

Contents

Part I. Avalanches, Debris and Mud Flows

Rapid Granular Avalanches 3

John Mark Nicholas Timm Gray

Gravity-Driven Rapid Shear Flows of Dry Granular Masses in Topographies with Orthogonal and Non-Orthogonal Metrics 43

Shiva P. Pudasaini, Kolumban Hutter, Winfried Eckart

A Lagrangian-Eulerian Finite-Volume Method for Simulating Free Surface Flows of Granular Avalanches 83

Karl Koschdon, Michael Schäfer

Experimental Information on the Dynamics of Dry-Snow Avalanches 109

Dieter Issler

Numerical Simulation of Dry-Snow Avalanche Flow over Natural Terrain 161

Thomas Zwinger, Alfred Klumick, Peter Sampl

Particle Image Velocimetry (PIV) for Granular Avalanches on Inclined Planes 195

Winfried Eckart, John Mark Nicholas Timm Gray, Kolumban Hutter

Existence of Avalanching Flows 219

Reinhard Farwig

Group Theoretic Methods and Similarity Solutions of the Savage–Hutter Equations 251

*Vladimir Chugunov, John Mark Nicholas Timm Gray, Kolumban
Hutter*

Part II. Porous and Granular Materials. Fundamentals and Dynamical Processes

Dynamics of Hypoplastic Materials: Theory and Numerical Implementation 265

Vladimir A. Osinov, Gerd Gudehus

Acoustic Waves in Porous Solid–Fluid Mixtures 285
Krzysztof Wilmański, Bettina Albers

**Dissipation Influence on Cooling of 2-Dimensional
Hard Needle Systems** 315
Agnieszka Chrzanowska, Harald Ehrentraut

**Induced Anisotropy in Rapid Flows
of Nonspherical Granular Materials** 343
Harald Ehrentraut, Agnieszka Chrzanowska

**Part III. Porous and Granular Materials. Subscale- and
Micromechanical Effects.**

Modelling Particle Size Segregation in Granular Mixtures 367
Nina P. Kirchner, Kolumban Hutter

**Gravity-Induced Segregation of Cohesionless Granular
Mixtures** 393
Eliot Fried, Bidhan C. Roy
