

Contents

Foreword — V

Chapter 1

Historical development and basic ideas — 1

Chapter 2

Economic concepts in the context of sustainability — 19

- 2.1 Value creation and supply chains — 19
- 2.1.1 Supply chains — 20
- 2.1.2 Technological progress in value chains – a dilemma — 21
- 2.2 Circular economy — 22
- References — 23

Chapter 3

Business and sustainability — 25

- 3.1 Business models — 25
- 3.2 Sustainability — 26
- 3.3 Sustainable business models — 28
- 3.4 Schools offering theories on ecologically sustainable business models — 30
- 3.4.1 Natural Capitalism — 32
- 3.4.2 Blue Economy — 33
- 3.4.3 Regenerative design — 34
- 3.5 Criteria for evaluation and benchmarking for economic sustainability — 35
- References — 45

Chapter 4

Life Cycle Assessment (LCA) and footprints — 48

- 4.1 Introduction — 48
- 4.2 Steps to take in the standardised LCA process — 49
- 4.3 Footprints — 54
- 4.3.1 Environmental footprint — 55
- 4.3.2 Social KPIs/footprints — 65
- 4.3.3 Governance KPI/footprints — 76
- References — 79

Chapter 5

CO₂ footprint: assessment, calculation, reduction — 83

- 5.1 CO₂ footprints — **83**
 - 5.1.1 Approach to practically assess and influence (CO₂) footprints — **86**
 - 5.1.2 Accuracy of footprints — **101**
 - 5.1.3 Examples — **115**
 - 5.1.4 Example: a large format printer — **120**
 - 5.1.5 Printing on . . . example: print on different substrates — **126**
 - 5.1.6 Example: backing oven — **137**
 - 5.1.7 Example: digital newspaper — **141**
 - 5.1.8 Work in offices and use of computers with local and cloud-based storage — **152**
- 5.2 Carbon credits: managing the reduction of the carbon footprint — **155**
- 5.3 Summary — **162**
 - References — **164**

Chapter 6

Ecodesign — 172

- Design briefing — **174**
- 6.1 Framework — **175**
- 6.2 Tool kits — **176**
 - 6.2.1 MET matrix — **176**
 - 6.2.2 Ecodesign-strategy wheel (LiDS-Wheel) — **177**
 - 6.2.3 Ecodesign check lists — **180**
 - 6.2.4 Ten golden rules to ecodesign — **182**
- 6.3 Ecodesign: a “high-level” example — **183**
 - 6.3.1 Introduction — **183**
 - 6.3.2 Approach — **183**
 - 6.3.3 Starting point — **184**
 - 6.3.4 Product life cycles and circular economy — **184**
 - 6.3.5 Recommendations on ecodesign and management for circular economy — **185**
 - 6.3.6 Ecodesign guidelines — **189**
 - 6.3.7 Eco-management guidelines — **189**
 - 6.3.8 Recommendations for the management of environmental impacts — **189**
 - 6.3.9 Sustainable approaches to resource management — **195**
 - 6.3.10 Order initiator supply chain checklist — **195**
 - References — **198**

Chapter 7**Life cycle assessment of an organisation — 199**

- 7.1 Introduction — 199
- 7.2 General approach — 201
- Priority principle — 202
- References — 206

Chapter 8**Energy and material strategy — 207**

- 8.1 Material strategy — 207
- 8.1.1 Accounting and return logistics — 207
- 8.1.2 Material recycling as a business model: an example — 213
- 8.2 Energy-related strategy — 216
- References — 217

Chapter 9**Internal stakeholders — 218**

- 9.1 Manufacturing and logistics — 219
- 9.2 Research and development — 223
- 9.3 Facility management — 227
- 9.4 Procurement — 230
- 9.5 Marketing — 233
- 9.6 Quality management — 238
- 9.7 Health and safety — 242
- 9.8 Legal — 243
- 9.9 Distribution and logistics — 244
- 9.10 Field service — 245
- 9.11 Duties of stakeholders — 246
- References — 250

Chapter 10**Audits — 251**

- 10.1 General: environmental audits — 251
- 10.2 Audits of non-financial reporting — 253
- 10.3 Questionnaires — 260
- References — 261

Chapter 11

Reporting, legal requirements and risk assessment — 263

- 11.1 Reporting — **263**
 - 11.1.1 Reporting obligation: sustainability information in Non-Financial Reporting — **264**
 - 11.1.2 International reporting standards — **269**
 - 11.1.3 Rating of reports — **273**
- 11.2 Legal requirements for sustainable work — **276**
 - 11.2.1 UN sustainability development goals — **278**
 - 11.2.2 The role of the industry — **279**
 - 11.2.3 EU legislation — **282**
 - 11.2.4 The Non-Financial Reporting Directive (NFRD) and the corporate sustainability directive (CSRD) — **282**
 - 11.2.5 German act on corporate due diligence in supply chains (supply chain due diligence act – Lieferkettensorgfaltspflichtengesetz LKsG) — **287**
 - 11.2.6 EU taxonomy directive — **289**
 - 11.2.7 EU emission trading system (ETS)/carbon border adjustment mechanism — **292**
 - 11.2.8 Ecodesign directive — **293**
- 11.3 Risk assessment — **295**
 - 11.3.1 Probability — **296**
 - 11.3.2 Types of risks — **297**
 - 11.3.3 Classification of risks implicitly suggested by reporting structures — **300**
 - 11.3.4 Risk matrix — **303**
 - 11.3.5 Example: risks linked to emissions — **304**
- References — **310**

Chapter 12

Information and transparency — 311

- 12.1 Communication with employees — **311**
- 12.2 Communication with the public — **312**
- 12.3 Communication with customers — **314**
- 12.4 Communication with share holders — **318**
- 12.5 Communication with partners — **320**
- 12.6 Corporate sustainability report — **321**
- 12.7 Environmental policy — **323**
- References — **324**

Chapter 13

Perspectives — 326

- 13.1 The Paris Agreement and the 2 °C target — **326**
- 13.2 Tipping points — **328**

13.3	GDP until 2050 —	329
13.4	Expanding legal frameworks —	331
13.4.1	Legal disputes and court proceedings —	334
13.4.2	Time and responsibility in the context of sustainability —	334
13.5	Responsibility —	336
13.5.1	Responsibility in the context of the six nations —	337
13.5.2	Socialisation of technologies —	337
13.6	Recycling and innovation —	349
13.6.1	Innovation —	351
13.7	Summarising thoughts —	351
	References —	353
