Abstract	i
Acknowledgements	ii
List of Tables	viii
List of Figures	x

CHAPTERS

I. INTRODUCTION	1
Objectives	1
Questions and Predictions	3
Question 1: Rare Elements	4
Question 2: Pingos as Islands	4
Question 3: Successional Sequence	4
II. BACKGROUND	6
Pingos	6
Mechanism of Formation	6
Distribution	8
Regional Setting	8
Regional Landscape Units	8
Landscape Elements	9
Climate	13
Geology	13
Soils	15
Arctic Vegetation	15
Vegetation of the Study Region	16
Environmental Gradients	17
Floristics	18
Island Biogeography	19
Succession	20
Arctic Studies	21
III. METHODS	22
Study Areas	22
Field Study	22
Field Sampling Procedures	23
Species Identification	35
Climate and Snow	35
Climate data	35
Snow transects	35
Climate indices	36

Soils	36
Field methods	36
Laboratory analyses	37
Geological Nomenclature	37
Data Analysis	37
Data Management	37
Classification	37
Ordination	39
Relationship between ordination and classification	40
Floristics	40
Species Diversity Indices	42
Definition of Morphological Classes	42
IV. VEGETATION AND ENVIRONMENTAL GRADIENTS	43
Physical Description of Study Pings	43
Microclimate	45
Snow	48
Soils	52
Soils of the Pings	53
Mollisols	53
Inceptisols	58
Entisols	59
Histosols	59
Vegetation	59
ENE Sides and North Slopes	60
Stand Type <i>Saxifraga bronchialis</i> - <i>Sphaerophorus globosus</i>	62
Facies <i>Rhacomitrium lanuginosum</i> - <i>Polytrichum piliferum</i>	63
Stand Type <i>Cerastium beeringianum</i> - <i>Minuartia rubella</i>	65
Stand Type <i>Dryas integrifolia</i> - <i>Oxytropis nigrescens</i>	65
Facies <i>Carex nardina</i> - <i>Calamagrostis purpurascens</i>	67
Stand Type <i>Dryas integrifolia</i> - <i>Astragalus umbellatus</i>	68
Facies <i>Kobresia myosuroides</i> - <i>Pedicularis capitata</i>	68
Facies <i>Carex bigelowii</i> - <i>Cassiope tetragona</i>	69
Summits and South Slopes	70
Stand Type <i>Cerastium beeringianum</i> - <i>Ranunculus pedatifidus</i>	70
Facies <i>Festuca baffinensis</i> - <i>Luzula confusa</i>	71
Facies <i>Trisetum spicatum</i> - <i>Potentilla uniflora</i>	72
Stand Type <i>Poa glauca</i> - <i>Bromus pumpeianus</i>	72
Facies <i>Potentilla hookeriana</i> - <i>Polemonium acutiflorum</i>	74
Facies <i>Artemisia glomerata</i>	74
Facies <i>Carex obtusata</i> - <i>Saxifraga tricuspidata</i>	75
Facies <i>Kobresia myosuroides</i> - <i>Salix glauca</i>	76
Stand Type <i>Carex rupestris</i> - <i>Saxifraga oppositifolia</i>	77
Facies <i>Carex petricosa</i> - <i>Carex nardina</i>	78

Facies <i>Carex franklinii</i> - <i>Salix brachycarpa</i> ssp. <i>niphoclada</i> .	79
Facies <i>Carex rupestris</i> - <i>Saxifraga oppositifolia</i>	80
Snowbeds	80
Stand Type <i>Phippsia algida</i> - <i>Saxifraga rivularis</i>	80
Group <i>Dryas integrifolia</i> - <i>Tomenthypnum nitens</i>	82
Stand Type <i>Salix rotundifolia</i> - <i>Dryas integrifolia</i>	82
Facies <i>Salix rotundifolia</i> - <i>Oxyria digyna</i>	83
Facies <i>Salix rotundifolia</i> - <i>Eriophorum triste</i>	84
Stand Type <i>Cassiope tetragona</i> - <i>Dryas integrifolia</i>	86
Subtype <i>Vaccinium uliginosum</i> - <i>Salix glauca</i>	87
Facies <i>Ledum decumbens</i> - <i>Betula nana</i>	87
Facies <i>Arctous rubra</i> - <i>Rhododendron lapponicum</i>	89
Facies <i>Cassiope tetragona</i> - <i>Dryas integrifolia</i>	89
Stand Type <i>Dryas integrifolia</i> - <i>Astragalus umbellatus</i> - <i>Carex rupestris</i>	90
Facies <i>Dryas integrifolia</i> - <i>Astragalus umbellatus</i> - <i>Kobresia myosuroides</i>	92
Facies <i>Carex rupestris</i> - <i>Oxytropis nigrescens</i>	92
Relationships Between Classification Entities	94
Wildlife on Pingos	99
Environmental Gradients	104
Landscape-Level Gradients	104
Microsite-Level Gradients	109
Discussion and Conclusions	122
V. FLORISTICS AND BIOGEOGRAPHY	127
Floristics	129
Landscape- Level Effects	132
Microsite-Level Effects	133
Community Patterns	138
Comparison with Other Regions	141
Biogeography	146
Species-Area Correlations	146
Correlations with Other Factors	149
Discussion and Conclusions	152
VI. SUCCESSION	156
Geomorphic Classes	156
Descriptions of the Stages	158
Stage 1	158
Stage 2	160
Stage 3	161
Stage 4	163

Vegetation Succession	167
Convergence (Hypothesis 1)	167
Dependence on Site Factors (Hypothesis 2)	170
Diversity (Hypothesis 3)	170
Distribution of Restricted Species	174
Discussion and Conclusions	174
Relation to the Steppe-Tundra Question	176
 VII. FINAL DISCUSSION AND CONCLUSIONS	178
Summary	178
Significance of the Study	179
Future Studies	180
Importance to Regional Diversity	181
 LITERATURE CITED	185
 APPENDICES	210
A. ANNOTATED SPECIES LIST	211
B. CLASSIFICATION SUMMARY TABLES	253
C. DATA	254
C1. Morphological data for the 41 pingos	255
C2. Number of species data for the 41 pingos	257
C3. Environmental data for each sample plot	259
C4. Number of species data for each sample plot	269
C5. Disturbance scalars for each sample plot	278
