3 Goal-Oriented Measurement (GQM)	13
1.2.4 Current White-Box and Black-Box Modelling in the QIP/EF/GQM Framework	15
1.2.5 Disadvantages of Current White-Box and Black-Box Modelling	18
1.2.6 Strategies to Overcome Current Disadvantages with Model-Based Learning	19
1.3 Objective of Thesis	20
1.4 Research Approach	21
1.5 Research Hypotheses	22
1.6 Contributions of Thesis	22
1.7 Structure of Thesis	23
Part I: Foundation	25
2 Model-Based Learning	27
2.1 Learning is a Feedback Process	27
2.1.1 Single-Loop Learning	28
2.1.2 Double-Loop Learning	29
2.2 Organisational Learning	30
2.3 Barriers to Learning in Software Organisations	31

2.3.1	Dynamic Complexity	32
2.3.2	Limited Information	33
2.3.3	Confounding Variables and Ambiguity.....	33
2.3.4	Misperceptions of Feedback.....	34
2.3.5	Flawed Cognitive Maps of Causal Relations.....	35
2.3.6	Erroneous Inferences about Dynamics	36
2.3.7	Unscientific Reasoning; Judgmental Errors and Biases.....	36
2.3.8	Defensive Routines and Interpersonal Impediments to Learning	37
2.3.9	Implementation Failure	37
2.4	Simulation-Based Learning.....	37
3	System Dynamics in a Nutshell	41
3.1	System Dynamics Definition	43
3.2	System Dynamics Foundations	43
3.3	Essential Steps of the System Dynamics Modelling Method	45
3.3.1	Problem Description	45
3.3.2	Definition of Reference Mode	46
3.3.3	Identification of Base Mechanisms	47
3.3.4	Construction of Causal Diagram	48
3.3.5	Construction of Flow Graph.....	50
3.3.6	Model Calibration.....	51
3.3.7	Model Verification and Validation	51
3.3.8	Policy Analysis.....	54
3.4	Proposed Guidance for SDM Development	54
3.4.1	Forrester (1961/71)	54
3.4.2	Roberts (1964).....	55
3.4.3	Randers (1973/80)	56
3.4.4	Richardson and Pugh (1981)	57
3.4.5	Bossel (1992)	58
3.4.6	Coyle (1996).....	60
3.5	System Dynamics Tools.....	61
3.6	System Dynamics Applications in Software Engineering	62
3.6.1	Software Project Management.....	63
3.6.2	Concurrent Software Engineering	66
3.6.3	Software Requirements Engineering.....	67
3.6.4	Impact of Process Improvements on Cycle-Time	67
3.6.5	Effects of Software Quality Improvement Activities.....	67
3.6.6	Software Reliability Management.....	68
3.6.7	Software Maintenance.....	68
3.6.8	Software Evolution.....	69
3.6.9	Software Outsourcing.....	69
3.6.10	Software Engineering Training	69
3.7	Open Issues	70

Part II: Action Research and Baselining	71
4 The PSIM Project	73
4.1 PSIM Project Background.....	73
4.2 PSIM Project Objectives	73
4.3 PSIM Model Scope	74
4.4 Modelling Steps	74
4.5 Knowledge Acquisition Activities.....	76
4.5.1 Organisations and Roles Involved.....	76
4.5.2 Interviews and Reviews	77
4.5.3 Data Sources	77
4.6 Modelling Results.....	78
4.6.1 Identification of Modelling Goal.....	78
4.6.2 Dynamic Hypotheses.....	79
4.6.3 Flow Graphs and Model Equations.....	79
4.6.4 Causal Diagrams.....	80
4.6.5 Model Calibration.....	80
4.6.6 Model Validation	81
4.7 Lessons Learned	81
4.7.1 Familiarity with SD Concepts.....	82
4.7.2 Realistic Expectations	82
4.7.3 Clarity about Modelling Goals.....	83
4.7.4 Model Size and Complexity.....	84
4.7.5 Efficiency in Model Building.....	84
4.8 Summary and Conclusion.....	85
4.9 Refinement of Research Objective and Formulation of Research Hypotheses	86
4.9.1 Research Objective.....	86
4.9.2 Research Hypotheses	86
 Part III: Innovation	 87
5 The IMMoS Framework in a Nutshell.....	89
6 Process Guidance for SDM Development	91
6.1 IMMoS Phase Model	91
6.2 IMMoS Role Model.....	92
6.2.1 SDM Customer	93
6.2.2 SDM User	93
6.2.3 SDM Developer.....	93
6.2.4 Facilitator.....	94
6.2.5 Moderator	94
6.2.6 SE Subject Matter Expert.....	94
6.3 IMMoS Product Model	94
6.4 IMMoS Process Model.....	97
6.4.1 IMMoS Process Activities – Overview	97
6.4.2 IMMoS Process Activities – Detailed Description	99
6.4.3 IMMoS Templates.....	121

7	Support for SDM Goal Definition	123
7.1	GQM Goal Definition	123
7.2	IMMoS Goal Definition	123
7.3	IMMoS Goal Definition Taxonomy	124
7.3.1	Role	126
7.3.2	Scope	127
7.3.3	Dynamic Focus	127
7.3.4	Purpose	128
7.3.5	Environment	138
8	Integration of SD Models with Static SE Models	139
8.1	Representation of DPM Elements in SDMs	139
8.2	Integration of QMs into SDMs	140
8.3	Example SDM Integrating a DPM and QMs	140
8.3.1	Descriptive Process Model	140
8.3.2	Quantitative Models	141
8.3.3	System Dynamics Model	142
9	Integration of SD Modelling with GQM and PM	147
9.1	Products of the IMMoS Components	147
9.1.1	SDM Development Products	147
9.1.2	GQM Products	148
9.1.3	PM Products	148
9.2	Relationships between SDM Development, GQM, and PM	149
9.2.1	Overview of IMMoS Relationships	149
9.2.2	Relations between GQM and PM	151
9.2.3	Relations between SDM Development and PM	152
9.2.4	Relations between SDM Development and GQM	153
9.3	IMMoS Application Example Scenario	156
9.3.1	Initialisation of SDM Development Project	156
9.3.2	Acquisition of Qualitative Information	157
9.3.3	Acquisition of Quantitative Information	158
9.3.4	Application of SDM	159
	Part IV: Validation	161
10	Validation of the IMMoS Approach	163
10.1	Evaluation of Hypothesis H_1 (Effectiveness)	164
10.2	Evaluation of Hypothesis H_2 (Efficiency)	166
11	The RESIM Project	169
11.1	Motivation and Background	169
11.2	RESIM Model Development	170
11.3	RESIM Design Decisions	170
11.3.1	Reference Mode	170
11.3.2	Base Mechanisms	172
11.4	RESIM Model Structure	173
11.4.1	Module 1: Software Development	175

11.4.2	Module 2: Workforce Allocation and Adjustment	175
11.4.3	Module 3: Effort and Cost Calculations.....	176
11.4.4	Module 4: New Requirements Generation	176
11.4.5	Module 5: Co-ordination of Increments	177
11.5	RESIM Model Calibration and Validation.....	177
11.6	RESIM Model Application	178
12	The GENSIM Project	181
12.1	Introduction and Background	181
12.2	Design of the WBT/Simulator GENSIM.....	183
12.2.1	GENSIM Model Parameters	183
12.2.2	GENSIM Model Structure.....	184
12.2.3	GENSIM Model Implementation.....	187
12.3	Activation of the WBT/Simulator GENSIM.....	187
12.3.1	WBT/Scenario Structure	188
12.3.2	WBT/Scenario Block Characteristics.....	190
13	Effectiveness of IMMOS	193
13.1	Suitability of PSIM	193
13.1.1	Role: Process Owner	194
13.1.2	Role: Project Manager.....	194
13.1.3	Suitability of PSIM with IMMOS	195
13.2	Suitability of RESIM	195
13.3	Suitability of GENSIM	196
13.3.1	Hypotheses.....	197
13.3.2	Subjects.....	198
13.3.3	Treatments	198
13.3.4	Experimental Design	199
13.3.5	Experimental Variables.....	199
13.3.6	Experimental Procedure	201
13.3.7	Data Collection Procedure	202
13.3.8	Data Analysis Procedure.....	204
13.3.9	Experimental Results	205
13.3.10	Threats to Validity	213
13.3.11	Summary and Discussion of Results	215
14	Efficiency of IMMOS	217
14.1	GQM Plan for IMMOS Efficiency Evaluation.....	217
14.1.1	Definition of Measurement Goal.....	217
14.1.2	Definition of Models.....	217
14.2	Evaluation of Impact on Duration	219
14.3	Evaluation of Impact on Effort.....	219
14.4	Potential Impact of IMMOS on PSIM	220
15	Summary and Outlook	221
15.1	Results and Contributions.....	221
15.2	Limitations and Future Work	223
	References	227

Appendix A: SD Model PSIM	239
PSIM Functionality	239
Running a Simulation	239
Analysis of Simulation Results	240
Example PSIM Applications	241
Project Planning	241
Project Control	242
Process Improvement	244
Appendix B: SD Model RESIM	247
Model Equations	247
Policy Variable	247
Levels	247
Rates	247
Auxiliary Variables	248
Constants	248
Appendix C: SD Model GENSIM	249
Quantitative Relationships between Key Variables (Examples)	249
Graphical User Interface (GUI)	250
Input Windows	251
Output Windows	252
Analysis Windows	253
Appendix D: Questionnaires used for Validating GENSIM	255
Influencing Factors - Background Characteristics / Before Pre-Test	255
DF 0.1: University Education	255
DF 0.2: Practical Software Engineering Experience	255
DF 0.3: Software Project Management Literature	255
DF 0.4: Learning Style	256
Pre-Test	257
Questions on "Interest in software project management"	257
Questions on "Knowledge about typical (empir.) patterns observed in SW projects"	258
Questions on "Knowledge about simple SW project dynamics" ..	259
Questions on "Knowledge about difficult project management issues"	260
Post-Test / Group A	263
Questions on "Interest in software project management"	263
Questions on "Knowledge about typical (empir.) patterns observed in SW projects"	264
Questions on "Knowledge about simple SW project dynamics" ..	265
Questions on "Knowledge about difficult project management issues"	266
Post-Test / Group B	269
Questions on "Interest in software project management"	269
Questions on "Knowledge about typical (empir.) patterns observed in SW projects"	270
Questions on "Knowledge about simple SW project dynamics" ..	271
Questions on "Knowledge about difficult project management issues"	272

Influencing Factors – After Post-Test / Group A	275
DF 0.5: Time Need.....	275
DF 0.6: Session Evaluation	275
Influencing Factors – After Post-Test / Group B	277
DF 0.5: Time Need.....	277
DF 0.6: Session Evaluation	277
Appendix E: Product-Flow Representation of IMMoS Process	
Model	279
Lebenslauf	281
