

Table of Contents

General Anatomy

1 Human Phylogeny and Ontogeny

1.1	Human Phylogeny	2
1.2	Human Ontogeny: Overview, Fertilization, and Earliest Developmental Stages	4
1.3	Gastrulation, Neurulation, and Somite Formation	6
1.4	Development of the Fetal Membranes and Placenta	8
1.5	Development of the Pharyngeal (Branchial) Arches in Humans	10
1.6	Early Embryonic Circulation and the Development of Major Blood Vessels	12
1.7	Bone Development and Remodeling	14
1.8	Ossification of the Limbs	16
1.9	Development and Position of the Limbs	18

2 Overview of the Human Body

2.1	The Human Body (Proportions, Surface Areas, and Body Weights)	20
2.2	The Structural Design of the Human Body	22

3 Surface Anatomy of the Body, Landmarks and Reference Lines

3.1	Terms of Location and Direction, Cardinal Planes and Axes	24
3.2	Body Surface Anatomy	26
3.3	Body Surface Contours and Palpable Bony Prominences ..	28
3.4	Landmarks and Reference Lines on the Human Body	30
3.5	Body Regions (Regional Anatomy)	32

4 The Bones and Joints

4.1	The Bony Skeleton and the Structure of Tubular Bones	34
4.2	Continuous and Discontinuous Joints: Synarthroses and Diarthroses	36
4.3	Basic Principles of Joint Mechanics	38

5 The Muscles

5.1	The Skeletal Muscles	40
5.2	The Tendons and Mechanisms That Assist Muscle Function	42

6 The Vessels

6.1	Overview of the Human Cardiovascular System	44
6.2	The Structure of Arteries and Veins	46
6.3	The Terminal Vascular Bed	48

7 The Lymphatic System and Glands

7.1	The Human Lymphatic System	50
7.2	Exocrine and Endocrine Glands	52

8 General Neuroanatomy

8.1	Development of the Central Nervous System (CNS)	54
8.2	Neural Crest Derivatives and the Development of the Peripheral Nervous System (PNS)	56
8.3	Topography and Structure of the Nervous System	58
8.4	Cells of the Nervous System	60
8.5	Structure of a Spinal Cord Segment	62
8.6	Sensory Innervation: An Overview	64
8.7	Dermatomes and Cutaneous Nerve Territories	66
8.8	Motor Innervation	68
8.9	Differences between the Central and Peripheral Nervous Systems	70
8.10	The Autonomic Nervous System	72

Trunk Wall

1 Bones, Ligaments, and Joints

1.1	The Skeleton of the Trunk	76
1.2	The Bony Spinal Column	78
1.3	Development of the Spinal Column	80
1.4	The Structure of a Vertebra	82
1.5	The Cervical Spine	84
1.6	The Thoracic Spine	86
1.7	The Lumbar Spine	88
1.8	The Sacrum and Coccyx	90
1.9	The Intervertebral Disk: Structure and Function	92
1.10	The Ligaments of the Spinal Column: Overview and Thoracolumbar Region	94
1.11	Overview of the Ligaments of the Cervical Spine	96
1.12	The Ligaments of the Upper Cervical Spine (Atlanto-occipital and Atlantoaxial Joints)	98
1.13	The Intervertebral Facet Joints, Motion Segments, and Range of Motion in Different Spinal Regions	100
1.14	The Uncovertebral Joints of the Cervical Spine	102
1.15	Degenerative Changes in the Lumbar Spine	104
1.16	The Thoracic Skeleton	106
1.17	The Sternum and Ribs	108
1.18	The Costovertebral Joints and Thoracic Movements	110
1.19	The Bony Pelvis	112
1.20	The Pelvic Ligaments and Pelvic Measurements	114
1.21	The Sacroiliac Joint	116

2 Musculature: Functional Groups

2.1	The Muscles of the Trunk Wall, Their Origin and Function	118
2.2	The Intrinsic Back Muscles: Lateral Tract	120
2.3	Medial Tract	122
2.4	The Short Nuchal and Craniovertebral Joint Muscles and the Prevertebral Muscle	124
2.5	The Muscles of the Abdominal Wall: Lateral and Oblique Muscles	126
2.6	Anterior and Posterior Muscles	128
2.7	The Functions of the Abdominal Wall Muscles	130
2.8	The Muscles of the Thoracic Cage (Intercostales, Subcostales, Scaleni, and Transversus thoracis)	132
2.9	The Diaphragm	134
2.10	The Muscles of the Pelvic Floor (Pelvic Diaphragm, Urogenital Diaphragm, Sphincter and Erectile Muscles)	136

3 Musculature: Topographical Anatomy

3.1	The Back Muscles and Thoracolumbar Fascia	138
3.2	The Intrinsic Back Muscles: Lateral and Medial Tracts	140
3.3	Short Nuchal Muscles	142

3.4	The Chest Wall Muscles and Endothoracic Fascia	144
3.5	Thoracoabdominal Junction: The Diaphragm	146
3.6	The Lateral and Anterior Abdominal Wall Muscles	148
3.7	Structure of the Abdominal Wall and Rectus Sheath	150
3.8	The Pelvic Floor Muscles: Overview of the Perineal Region and Superficial Fasciae	152
3.9	Structure of the Pelvic Floor and Pelvic Spaces: Female versus Male	154
3.10	The Muscles of the Female Pelvic Floor and Wall	156
3.11	The Pelvic Floor Muscles: The Levator ani	158
3.12	Their Relation to Organs and Vessels in Males and Females	160

4 Neurovascular Systems: Forms and Relations

4.1	The Arteries	162
4.2	The Veins	164
4.3	The Lymphatic Vessels and Lymph Nodes	166
4.4	The Nerves	168

5 Neurovascular Systems: Topographical Anatomy

5.1	Anterior Trunk Wall: Surface Anatomy and Superficial Nerves and Vessels	170
5.2	Posterior Trunk Wall: Surface Anatomy and Superficial Nerves and Vessels	172
5.3	Posterior Trunk Wall: Posterior View	174
5.4	Anterior View	176
5.5	Anterior Trunk Wall: Overview and Location of Clinically Important Nerves and Vessels	178
5.6	Nerves, Blood Vessels, and Lymphatics in the Female Breast	180
5.7	The Inguinal Canal	182
5.8	Anterior Abdominal Wall: Anatomy and Weak Spots	184
5.9	Inguinal and Femoral Hernias	186
5.10	Rare External Hernias	188
5.11	Diagnosis and Treatment of Hernias	190
5.12	Development of the External Genitalia	192
5.13	Male External Genitalia: Testicular Descent and the Spermatic Cord	194
5.14	The Testis and Epididymis	196
5.15	The Fasciae and Erectile Tissues of the Penis	198
5.16	Nerves and Vessels of the Penis	200
5.17	Female External Genitalia: Overview and Episiotomy	202
5.18	Neurovascular Structures, Erectile Tissues, Erectile Muscles, and Vestibule	204

Upper Limb

1 Bones, Ligaments, and Joints

1.1	The Upper Limb as a Whole	208
1.2	Integration of the Shoulder Girdle into the Skeleton of the Trunk	210
1.3	The Bones of the Shoulder Girdle	212
1.4	The Bones of the Upper Limb:	
	The Humerus	214
1.5	Torsion of the Humerus	216
1.6	The Radius and Ulna	218
1.7	The Articular Surfaces of the Radius and Ulna	220
1.8	The Hand	222
1.9	The Carpal Bones	224
1.10	The Joints of the Shoulder:	
	Overview, Clavicular Joints	226
1.11	Ligaments of the Clavicular and Scapulothoracic Joints	228
1.12	The Capsule and Ligaments of the Glenohumeral Joint	230
1.13	The Subacromial Space	232
1.14	The Subacromial Bursa and Subdeltoid Bursa	234
1.15	Movements of the Shoulder Girdle and Shoulder Joint	236
1.16	The Elbow Joint	
	as a Whole	238
1.17	Capsule and Ligaments	240
1.18	The Forearm:	
	Proximal and Distal Radioulnar Joints	242
1.19	Movements of the Elbow and Radioulnar Joints	244
1.20	The Ligaments of the Hand	246
1.21	The Carpal Tunnel	248
1.22	The Ligaments of the Fingers	250
1.23	The Carpometacarpal Joint of the Thumb	252
1.24	Movements of the Hand and Finger Joints	254

2 Musculature: Functional Groups

2.1	Functional Muscle Groups	256
2.2	The Muscles of the Shoulder Girdle:	
	Trapezius, Sternocleidomastoid, and Omohyoid	258
2.3	Serratus anterior, Subclavius, Pectoralis minor, Levator scapulae, and Rhomboid major and minor	260
2.4	The Rotator Cuff	262
2.5	The Deltoid	264
2.6	Latissimus dorsi and Teres major	266
2.7	Pectoralis major and Coracobrachialis	268
2.8	The Muscles of the Arm:	
	Biceps brachii and Brachialis	270
2.9	Triceps brachii and Anconeus	272
2.10	The Muscles of the Forearm:	
	The Superficial and Deep Flexors	274
2.11	The Radialis Muscles	276
2.12	The Superficial and Deep Extensors	278
2.13	The Intrinsic Muscles of the Hand:	
	The Thenar and Hypothenar Muscles	280
2.14	Lumbricals and Interossei (Metacarpal Muscles)	282

3 Musculature: Topographical Anatomy

3.1	The Posterior Muscles of the Shoulder Girdle and Shoulder Joint	284
3.2	The Posterior Muscles of the Shoulder Joint and Arm	286
3.3	The Anterior Muscles of the Shoulder Girdle and Shoulder Joint	288
3.4	The Anterior Muscles of the Shoulder Joint and Arm	290
3.5	The Anterior Muscles of the Forearm	292
3.6	The Posterior Muscles of the Forearm	294
3.7	Cross Sections of the Arm and Forearm	296
3.8	The Tendon Sheaths of the Hand	298
3.9	The Dorsal Digital Expansion	300
3.10	The Intrinsic Muscles of the Hand:	
	Superficial Layer	302
3.11	Middle Layer	304
3.12	Deep Layer	306

4 Neurovascular Systems: Forms and Relations

4.1	The Arteries	308
4.2	The Veins	310
4.3	The Lymphatic Vessels and Lymph Nodes	312
4.4	The Brachial Plexus:	
	Structure	314
4.5	Supraclavicular Part	316
4.6	Infraclavicular Part—Overview and Short Branches	318
4.7	Infraclavicular Part—The Musculocutaneous Nerve and Axillary Nerve	320
4.8	Infraclavicular Part—The Radial Nerve	322
4.9	Infraclavicular Part—The Ulnar Nerve	324
4.10	Infraclavicular Part—The Median Nerve	326

5 Neurovascular Systems: Topographical Anatomy

5.1	Surface Anatomy and Superficial Nerves and Vessels:	
	Anterior View	328
5.2	Posterior View	330
5.3	The Shoulder Region: Anterior View	332
5.4	The Axilla:	
	Anterior Wall	334
5.5	Posterior Wall	336
5.6	The Anterior Brachial Region	338
5.7	The Shoulder Region: Posterior and Superior Views	340
5.8	The Posterior Brachial Region	342
5.9	The Elbow (Cubital Region)	344
5.10	The Anterior Forearm Region	346
5.11	The Posterior Forearm Region and the Dorsum of the Hand	348
5.12	The Palm of the Hand:	
	Epifascial Nerves and Vessels	350
5.13	Vascular Supply	352
5.14	The Carpal Tunnel	354
5.15	The Ulnar Tunnel and Anterior Carpal Region	356

Lower Limb

1 Bones, Ligaments, and Joints

1.1	The Lower Limb: General Aspects	360
1.2	The Anatomical and Mechanical Axes of the Lower Limb	362
1.3	The Bones of the Pelvic Girdle	364
1.4	The Femur: Importance of the Femoral Neck Angle	366
1.5	The Femoral Head and Deformities of the Femoral Neck	368
1.6	The Patella	370
1.7	The Tibia and Fibula	372
1.8	The Bones of the Foot from the Dorsal and Plantar Views	374
1.9	The Bones of the Foot from the Lateral and Medial Views; Accessory Tarsal Bones	376
1.10	The Hip Joint: Articulating Bones	378
1.11	The Ligaments of the Hip Joint: Stabilization of the Femoral Head	380
1.12	Nutrition of the Femoral Head	382
1.13	Cross-Sectional Anatomy of the Hip Joint	384
1.14	The Movements and Biomechanics of the Hip Joint	386
1.15	The Development of the Hip Joint	388
1.16	The Knee Joint: Articulating Bones	390
1.17	The Ligaments of the Knee Joint: An Overview	392
1.18	The Cruciform and Collateral Ligaments	394
1.19	The Menisci	396
1.20	The Movements of the Knee Joint	398
1.21	Capsule and Joint Cavity	400
1.22	The Joints of the Foot: Overview of the Articulating Bones and Joints	402
1.23	Articular Surfaces	404
1.24	The Talocrural and Subtalar Joints	406
1.25	The Ligaments of the Foot	408
1.26	The Movements of the Foot	410
1.27	Overview of the Plantar Vault and the Transverse Arch	412
1.28	The Longitudinal Arch of the Foot	414
1.29	The Sesamoid Bones and Deformities of the Toes	416
1.30	Human Gait	418

2 Musculature: Functional Groups

2.1	The Muscles of the Lower Limb: Classification	420
2.2	The Hip and Gluteal Muscles: The Inner Hip Muscles	422
2.3	The Outer Hip Muscles	424
2.4	The Adductor Group	426
2.5	The Anterior Thigh Muscles: The Extensor Group	428
2.6	The Flexor Group	430
2.7	The Leg Muscles: The Anterior and Lateral Compartments (Extensor and Fibularis Group)	432

2.8	The Posterior Compartment (Superficial Flexor Group)	434
2.9	The Posterior Compartment (Deep Flexor Group)	436
2.10	The Intrinsic Muscles of the Foot: The Dorsum and Sole of the Foot (Lateral and Medial Compartments)	438
2.11	The Sole of the Foot (Central Compartment)	440

3 Musculature: Topographical Anatomy

3.1	The Muscles of the Thigh Hip and Gluteal Region from the Medial and Anterior Views	442
3.2	Hip and Gluteal Region from the Anterior View; Origins and Insertions	444
3.3	Hip and Gluteal Region from the Lateral and Posterior Views	446
3.4	Hip and Gluteal Region from the Posterior View; Origins and Insertions	448
3.5	The Muscles of the Leg from the Lateral and Anterior Views; Origins and Insertions	450
3.6	from the Posterior View; Origins and Insertions	452
3.7	The Tendon Sheaths and Retinacula of the Foot	454
3.8	The Intrinsic Foot Muscles from the Plantar View; the Plantar Aponeurosis	456
3.9	The Intrinsic Foot Muscles from the Plantar View	458
3.10	Origins and Insertions	460
3.11	Cross-Sectional Anatomy of the Thigh, Leg, and Foot	462

4 Neurovascular Systems: Forms and Relations

4.1	The Arteries	464
4.2	The Veins	466
4.3	The Lymphatic Vessels and Lymph Nodes	468
4.4	The Structure of the Lumbosacral Plexus	470
4.5	The Nerves of the Lumbar Plexus: The Iliohypogastric, Ilioinguinal, Genitofemoral, and Lateral Femoral Cutaneous Nerves	472
4.6	The Obturator and Femoral Nerves	474
4.7	The Nerves of the Sacral Plexus: The Superior Gluteal, Inferior Gluteal, and Posterior Femoral Cutaneous Nerves	476
4.8	The Sciatic Nerve (Overview and Sensory Distribution)	478
4.9	The Sciatic Nerve (Course and Motor Distribution)	480
4.10	The Pudendal and Coccygeal Nerves	482

5 Neurovascular Systems: Topographical Anatomy

5.1	Surface Anatomy and Superficial Nerves and Vessels:	
	Anterior View	484
5.2	Posterior View	486
5.3	The Anterior Femoral Region Including	
	the Femoral Triangle	488
5.4	Arterial Supply to the Thigh	490
5.5	The Gluteal Region:	
	Overview of its Vessels and Nerves	492
5.6	The Sciatic Foramen and Sciatic Nerve	494
5.7	The Ischioanal Fossa	496
5.8	The Pudendal Canal and Perineal Region	
	(Urogenital and Anal Region)	498
5.9	The Posterior Thigh Region and Popliteal Region	500
5.10	The Posterior Leg Region and the Tarsal Tunnel	502
5.11	The Sole of the Foot	504
5.12	The Anterior Leg Region and Dorsum of the Foot:	
	Cutaneous Innervation	506
5.13	The Arteries of the Dorsum of the Foot	508
