# Contents

<b>1</b>	<b>Introduction to Lie groups and their representations</b>	<b>1</b>
1.1	Basic definitions	1
1.2	Lie groups and Lie algebras	6
1.2.1	Linear Lie groups	9
1.2.2	Real Lie algebras	12
1.3	Semi-simple Lie algebras and their representations	16
1.3.1	Classification of real semi-simple Lie algebras	17
1.3.2	Representations of semi-simple Lie algebras and linear Lie groups	22
<b>2</b>	<b>The rotation group</b>	<b>27</b>
2.1	Basic properties	27
2.2	Infinitesimal transformations and Lie algebras of the rotation group	32
2.3	Irreducible representations of $SO(3)$ and $SU(2)$	33
2.4	Matrix representations of the rotation operators	37
2.5	Addition of angular momenta and Clebsch-Gordan coefficients	39
	Problems	41
<b>3</b>	<b>The homogeneous Lorentz group</b>	<b>43</b>
3.1	Basic properties	43
3.2	The proper orthochronous Lorentz group $\mathcal{L}_+^\dagger$	46
3.3	Lie algebra of the group $\mathcal{L}_+^\dagger$	51
3.4	Irreducible representations of the group $\mathcal{L}_+^\dagger$	54
3.5	Irreducible representations of the complete Lorentz group	57
	Problems	60
<b>4</b>	<b>The Poincaré transformations</b>	<b>61</b>
4.1	Group properties	61
4.2	Unitary representations of the proper orthochronous Poincaré group	64

Problems .....	70
<b>5 One particle and two particle states .....</b>	<b>71</b>
5.1 The little group .....	71
5.2 States of a massive particle .....	73
5.3 States of a massless particle .....	76
5.4 States of two particles .....	79
5.5 The $\ell$ - $s$ coupling scheme .....	81
Problems .....	82
<b>6 Discrete operations .....</b>	<b>83</b>
6.1 Space inversion .....	83
6.2 Parity invariance .....	88
6.3 Time reversal .....	90
Problems .....	94
<b>7 Relativistic equations .....</b>	<b>97</b>
7.1 The Klein-Gordon equation .....	97
7.2 Extension to higher integer spins .....	100
7.3 The Maxwell equations .....	101
7.4 The Dirac equation .....	104
7.5 The Dirac equation for massless particles .....	108
7.6 Extension to higher half-integer spins .....	110
Problems .....	112
<b>8 Unitary symmetries .....</b>	<b>113</b>
8.1 Introduction .....	113
8.2 Generalities on symmetries of elementary particles .....	115
8.3 $U(1)$ invariance and Additive Quantum Numbers .....	117
8.4 Isospin invariance .....	120
8.4.1 Preliminary considerations .....	121
8.4.2 Isospin classification of hadrons .....	124
8.5 $SU(3)$ invariance .....	128
8.5.1 From $SU(2)$ to $SU(3)$ .....	129
8.5.2 Irreducible representations of $SU(3)$ .....	131
8.5.3 Lie algebra of $SU(3)$ .....	135
8.5.4 $SU(3)$ classification of hadrons .....	137
8.5.5 $I$ -spin, $U$ -spin and $V$ -spin .....	146
8.5.6 The use of $SU(3)$ as exact symmetry .....	149
8.5.7 The use of $SU(3)$ as broken symmetry .....	153
8.6 Beyond $SU(3)$ .....	157
8.6.1 From flavor $SU(3)$ to color $SU(3)$ .....	158
8.6.2 The combination of internal symmetries with ordinary spin .....	159
8.6.3 Extensions of flavor $SU(3)$ .....	162

Problems	167
<b>9 Gauge symmetries</b>	169
9.1 Introduction	169
9.2 Invariance under group transformations and conservation laws	171
9.3 The gauge group $U(1)$ and Quantum Electrodynamics	175
9.4 The gauge group $SU(3)$ and Quantum Chromodynamics	176
9.5 The mechanism of spontaneous symmetry breaking	181
9.5.1 Spontaneous symmetry breaking of a discrete symmetry	181
9.5.2 Spontaneous symmetry breaking of a continuous global symmetry	184
9.5.3 Spontaneous symmetry breaking of a gauge symmetry: the Higgs mechanism	187
9.6 Spontaneous breaking of the chiral symmetry of QCD	189
9.7 The group $SU(2) \otimes U(1)$ and the electroweak interactions	192
9.7.1 Toward the unification of weak and electromagnetic interactions	192
9.7.2 Properties of the gauge bosons	196
9.7.3 The fermion sector of the Standard Model	199
9.8 Groups of Grand Unification	206
Problems	211
<b>A Rotation matrices and Clebsch-Gordan coefficients</b>	213
A.1 Reduced rotation matrices and spherical harmonics	213
A.2 Clebsch-Gordan coefficients	215
<b>B Symmetric group and identical particles</b>	219
B.1 Identical particles	219
B.2 Symmetric group and Young tableaux	220
<b>C Young tableaux and irreducible representations of the unitary groups</b>	225
C.1 Irreducible tensors with respect to $U(n)$	225
C.2 Irreducible tensors with respect to $SU(n)$	228
C.3 Reduction of products of irreducible representations	232
C.4 Decomposition of the IR's of $SU(n)$ with respect to given subgroups	233
<b>Solutions</b>	237
<b>Bibliography</b>	281
<b>Index</b>	287
