

CONTENTS

MEDICAL RECORDS

Coronary care information system: its use in the assessment of prognosis in acute myocardial infarction	J L Willems <i>et al</i> <i>University of Leuven, Belgium</i>	1
ACIS - a clinical information system	M A Fox <i>University of California, USA</i>	9
An analysis of 3 years' experience with the re-designed system for basic medical documentation within the MSH	G von Gaertner-Holthoff P R Pocklington <i>Medical School Hannover Germany</i>	19
Experiments with medical diagnostic systems	J Janecki H Kokott <i>Medical Academy, Poland</i>	29
An on-line, interactive information system for kidney transplantation	Q P Lansbergen <i>University Hospital Leyden Netherlands</i>	37
MFS - a user-oriented system for diagnostic data management	E Guidotti R Arrigoni <i>Centro Diagnostico Italiano</i>	49
An attempt to evaluate the contribution of common laboratory findings : an experiment in neurology	J L Golmard <i>et al</i> <i>INSERM, France</i>	55

TEXT PROCESSING

Artificial medical languages, a solution for clinical needs in documentation, example using REMEDE system	M de Heaulme <i>INSERM, France</i>	63
KLAUKON - a microprocessor system for free text acquisition with automatic error checking	W K H Sager <i>et al</i> <i>Universität Geissen, Germany</i>	73
Free text analysis: an attempt to solve the documentation problem	G Gell <i>Universitätsklinik für Radiologie, Austria</i>	83

GENERAL PRACTICE

A survey of developments in medical records and information systems in the United Kingdom	A L Rector <i>et al</i> <i>University Hospital & Medical School Nottingham, UK</i>	91
Computerization of the medical record of the general practitioner : systematic registration at each contact patient - general practitioner	J Heyrman <i>MIG, Belgium</i>	101

The provision of data processing facilities for medical practitioners	L R Neal <i>Brunel University, UK</i>	109
Satisfying the information needs of the general practitioner for improved patient care	M G Sheldon <i>General Practitioner, UK</i>	117
 <u>IMAGE PROCESSING</u>		
Information processing in research and routine nuclear cardiology	C N de Graaf et al <i>Institute of Nuclear Medicine Netherlands</i>	121
Image analysis in histo-cytopathology	L Arnould et al <i>Institut de Morphologie Pathologique, Belgium</i>	159
Computer simulation of monochromatic X-rays	G T Herman <i>State University of New York USA</i>	167
Real time computation of pulmonary mechanics by digital computer	H Lorino et al <i>Hôpital Henri Mondor, France</i>	179
The computer in the functional study of the kidney with radionuclides	J Moreno-González et al <i>Clínica Puerta de Hierro, Spain</i>	189
Improvement of programming efficiency in medical image processing by a dialog language	G Pfeiffer K H Hoehne <i>DESY, Germany</i>	203
Systems support for the routine requirements of clinical neurophysiology	P R Pocklington et al <i>Medical School Hannover, Germany</i>	217
 <u>INFORMATICS TECHNOLOGY</u>		
On the expression of relations in medicine: linguistic aspects	B J Kostrewski <i>The City University, UK</i> J Anderson <i>King's College Hospital, UK</i>	227
Software of dialogues: physician - computer - patient	A Brodziak <i>Silesian School of Medicine, Poland</i>	237
Formal languages and their semantics tools for the application programmer	G Osterburg K Schadewaldt <i>German Cancer Research Center</i>	241
 <u>MEDICAL DECISION MAKING</u>		
A decision rule in parenthood diagnosis and its consequences	C Chastang F Gremy <i>INSERM, France</i>	251

Interactive programming language for validation and interrogation of evolutive data	J P Chantalou <i>INSERM, France</i>	261
A system for computer-aided prognosis - a management function of the medical information system WAMIS	W Dorda et al <i>Institute of Medical Computer Science, Austria</i>	269
Theory of evidence and medical diagnostic	P Smets <i>Brussels University, Belgium</i>	285
Computer-aided classification of chronic bronchitis in comparison with other diagnostic tools	R Thurmayr et al <i>Institut für Medizinische Statistik und Epidemiologie der TU München, Germany</i>	293

TRAINING IN MEDICAL INFORMATICS

Review of the MUMPS language and its applications to medicine	J Zimmerman <i>Washington University, USA</i> F Schutte <i>Free University, Netherlands</i>	303
The communicational structure of medical information systems and its educational consequences	O Rienhoff P L Reichertz <i>Medical School Hannover, Germany</i>	315
Educational aspects in medical informatics	F Schutte et al <i>Free University, Netherlands</i>	329

IMPLEMENTATION AND USER EDUCATION

COMPADOS : how to convince a physician to use a computerized medical record system	J van Egmond R J Wieme <i>University of Gent, Belgium</i>	339
The influence of privacy acts on medical informatics	K Boehm <i>German Cancer Research Center</i>	351
Rules for confidentiality - practical experience in a community based real-time system	R H Fisher <i>Exeter Community Health Services Computer Project, UK</i>	363
The objectives and design philosophy of the real-time computer project at the Queen Elizabeth Medical Centre	P M Hills <i>Queen Elizabeth Medical Centre, UK</i>	385

MODELLING

The utilization and validation of mathematical models in medicine and public health	N T J Bailey <i>World Health Organisation</i>	393
Testing alternative inventory policies for a regional blood bank	B Page <i>Technische Universität Berlin, Germany</i>	403

A model of the foetal circulation for the interpretation of foetal heart rate patterns	A F L Veth <i>Free University, Netherlands</i>	413
Compartmental analysis of the distribution of Buflomedil	P d'Athis et al <i>Hôpital du Bocage, France</i>	421

DATABASES

A large database on a minicomputer	A Bongers J M L Kouwenberg <i>University Hospital Leyden, Netherlands</i>	431
OP72 - data technical aspects	F Bergqvist S Bengtsson <i>Uppsala University, Sweden</i>	443
On the design of a database system for clinical research	S C Chang et al <i>Free University, Netherlands</i>	457
Using CODIL to handle poorly structured clinical information	C F Reynolds et al <i>Brunel University, UK</i>	465

CLINICAL LABORATORIES

A laboratory data processing system for non-numeric results	P J L Sequeira <i>Withington Hospital, UK</i>	475
A surgical pathology file experiences with 30,000 records	M Härringer H Becker <i>University of Graz, Austria</i>	481
Data structures and data base problems in clinical chemistry information systems	A J Porth I Mieth <i>Medical School Hannover, Germany</i>	489
Clinical laboratory systems	S Sargent <i>Queen Elizabeth Medical Centre, UK</i>	497
A common approach to a variety of clinical laboratories	D R Mace <i>London Hospital, UK</i>	509

SIGNAL PROCESSING

A 128-channel electrocardiographic data acquisition system	P Block et al <i>University Hospital Jette, Belgium</i>	521
Features to segmentate EEG recordings a comparative study	B H Jansen et al <i>Free University, Netherlands</i>	533
ABSCESS - a system for the analysis by small computer of EEG signals in a clinical setting	B B MacGillivray et al <i>Royal Free Hospital, UK</i>	545

IX

Computer analysis of motor unit discharge patterns	L Philipson <i>Lund University Hospital, Sweden</i>	555
Neurophysiological signals averaging stimuli minimization	J Villalobos X Majem <i>Clinica Corachan, Spain</i>	565
Computerized determination of lung function parameters	L H van Montfort <i>et al</i> <i>State University of Groningen, Netherlands</i>	575

HEALTH CARE PLANNING

National policy and co-ordination of health care EDP in Finland	I Linnakko <i>et al</i> <i>National Board of Health, Finland</i>	581
The impact of computer technology on health care	J A Dinklo <i>Philips' Medical Systems, Netherlands</i>	589
A study of the demands made on casualty services by the population of socially deprived areas	J A Farrer <i>et al</i> <i>Royal Lancaster Infirmary, UK</i>	597
Monitoring of alimentary and respiratory infections	J Radkovsky <i>Institute of Social Medicine & Organization of Health Services, Czechoslovakia</i>	604
The transfer of outpatient clinics to rural hospitals: a feasibility study and cost-benefit analysis	I T Russell <i>et al</i> <i>University of North Carolina, USA</i>	613
Models, information systems and the management of health care organizations	G A Gorry <i>Baylor College of Medicine, USA</i>	623

TRANSFERABILITY

The patient-service scheduling system at the Dresden Medical Academy and its further development on the basis of an ESER EDPS	W D Grimm <i>Medizinische Akademie 'Carl Gustav Carus', E Germany</i>	633
---	--	-----

TREATMENT

A computer program for calculating intravenous feeding regimens and its application in a teaching hospital and a district general hospital	G Shearing <i>et al</i> <i>University of Newcastle-upon-Tyne, UK</i>	641
Compliance aspects of a computer-assisted anticoagulation control system	A M Vossepoel <i>Leiden University Medical Centre, Netherlands</i>	651

SPECIAL INTEREST PAPERS

- | | | |
|--|---|-----|
| Is a large computer system of value
in the intensive care unit? | A E S Goh
B Richards
<i>UMIST, UK</i> | 657 |
| The strategic analyses and initial
implementation of the shared hospital
information system | A Gunji
<i>Ministry of Health and
Welfare, Japan</i> | 663 |
| On-line support for basic medical
information in a large university
hospital | R Klar et al
<i>Universität Göttingen,
Germany</i> | 671 |
| An approach to efficient on-line mass
storage of physiological parameters
in an intensive care environment | H Schillings et al
<i>Universität Göttingen,
Germany</i> | 679 |

EVALUATION

- | | | |
|--|---|-----|
| A new approach to evaluation in the
NHS experimental computer programme | B W H Molteno
<i>Trent Regional Health
Authority, UK</i> | 691 |
| New tools for evaluation : their
application to computers | R Rosser
<i>Charing Cross Hospital
Medical School, UK</i>
T Benson
<i>Charing Cross Hospital, UK</i> | 701 |
| Evaluation of the diaphane dialysis
registry | P Degoulet et al
<i>INSERM, France</i> | 711 |

NURSING

- | | | |
|--|--|-----|
| The relationship between nursing and
medical informatics | K J Hannah
<i>University of Calgary, Canada</i> | 721 |
| Nursing intervention scoring system :
a concept for management, research and
communication | A G Greenburg et al
<i>Veterans Administration
Hospital, USA</i> | 729 |
| Implementation of a patient
monitoring system at Herlev Hospital | B S Nielsen
P Andersen
<i>Copenhagen County Hospitals,
Denmark</i> | 739 |

INDEXING AND ADMINISTRATIVE SYSTEMS

- | | | |
|---|--|-----|
| A review of the national standard
child health computer system and its
potential benefits | J S Parkinson
<i>Welsh Health Technical Services
Organisation, UK</i> | 745 |
| A review of the use of computers in
hospital and community indexes in
the United Kingdom | J R Bryant
S M Fenlon
<i>Addenbrooke's Hospital, UK</i> | 757 |

XI

Computerized support of activities and identification of related data in Kiel KIS	G Griesser M Jainz <i>Hospital of Christian- Albrecht, Germany</i>	767
Computer system for blood donors' management	J Vaqué <i>Ciudad Sanitaria de la Seguridad Social, Spain</i>	775
Feed-back in an obstetric data base	O J S van Hemel et al <i>St Hippolytus Hospital, Netherlands</i>	783
Replicable, multi-purpose patient index systems - an analysis of some necessary features	A R Wills <i>London Hospital, UK</i>	797
Author Index		813
Subject Index		819
