

Table of Contents

Preface

1	An Introduction to Vehicle Thermal Systems	1
	<i>Wolf-Heinrich Hucho and Gordon Taylor</i>	
2	Interaction of External and Internal Flows	14
	<i>Jochen Wiedemann and Timo Kuthada</i>	
3	Engine Cooling – State of the Art	27
	<i>Ralf Hoffmann</i>	
4	Heating, Ventilating, Air Conditioning – State of the Art	50
	<i>Tibor Györög and Hajime Ito</i>	
5	Thermal Management, Definition and Requirements	71
	<i>Jochen Eitel, Peter Ambros and Brigitte Taxis-Reischl</i>	
6	Control Strategies for Thermo-Management	83
	<i>Lino Guzzella</i>	
7	Part and Potentials of the 1D Simulation in the Aggregate Cooling and Thermo-Management of a Vehicle	98
	<i>Johann Betz</i>	
8	Numerical Methods, 3-Dimensional	115
	<i>Alexander Wäsche</i>	
9	Thermal Management - Experimental Methods and Results	129
	<i>Martin Jones</i>	
10	Compact Heat Exchangers for Passenger Cars	144
	<i>Jörg Soldner</i>	
11	Fans, Pumps, and Valves	157
	<i>Thomas Helming, Richard Vogt and Dirk Vollmer</i>	
12	High Performance Test Facilities	171
	<i>Stefan Becker</i>	
13	Joint Project for an Optimized Cooling System	180
	<i>Timo Kuthada, Michael Genger, Nils Widdecke and Jochen Wiedemann</i>	

The Authors
