1	Introduction	1
2	Theoretical Background of Mathematical Statements and Proof	7
2.1	Mathematical Statements	8
2.2	Generality in Mathematics	10
2.3	What is Proof?	11
2.3.1	Brief Historical Background	12
2.3.2	Different Views and Usages of the Term <i>Proof</i>	13
2.3.3	Characteristics and Acceptance Criteria for Proof	17
2.4	Reasoning, Argumentation, and Proving in Mathematics	
	Education	20
2.4.1	Definition of and Relation between Reasoning, Argumentation, and Proving	21
2.4.2	Types of Arguments	24
3	State of Research	29
3.1	Understanding Generality and the Role of (Counter-) Examples	30
3.2	Activities Related to Proof	35
3.2.1	Comprehension of Statements	39
3.2.2	Estimation of Truth of Statements	41
3.2.3	Proof Evaluation	44
3.2.4	Proof Comprehension	54
3.2.5	Justification	59
3.2.6	Relation Between Activities	67
3.3	Resources	69

4	Derivation of Research Questions	73
5	Methodology	83
5.1	Research Design	83
5.1.1	Justification of the Research Approach	83
5.1.2	Overview of the Research Process	84
5.2	Data Collection	86
5.2.1	Setting	86
5.2.2	Participants	87
5.2.3	Structure of the Experiment	88
5.3	Instruments	90
5.3.1	Selection of Statements and Arguments	90
5.3.2	Conviction of the Truth of Statements	94
5.3.3	Comprehension of Arguments	96
5.3.4	Justification: Students' Proof Schemes	97
5.3.5	Understanding the Generality of Statements	97
5.3.6	Cognitive Reflection Test	99
5.3.7	Demographics	102
5.4	Data Analysis	102
5.4.1	Statistical Analysis	103
5.4.2	Content Analysis	105
5.4.3	Conviction of the Truth of Statements	106
5.4.4	Comprehension of Arguments	109
5.4.5	Justification: Students' Proof Schemes	110
5.4.6	Understanding the Generality of Statements	112
6	Results	115
6.1	Preliminary Analysis	115
6.2	Conviction of the Truth of Statements	119
6.2.1	Estimation of Truth	119
6.2.2	Proof Evaluation Regarding Conviction	123
6.3	Comprehension of Arguments	128
6.4	Justification: Students' Proof Schemes	133
6.5	Understanding the Generality of Statements	136
6.6	Analysis of <i>Missing Values</i>	149
6.7	Summary of Main Results	151
6.7.1	Influence of the Type of Argument	151
6.7.2	Influence of the Type of Statement	152
6.7.3	Students' Understanding of Generality and the Relation to Proof	153

6.7.4	Predictive Power of Control Variables	154
7	Discussion	157
7.1	Interpretation	158
7.1.1	Estimation of Truth and Proof Evaluation Regarding Conviction	158
7.1.2	Comprehension of Arguments	161
7.1.3	Justification: Students' Proof Schemes	164
7.1.4	Understanding the Generality of Statements	165
7.2	Reflections and Limitations	169
7.2.1	The Adapted Framework on Proof-Related Activities ...	169
7.2.2	Overall Research Design	171
7.2.3	Conceptualization and Operationalization	172
7.2.4	Number, Selection, and Order of Statements	174
7.2.5	Open-Ended Questions and Content Analysis	176
7.2.6	Control Variables	177
7.2.7	Sample	178
7.3	Implications for the Learning and Teaching of Proof at the Transition from School to University	179
7.4	Directions for Future Research	180
7.4.1	Further Investigating Students' Understanding of the Generality of Statements	181
7.4.2	Self-Reported Data and Reality	183
7.4.3	Question Order Effects	184
8	Conclusions	185
	References	189
