

Contents

<u>E. Bohl</u> , On two boundary value problems in nonlinear elasticity from a numerical viewpoint.....	1
<u>S.F. Mc Cormick</u> , A revised mesh refinement strategy for Newton's method applied to nonlinear two-point boundary value problems.....	15
<u>W. Elben and W. Wolff</u> , Problems in applying the SOR-method to the solution of the Maxwell's time dependent equations	25
<u>H. Koßmann</u> , Boundary-value technique for the numerical solution of periodic parabolic problems	41
<u>H. Kreth</u> , Time-discretisations for nonlinear evolution equations	57
<u>J.D. Lambert</u> , Frequency fitting in the numerical solution of ordinary differential equations.....	65
<u>B. Mehri</u> , Forced nonlinear oscillation for certain third order differential equation	73
<u>J.J.H. Miller</u> , Sufficient conditions for the convergence, uniformly in ε , of a three point difference scheme for a singular perturbation problem	85
<u>W. Müller</u> , Experiences on numerical calculation of fields	93
<u>K. Nixdorff</u> , An application of the differential equations of the sound ray.....	105

<u>P. Nørsett</u> , On using the Du Fort Frankel scheme for determination of the velocity profile in turbulent boundary layer along an oscillating wall	119
<u>E.L. Ortiz</u> , On the numerical solution of nonlinear and functional differential equations with the Tau method.....	127
<u>R. Rautmann</u> , On the uniqueness and stability of weak solutions of a Fokker-Planck-Vlasov equation.....	141
<u>H.J. Wirz</u> , On iterative solution methods for systems of partial differential equations	151
