1 Embryology of the Cranial Circulation	1
Preamble	1
1.1 Definitions of Terms Used in Embryology	1
1.1.1 General Concepts in Vessel Development	2
1.2 Development of the Cranial Arteries	2
1.2.1 Precaudal Stage	2
1.2.2 Choroidal Stage	3
1.2.3 Branchial Stage	3
1.2.4 Development of the Primitive Internal Carotid Artery and Cerebral Blood Supply	4
1.2.5 Variants to the Adult Pattern of the Carotid System	8
1.2.6 Role of the Stapedial Artery	9
1.2.7 Development of the Ophthalmic Artery	10
1.2.8 Cavernous Sinus Region	13
1.2.9 The Inner and Middle Ear Arteries and Their Variants	15
1.2.10 Vertebrobasilar and Caroticobasilar Persistences	15
1.3 Development of Cerebral Veins	20
1.3.1 Dural Sinuses	20
1.3.2 Deep Veins	21
References	22
Suggested Readings	22
2 Cranial Arterial Anatomy	23
Preamble	23
Cerebral Arterial Blood Supply	24
2.1 Internal Carotid Artery (ICA)	24
2.1.1 The ICA Cervical Portion	24
2.1.2 The ICA Petrous Portion	24
2.1.3 The ICA Cavernous Portion	25
2.1.4 The ICA Intradural Portion	27
2.2 The Terminal Branches of the Internal Carotid Artery	28
2.2.1 Anterior Cerebral Artery (ACA)	28
2.2.2 Middle Cerebral Artery (MCA)	32
2.3 The Vertebrobasilar System	35
2.3.1 Vertebral Artery (VA)	35
2.3.2 Basilar Artery (BA)	37
2.3.3 Posterior Cerebral Artery (PCA)	39

2.4	The External Carotid Artery (ECA).....	42
2.4.1	Superior Thyroid Artery.....	43
2.4.2	Lingual Artery.....	43
2.4.3	Ascending Pharyngeal Artery (APA).....	43
2.4.4	Facial Artery (FA).....	45
2.4.5	Occipital Artery (OA).....	46
2.5	Terminal Branches of the External Carotid Artery.....	47
2.5.1	Superficial Temporal Artery (STA).....	47
2.5.2	Internal Maxillary Artery (IMA).....	47
	References.....	51
	Suggested Readings.....	51
3	Cranial Venous Anatomy.....	53
	Preamble.....	53
3.1	Extracranial Veins.....	54
3.1.1	Scalp Veins.....	54
3.1.2	Veins of the Face and Neck.....	54
3.2	Intracranial Veins.....	59
3.2.1	Diploic Veins.....	59
3.2.2	Emissary Veins.....	59
3.2.3	Meningeal Veins.....	59
3.2.4	The Dural Sinuses.....	60
3.3	The Cerebral Veins.....	63
3.3.1	The Supratentorial Superficial (Cortical) Veins.....	63
3.3.2	The Supratentorial Deep Veins.....	65
3.3.3	Veins of the Posterior Fossa.....	67
	Suggested Readings.....	69
4	Spinal Vascular Anatomy.....	71
	Preamble.....	71
4.1	Embryology of Spinal Arteries.....	71
4.1.1	Primitive Segmental Arteries.....	71
4.1.2	The Vasa Corona and Longitudinal Neural Arteries ..	72
4.1.3	Formation of the Anterior Spinal Artery, Desegmentation and Multimetameric Arteries	73
4.1.4	Development of Craniocervical Arteries.....	73
4.2	The Spinal Arteries.....	74
4.2.1	The Basic Adult Pattern of Extradural Arteries.....	74
4.3	Arterial Supply to the Spinal Cord.....	75
4.3.1	Radicular Arteries.....	76
4.3.2	Radiculopial Arteries.....	76
4.3.3	Radiculomedullary Arteries.....	77
4.3.4	The Anterior Spinal Artery (ASA).....	77
4.4	Intrinsic Arteries of the Spinal Cord.....	78
4.4.1	Sulcal Arteries.....	78
4.4.2	Radial Perforators.....	78
4.5	The Extradural Spinal Multimetameric Spinal Arteries	78
4.5.1	Arteries Supplying the Cervical Spine.....	78
4.5.2	Arteries Supplying the Thoracic Spine.....	80

4.5.3	Arteries Supplying the Lumbar Spine	80
4.5.4	Arteries Supplying the Sacral Spine	80
4.6	Venous Drainage of the Spinal Cord	80
4.6.1	Veins of the Spinal Cord	80
4.6.2	Epidural Venous Plexus (Internal Vertebral Plexus) . . .	82
4.6.3	External Vertebral Plexus	82
	References	82
	Suggested Readings	82
5	Control of Cerebral Blood Flow	83
	Preamble	83
5.1	Cerebral Intolerance of Hypoperfusion	83
5.1.1	Cerebral Protection of Blood Flow	84
5.1.2	Vascular Resistance	84
5.2	The Blood–Brain Barrier	85
5.2.1	Other Distinguishing Physiological Responses of Cerebral Vessels	85
5.3	Autoregulation	86
5.3.1	The Myogenic Response	87
5.3.2	Metabolic Responses	88
5.4	Neurogenic Influences	90
5.4.1	Sympathetic Innervation	90
5.4.2	Parasympathetic Innervation	91
5.4.3	Sensory Innervation	92
5.4.4	Pericytes	92
5.5	Ascending Vasodilation and Limiting Intracerebral Steal . . .	92
5.6	Posture and Its Effects on Cerebral Blood Flow	93
5.7	Results Depend upon the Experimental Technique Used . . .	94
5.8	Summary of Cerebral Blood Flow Control	95
	References	95
6	Control of Intravascular Thrombosis	97
	Preamble	97
6.1	Blood Coagulation	97
6.2	Anticoagulation Therapy	98
6.2.1	Warfarin	98
6.2.2	Heparin	98
6.2.3	Practical Aspects of Anticoagulation	99
6.2.4	Thrombophilia	100
6.2.5	Complications of Anticoagulation	100
6.3	Antiplatelet Therapy	103
6.3.1	Aspirin	103
6.3.2	Thienopyridine Agents	103
6.3.3	Clopidogrel	104
6.3.4	Glycoprotein IIb/IIIa Receptor Inhibitors	105
6.4	Thrombolytic Therapy	105
6.4.1	Myocardial Infarction	105
6.4.2	Pulmonary Embolus	106
6.4.3	Treatment of Thrombosis of Peripheral Arteries	106

6.4.4	Deep Vein Thrombosis	106
6.4.5	Complications of Thrombolytic Therapy	106
6.4.6	Reversal of Fibrinolysis	106
6.5	Prevention of Venous Thromboembolism	107
7	Cranial Anastomoses and Dangerous Vascular Connections . . .	109
	Preamble	109
7.1	Anastomoses Between Superficial Anterior Branches of the ECA	111
7.1.1	Anastomotic Zones of the Face and Pharynx.	112
7.2	Anastomoses Between Deep Anterior Branches of the ECA.	113
7.2.1	Anastomotic Zones of the Skull Base	115
7.3	Anastomoses Between Posterior Branches of the External Carotid Artery	119
7.3.1	Anastomotic Zones of the Craniocervical Junction and Posterior Cranium	121
7.4	Arterial Supply to the Cranial Nerves	123
	References.	124
	Suggested Readings	124
8	Arterial Aneurysms	125
8.1	Arterial Aneurysms: Part 1	125
	Preamble	125
8.1.1	History of Intracranial Aneurysms	126
8.1.2	Definitions of Intracranial Aneurysms	126
8.1.3	Aetiology	128
8.1.4	Pathology of Intracranial Aneurysms.	132
8.1.5	Epidemiology of Intracranial Aneurysms	134
8.1.6	Factors Identified as Increasing the Risk of Aneurysmal Subarachnoid Haemorrhage	138
8.1.7	Screening for Intracranial Aneurysms	141
8.2	Arterial Aneurysms: Part 2	143
	Preamble	143
8.2.1	Aneurysmal Subarachnoid Haemorrhage.	143
8.2.2	Endovascular Treatments of Intracranial Aneurysms	153
	References.	160
9	Vascular Malformations of the Brain	169
9.1	Vascular Malformations of the Brain: Part 1	169
	Preamble	169
9.1.1	Definitions of Arteriovenous Malformations	169
9.1.2	Classifications of Cerebral Vascular Malformations . .	170
9.1.3	Capillary Telangiectasia	170
9.1.4	Venous Angioma	171
9.1.5	Cavernous Malformations	172
9.1.6	Brain Arteriovenous Malformations (BAVM)	174

9.2	Arteriovenous Malformations of the Brain: Part 2	179
	Preamble	179
9.2.1	Prognosis and Risk of Haemorrhage	179
9.2.2	Angioarchitecture	180
9.2.3	Treatments	184
	References	189
10	Cranial Dural Arteriovenous Fistulas	195
	Preamble	195
10.1	Definition	195
10.1.1	History	195
10.1.2	Aetiology	196
10.1.3	Epidemiology and Demographics	196
10.1.4	Pathology	196
10.2	Clinical Consequences	196
10.2.1	Classifications	196
10.2.2	Locations and Clinical Presentations	198
10.2.3	Risks of Haemorrhage	198
10.2.4	Imaging	198
10.3	Management	200
10.3.1	Indications for Treatment	200
10.3.2	Aims of Treatment	200
10.3.3	Treatment	200
10.4	Treatment Results	203
10.4.1	Endovascular Treatment Results	204
	References	204
11	Endovascular Management of Carotid Cavernous Fistulas	207
	Preamble	207
11.1	Definition	207
11.1.1	Aetiology	208
11.1.2	Anatomy of the Cavernous Sinus	209
11.2	Diagnosis	209
11.2.1	Clinical Symptoms and Signs	209
11.2.2	Imaging Diagnosis	211
11.3	Treatment	212
11.3.1	Aims of Treatment	212
11.3.2	Risks and Benefits of Balloon Embolisation	212
11.3.3	Preprocedure Assessment	213
11.3.4	Endovascular Treatments	213
	References	216
12	Vein of Galen and Non-Galenic Cerebral Arteriovenous Fistulas	219
	Preamble	220
12.1	Arteriovenous Fistulas Involving the Vein of Galen	220
12.1.1	History of the Definition of the Vein of Galen Malformation	220

12.1.2	Embryology	220
12.1.3	Early Descriptions of the Vein of Galen Malformation	221
12.1.4	Current Descriptions of the Vein of Galen Malformation	222
12.1.5	Distinguishing Features of Choroidal and Mural Types of VOGMs	223
12.2	Presentation of Arteriovenous Fistulas in Neonates and Children	223
12.2.1	Pathology of Vein of Galen Malformation	224
12.2.2	Incidence/Epidemiology/Natural History	225
12.2.3	Imaging Assessments	225
12.2.4	Endovascular Treatment	226
12.2.5	Other Interventions for Vein of Galen Malformations	227
12.2.6	Outcomes of Interventions	228
12.3	Non-Galenic Arteriovenous Fistulas	228
12.3.1	Epidemiology	228
12.3.2	Clinical Presentations	229
12.3.3	Imaging	229
12.3.4	Treatments	229
	References	229

13	Vascular Malformations of the Spinal Cord	231
	Preamble	231
13.1	History	232
13.2	Spinal Vascular Malformations	232
13.2.1	Symptoms and Modes of Presentation	232
13.2.2	Classifications	233
13.3	Dural Arteriovenous Fistulas (DAVFs)	233
13.3.1	Aetiology and Pathophysiology	233
13.3.2	Presentation	233
13.3.3	Imaging	234
13.3.4	Endovascular Treatment	234
13.3.5	Treatment Results and Complications	234
13.4	Intradural Perimedullary Fistulas	235
13.4.1	Aetiology and Pathophysiology	235
13.4.2	Presentation and Natural History	235
13.4.3	Endovascular Treatment	235
13.4.4	Treatment Results and Complications	236
13.5	Intramedullary Arteriovenous Malformations	236
13.5.1	Aetiology and Pathophysiology	236
13.5.2	Clinical Features and Natural History	237
13.5.3	Imaging	237
13.5.4	Treatment Results and Complications	237
13.6	Spinal Aneurysms	238
13.7	Metameric Syndromes	238
13.8	Cavernous Malformations	238

14 Head and Neck Vascular Lesions	243
Preamble	243
14.1 Classification of Vascular Tumours of the Head and Neck in Children	244
14.1.1 General Principles of Management of the Infant/Child with a Vascular Malformation	244
14.1.2 Assessment Prior to Treatment of Haemangiomas and Vascular Malformations.	244
14.2 Haemangiomas.	245
14.2.1 Infantile Haemangiomas.	245
14.2.2 Adult Haemangiomas.	246
14.2.3 Management.	246
14.3 Vascular Malformations.	247
14.3.1 Clinical Features.	247
14.3.2 Types of Vascular Malformations.	248
14.4 Other Extracranial Tumours in the Head and Neck Amenable to Embolisation.	254
14.4.1 Cervical Paragangliomas	254
14.4.2 Thyroid Gland Tumours	255
14.4.3 Other Craniofacial Tumours	256
References.	256
15 Embolisation of Intracranial and Skull Base Tumours	259
Preamble	259
15.1 Protocol for Embolisation of Intracranial and Skull Base Tumours	260
15.1.1 Indications for Embolisation	260
15.1.2 Aims of Embolisation.	260
15.1.3 Risks and Benefits	260
15.1.4 Preprocedure Assessment.	261
15.1.5 Procedure Technique	261
15.1.6 Postembolisation Care	263
15.2 Meningioma.	264
15.2.1 Epidemiology	264
15.2.2 Pathology	264
15.2.3 Histological Grading	264
15.2.4 Clinical Presentation.	264
15.2.5 Indications for Endovascular Treatment.	264
15.2.6 Aims of Treatment	265
15.2.7 Risks and Benefits of Treatment.	265
15.2.8 Preprocedure Assessment.	265
15.2.9 Embolisation Technique	266
15.3 Juvenile Angiofibroma (JAF).	267
15.3.1 Demography, Epidemiology and Aetiology.	267
15.3.2 Pathology	268
15.3.3 Clinical Presentation.	268
15.3.4 Indications for Endovascular Treatment.	268
15.3.5 Aims of Embolisation.	268
15.3.6 Preprocedure Assessment.	268
15.3.7 Embolisation Technique	269

15.4	Paragangliomas	270
15.4.1	Demography, Epidemiology and Aetiology	271
15.4.2	Pathology	271
15.4.3	Natural History	271
15.4.4	Clinical Presentation	271
15.4.5	Indications for Endovascular Treatment	272
15.4.6	Aims of Embolisation	272
15.4.7	Risks and Benefits of Treatment	272
15.4.8	Preprocedure Assessment	272
15.4.9	Embolisation Technique	273
15.4.10	Follow-up	274
15.5	Other Cranial Tumours	274
	References	275
16	Embolisation for Epistaxis	277
	Preamble	277
16.1	Epistaxis	277
16.1.1	Anterior Epistaxis	278
16.1.2	Posterior Epistaxis	278
16.2	Causes of Epistaxis	278
16.2.1	Vascular Anatomy	279
16.2.2	Indications for Embolisation	279
16.2.3	Pretreatment Assessment	281
16.3	Endovascular Technique	281
16.3.1	Preliminary Angiography	281
16.3.2	IMA Embolisation	282
16.3.3	Embolisation in Additional Pedicles	282
16.3.4	Following Embolisation	282
16.4	Alternative Embolisation Techniques	282
16.5	Complications of Embolisation	283
16.6	Outcomes	283
16.6.1	Comparisons of Outcomes After Endovascular Treatment (Embolisation) or Surgical Treatment (Ligation)	283
