

Contents

1	Introduction	1
1.1	Aims of the Study	2
1.2	The Cardiac Vascular Systems: The Coronary Arteries and Cardiac Veins	2
2	The Significance of the Proper Vessels of the Human Heart in Statistics and Diagnostics . . .	5
2.1	Angiography	6
2.2	MR Imaging	7
2.3	Ultrafast MR Imaging	7
2.4	Coronary MR Angiography	7
2.5	Conventional and Ultrafast Computed Tomography (Cardio-CT)	8
3	Nomenclature	9
3.1	English and Latin Versions	9
3.2	Abbreviations	12
3.3	Commonly Used Unofficial or Alternative Terms and Synonyms	13
4	Results and Discussions	15
4.1	The Anatomy of Coronary Arteries in General	15
4.1.1	The Right Coronary Artery	18
4.1.2	The Conus Branch	18
4.1.3	Further Ramification of the Right Coronary Artery	19
4.1.4	The Posterior Interventricular Artery	20
4.1.5	Segmentation of the Right Coronary Artery . . .	20
4.1.6	The Left Coronary Artery	21
4.1.7	The Anterior Interventricular Artery	27
4.1.8	The Median (Intermedian) Branch	28
4.1.9	The Circumflex Artery	28
4.2	Peculiarities of the Origin of the Coronary Arteries . .	29
4.2.1	The Location of the Right and Left Coronary Orifices in the Aortic Sinuses	29
4.2.2	The Lengths and Diameters of the Major Coronary Arteries	32

4.2.3	Three-Dimensional Orientation on the Coronary Stems, Angles of Origin of the Coronary Arteries and Angle of Division of the LCA	33
4.2.4	Variable and Anomalous Coronary Ostia and Courses	34
4.2.5	Limited Number of Coronary Ostia: A Single Ostium for a Single Coronary Artery in the Left or Right Aortic Sinus	35
4.2.6	Greater Number of Ostia in the Left and Right Aortic Sinus	38
4.2.7	Aberrant or Ectopic (Superior) Origin, “High Take-off” of a Coronary Artery	41
4.2.8	Deep (Inferior) Origin, “Low Take-Off” of a Coronary Artery	43
4.3	Coronary Dominance or Preponderance	45
4.3.1	Balanced or Intermediate Type of Coronary Distribution	47
4.3.2	Dominant Right Coronary Artery	48
4.3.3	Dominant Left Coronary Artery	48
4.4	Intramural (Intramyocardial) and Intraluminal Courses of the Coronary Arteries	52
4.4.1	Intramural Courses of Ventricular Branches	53
4.4.2	Long Intramural Courses	53
4.4.3	Subendocardial, Intraluminal, or Intracavitary Courses	55
4.5	Atrial Branches and the Arterial Supply of the Conduction System	55
4.5.1	The Arterial Supply of the Sinuatrial Node	56
4.5.2	Arterial Supply of Interatrial and Internodal Pathways	58
4.5.3	Arterial Supply of the Atrioventricular Node	58
4.5.4	Arterial Supply of the Common AV Bundle and Proximal Right and Left Bundle	60
4.5.5	The Extracardiac Noncoronary Arteries	61
4.6	Arterial Supply of the Interventricular Septum	64
4.6.1	The Anterior Interventricular Septal (Perforator) Branches	64
4.6.2	The Left Superior Septal Branch or First Anterior Septal Branch	69
4.6.3	The Posterior Interventricular Septal Branches	69
4.6.4	The Right Superior Septal Branch	70
4.6.5	Arterial Supply of the Right Bundle and Moderator Band	70
4.6.6	The Arterial Supply of the Papillary Muscles	71
4.7	Blood Supply to the Coronary Arteries (Vasa Vasorum)	72

4.8	Coronary Anastomoses and Collaterals	72
4.8.1	Anastomoses in the Ventricular Walls	75
4.8.2	Anastomoses in the Atrial Walls	75
4.8.3	Endomural (Subendocardial) Anastomoses . . .	75
4.8.4	Intracoronary (Homocoronary) Anastomoses .	76
4.8.5	Intercoronary Anastomoses and Collaterals . . .	76
4.8.6	Noncoronary Extracardiac Anastomoses to Atrial Arteries	77
4.8.7	The Significance and Evaluation of Anatomically or Angiographically Demonstrated Anastomoses and Collaterals	78
4.8.8	Collaterals in Patients with Ostial and Coronary Spasm	80
4.9	The Coincidence of Coronary Artery Anomalies and Atherosclerosis	80
4.9.1	Anomalous Coronary Arteries with Aortic Origin	80
4.9.2	Anomalous Coronary Arteries with Pulmonary Trunk Origin	81
4.10	Age-Related and Atheromatous Coronary Calcifications	81
4.10.1	Coronary Calcifications	81
4.10.2	Age-Related (Nonatheromatous) Calcifications in the Coronary Arteries	82
4.10.3	Atheromatous Calcifications in the Coronary Arteries	82
4.10.4	Coronary Calcifications in Heart Specimens of Subjects from the Dissection Room	83
4.10.5	Evaluation and Measurement of Calcifications .	83
4.10.6	Multiple Coronary Aneurysmata	87
4.11	Anatomical Aspects of Surgical Interventions in Coronary Atherosclerosis	87
4.11.1	Surgical Treatment of Coronary Atherosclerosis	87
4.11.2	Aorto-Coronary Bypass: Sites of Aortic Anastomoses	88
4.11.3	Aorto-Coronary Bypass: Sites of Coronary Artery Anastomoses	88
5	Concluding Remarks	89
5.1	Individual Coronary Anatomy	89
5.1.1	Coronary Artery Dominance	89
5.1.2	Right Ventricular Branches of the AIA	90
5.1.3	Atrial Branches	90
5.1.4	Unusual Short Stem of the LCA	91
5.1.5	Normally or Anomalously Coursing Coronary Arteries in Valve Surgery	91
5.1.6	Single Coronary Artery	91

5.1.7 Multiple Ostia in the Aortic Sinuses 92

5.1.8 Ectopic “High” Origin 92

5.1.9 Ectopic “Deep” Origin 92

5.1.10 Myocardial Bridge and Intramyocardial
(Intramural) Course 92

5.1.11 Interventricular and Coronary Sulci Without
an Epimural Artery 93

5.1.12 Intra-, Inter-, and Noncoronary Extracardiac
Anastomoses and Collaterals 93

5.1.13 Coronary Artery Calcification 94

5.1.14 Evaluation and Interpretation 95

6 Summary 97
