PRESENTED PAPERS

Richard M. Adler & David J. Koehn Complex Adaptive System-Based Decision Support for Enabling Organizational Change	2
Chih-Chun Chen, Sylvia B. Nagl & Christopher D. Clack Multi-Level Behaviours in Agent-Based Simulation: Colonic Crypt Cell Populations	14
Myriam Patricia Cifuentes Developing a Complex Approach to Health Phenomena	27
Roozbeh Daneshvar & Liwen Shih Virtual Spring-Based 3D Multi-Agent Group Coordination	36
Sarjoun Doumit & Ali A. Minai Exploration for Agents with Different Personalities in Unknown Environments	44
René Doursat The Self-Made Puzzle	54
Robert A. Este The Necessity of Conceptual Skill Enhancement to Address Philosophical Challenges of New Science	68
Dene Farrell, Hiroki Sayama, Shelly D. Dionne, Francis J. Yammarino & David Sloan Wilson Evolutionary Perspective on Collective Decision Making	75
Philip V. Fellman, Jonathan B. Clemens, Roxana Wright, Jonathan Vos Post & Matthew Dadmun Disrupting Terrorist Networks – A Dynamic Fitness Landscape Approach	85
Carlos Gershenson The World as Evolving Information	100
Adom Giffin Inferring Diversity: Life After Shannon	116

Y. Grondin, D. J. Raine & V. Norris Life at the “Edge of Chaos” in a Genetic Model	124
Ella-Mae Hubbard, Carys Siemieniuch & Murray Sinclair The Effects of Complexity on the Product-Service Shift	132
Borislav Iordanov Rapid Software Evolution	140
Valentina Ipatova, Valeria Prokhotskaya & Aida Dmitrieva Structural Changes and Adaptation of Algal Population under Different Regimens of Toxic Exposure	149
Laxmi Iyer, Ali A. Minai, Simona Doboli & Vincent R. Brown Modularity and Self-Organized Functional Brain Structures	157
Michael L. Kuras An Introduction to Complex-System Engineering	172
Zoltán Kuscsik & Denis Horváth Statistical Properties of Agent-Based Market Area Model	188
A. J. Masys Complexity and the Social Sciences	195
D. J. Miron, I. V. Emelyanova, G. E. Donald & G. M. Garner Agent-Based Model of Livestock Movements	205
Hannu Reittu & Ilkka Norros Random Graph Models of Communication Topologies	214
Marko A. Rodriguez, Jennifer H. Watkins, Johan Bollen & Carlos Gershenson Using RDF to Model the Structure and Process of Systems	222
Alex Ryan How Do Agents Represent?	231
Mín Sun & Mirsad Hadzikadic A CAS for Finding the Best Strategy for Prisoner’s Dilemma	265
Mihaela Ulieru A Complex Systems Approach to the Design and Evaluation of Holistic Security Ecosystems	274
Daniel E. Whitney Exploring Watts’ Cascade Boundary	285
Index of authors	302
