Foreword — VII

Abstract — XI

1 Introduction — 1

2 Several definitions and statements of Mathematics with Observers — 4

Sets W_n and W_n -observers — 4

Arithmetic operations on numbers – elements $\in W_n$ — 4

Probability — 6

Space $E_m W_n$ — 7

Definitions of derivatives — 8

Integral definitions — 8

Complex numbers — 9

Elements of arithmetic in Mathematics with Observers — 10

Elements of linear algebra in Mathematics with Observers:

space $E_m W_n$ — 11

Elements of linear algebra: scalar product in $E_m W_n$ — 12

Elements of linear algebra: vector product in $E_3 W_n$ — 13

Elements of mathematical analysis: derivatives' relations — 14

Elements of mathematical analysis: integral relations — 17

3 Observability and Maxwell electrodynamic equations — 21

4 Observability, vector fields and differential forms — 25

5 Observability and Yang–Mills equations — 39

6 Observability and operations on matrices — 58

7 Observability and matrix Lie groups — 67

Observability and matrix Lie groups $\mathbf{GL}(p, \mathbb{C})$ and $\mathbf{GL}(p, \mathbb{R})$ — 72

Observability and matrix Lie groups $\mathbf{SL}(p, \mathbb{C})$ and $\mathbf{SL}(p, \mathbb{R})$ — 83

Observability and matrix Lie groups $\mathbf{O}(p)$ and $\mathbf{SO}(p)$ — 94

Observability and matrix Lie groups $\mathbf{U}(p)$ and $\mathbf{SU}(p)$ — 97

Observability and matrix Lie group $\mathbf{U}(1)$ — 100

Observability and matrix Lie group $\mathbf{SU}(2)$ — 101

Observability, matrix Lie group $\mathbf{SU}(3)$ and color — 105

Observability and matrix Lie group $\mathbf{SU}(5)$ — 109

Observability and spins — 115

Observability and symmetry — 127
Observability and the Lorentz group — 136
Observability and the Poincaré group — 139

8 Observability and matrix Lie algebras — 144

Observability and matrix Lie algebra $\mathbf{M}(p, \mathbb{R})$ — 147
Observability and matrix Lie algebras $\mathbf{M}(p, \mathbb{C})$ — 152
Observability and matrix Lie algebras $\mathbf{sl}(p, \mathbb{R})$ — 152
Observability and matrix Lie algebras $\mathbf{sl}(p, \mathbb{C})$ — 156
Observability and matrix Lie algebras $\mathbf{so}(p)$ — 157
Observability and matrix Lie algebras $\mathbf{u}(p)$ — 159
Observability and matrix Lie algebras $\mathbf{su}(p)$ — 162
Observability, matrix Lie algebra $\mathbf{su}(3)$ and color — 164

9 Observability and mass gap in special relativity — 169

Lorentz transformation in classic mathematics and Mathematics with
Observers — 169
Observability and mass gap — 179

10 Observability and particle physics — 190

$\mathbf{U}(1) - 1$ — 190
 $\mathbf{U}(1) - 2$ — 191
 $\mathbf{SU}(2) - 1$ — 191
 $\mathbf{SU}(2) - 2$ — 193
 $\mathbf{SU}(2) \times \mathbf{U}(1)$ — 196
Higgs field — 197
 $\mathbf{SU}(3)$ — 197
 $\mathbf{SU}(2), \mathbf{SU}(3)$ — 199
 $\mathbf{SU}(3) \times \mathbf{SU}(2) \times \mathbf{U}(1)$ — 199
 $\mathbf{SU}(5)$ — 199
 \mathbf{L}, \mathbf{P} — 200
 \mathbf{SM} — 201

**11 Review of Mathematics with Observers main publications in Contemporary
Physics — 203**

Bibliography — 207

Index — 209

About the author — 213
