Subarachnoid hematomas	46	Cisterns	69
Surgical interventions for pain and emotional disorders	47	Subarachnoid cisterns and their medical significance ..	70
Basic principles of Doppler sonography	49	Subdural hematomas (bleeding into the subdural space)	71
Skull base and brain in children and adults	51	Arachnoid cysts	72
Bones and portals	51	Brain and cranial nerves	72
Inferior orbital fissure	54	Anatomical relationships between cranial nerves and cerebral vessels and their medical significance	73
Infratemporal fossa	55	Nervi olfactorii	76
Pterygoid process and lamina pterygospinosa	55	Nervus opticus	79
Fissura sphenomaxillaris	57	N. oculomotorius	79
Pterygopalatine fossa: walls and portals	57	N. trochlearis	82
Fissura petrotympanica	58	N. trigeminus	84
Pars tympanica	58	N. abducens	85
Processus styloideus and processus mastoideus	58	Nervus facialis (N. intermediofacialis)	87
Mandibular fossa, articular tubercle, and articular eminence	58	N. intermedius	87
Foramen stylomastoideum	59	N. vestibulocochlearis	89
Processus mastoideus	59	N. glossopharyngeus	90
Inferior cranial base: portals for nerves and vessels	60	N. vagus	90
Eustachian tube	60	N. accessorius	91
Carotid canal	60	N. hypoglossus	92
Foramen jugulare	61	Diagnostic techniques (Computer tomography, NMR etc.) and approaches	93
Fossula petrosa and canaliculus tympanicus	61	Clinical anatomy of approaches	94
Apertura externa canaliculi cochleae	61	Bifrontal and frontolateral approach	94
Canaliculus mastoideus	62	Osteology	95
Hypoglossal canal	62	Levels of various sections	96
Foramen lacerum	62	Diploic veins	97
Upper wall of the nasal cavity and its channels	62	Postnatal growth	98
Channels in the upper wall of the pharyngeal cavity	62	Paranasal sinuses	99
Canalis vomerobasilaris	62	Dura mater	99
Canalis palatovaginalis	63	Olfactory fossa	99
Canalis vomerovaginalis	63	Arachnoidea	100
Canalis craniopharyngeus medialis	63	Parts of the brain, veins, and arteries along the access route	103
Canalis craniopharyngeus lateralis	63	Brain	103
Dura mater	63	Veins	105
Meningeal arteries	64	Arteries	105
Frontal branch of the middle meningeal artery and its accompanying veins: structure within the skull	64	Rr. centrales, Aa. centrales anteromediales, Aa. thalamostriatae anteromediales	109
Epidural aneurysms (aneurysms of the dura mater)	65	Rr. diencephalici inferiores anteriores	109
Epidural hematomas and intracranial pressure	67	A. communicans anterior	110
Epidural hematomas	67	Frontolateral access to the regio hypophysealis and aneurysms in the anterior region of the circulus arteriosus	110
Epidural hematomas and motor activity of the pupils and eyes	67	Compressions of the optic pathway	111
Epidural hematomas and contralateral paresis or paralysis	67	Middle cranial fossa	113
Arachnoid membrane and cerebrospinal fluid	67	Deepest floor region	113
Arachnoid membrane	67	Temporal fossa	113
CSF spaces	67	Thickest and thinnest floor zones of the middle cranial fossa	113
Vascularized dural granulations in the subdural space	69	Basal portals	114
		Foramen lacerum	116
		Foramen petrosphenoidum anomalum	117
		Pars petrosa ossis temporalis: rare variations	117
		Modelling of the floor	117

Pterional approach	118	Arteries	179
Soft tissue cover	119	Internal carotid artery, petrosal portion	179
Rami temporales of the facial nerve	123	Internal carotid artery in the cavernous sinus	181
Temporal region, superficial vessels	124	Capsular arteries	182
Auriculotemporal nerve	126	Persistent trigeminal artery	182
Temporal muscle	126	Hypophysis	183
Temporal fossa	128	Lateral wall of the cavernous sinus	
Pterional region of the skull	128	and nerves "in" the cavernous sinus	186
Nerves	129	Ophthalmic nerve	188
Skull	129	Maxillary nerve	189
Veins in the middle cranial fossa	131	Mandibular nerve	189
Distance to the anterior petroclinoid fold and veins ...	137	Trochlear nerve	189
Basal vein (vein of Rosenthal)	137	Oculomotor nerve	190
Arteries in the vallecular cistern and the lateral		Ganglia of the cavernous sinus	191
Cerebral cistern (Sylvian fissure)	139	Inferior sphenopetrosal ligament	191
Middle cerebral artery: furcations and		Cavernous sinus, blood spaces	
internal cerebral branches	139	and connective tissue	191
Central branches	141	Triangle of the cavernous sinus – anatomy	192
Anterior cerebral artery and anterior communicating		Abducens nerve	195
artery, approaches from laterally	142	Some syndromes	196
Posterior cerebral artery, anterior choroidal artery		Superior orbital fissure syndrome	196
and posterior communicating artery	143	Raeder's syndrome	197
Pterional approach and bifurcation of the basilar		Cavernous sinus syndrome –	
artery	146	anterior, middle, posterior	197
		Orbital apex syndrome	198
		Gradenigo's syndrome	198
Subtemporal approach in general	147		
Soft tissue cover	147	Special subtemporal approaches	198
Basal part of temporal lobe, sequence of gyri		Subtemporal-transtemporal approach to the internal	
in the temporal approach	154	acoustic meatus and to the cerebellopontine angle ...	198
Arteries	154	Subtemporal-transtentorial approach	
Posterior communicating artery, course	156	to the cerebellopontine angle	201
Point of origin and course of the twigs	156	Apex partis petrosae, removal	202
Posterior communicating artery, nomenclature		Aneurysms of the posterior cerebral artery and	
of the twigs	157	saphenous vein bypass grafts, subtemporal approach .	203
We found	157		
Posterior communicating artery and anterior		Transsphenoidal approach	
choroidal artery, importance for aneurysms	163	to the hypophysis, clinical anatomy	203
Basilar artery: bifurcation area	164	Pharyngeal hypophysis and cysts of the roof	
Interpeduncular fossa	165	of the pharynx	206
Arteries entering the posterior perforated substance .	165		
Nomenclature of the arteries entering		Supra- and infratentorial approaches	206
the interpeduncular fossa	166	Skull	206
A. laminae tecti and ramus chorioideus posterior		Dura mater	207
medialis	167	Cerebral veins and supra- and infratentorial	
Interpeduncular fossa and bifurcation of the basilar		approach to the cisterna venae magnae	
artery, access	169	(Galen)	209
Hypophyseal region	172	Bridging veins	210
Anatomy of the sella	172	Bridging veins over the superolateral aspect	
Osteology	172	of the brain	212
Clinoid processes	174	Venae centrales superficiales mediales	212
Variation of the sella turcica	174	Venae parietales superficiales mediales	213
Caroticoclinoid foramina	174	Venae occipitales superficiales superiores mediales ..	214
Sellar spine	174	Venae dorsales corporis callosi	
Anterior surface of the petrous bone	174	and venae occipitales internae	214
		Venae hemispherii inferiores	215
Cavernous sinus	177	Bridging veins at the falx cerebri	217
Cavernous sinus, definition	177	Bridging veins at the surface	
Petroclinoid folds, angles	177	of the cerebellar tentorium and tentorial sinuses	217
Diaphragmatic foramen, diameter	178	Paracavernous sinuses	222
Hypophyseal cistern	178	Inferior anastomotic vein (Labbé)	224

Supratentorial approach, adjacent parts of the brain	224	Some details concerning the medullae oblongata and spinalis	283
Arteries encountered in the supratentorial approach ..	225	Medullae oblongata and spinalis	283
Infratentorial approach	227	Dorsal and ventral roots of C1	283
Supra-infratentorial veins	234	Anastomoses	284
Incisura tentorii and mesencephalon	235	Ganglia	284
Parts of the mesencephalon	236	Penetration of dura by C1	284
Pedunculus cerebri	236	Dorsal root of C2	285
Some syndromes resulting from lesions of the tentorial notch and adjacent brain structures	236	Accessory nerve	285
Benedikt's syndrome	236	Ventral roots	286
Weber's syndrome	237	Hypoglossal nerve	287
Parinaud's syndrome	238	Tracts of the spinal cord	288
Retrosigmoidal approach: anatomy	239	Pyramidal decussation	288
Cerebellopontine angle (CPA)	247	Bones and articulations	290
Petroclival region and approaches	247	Atlas	292
Brain parts and nerves	252	Axis	293
Transtentorial approach accompanied by supra- and infratemporal approaches to the basilar artery	253	Anterior surface of the axis	294
Transpetrosal approach	253	Transverse ligament of the atlas	295
Transsphenoidal approach	253	Alar ligaments	296
Transoral, transnasal approach to the clivus	254	Anterior and posterior longitudinal ligaments	297
Arteries	254	Variations	298
Basilar artery, branches	255	Third condyle	298
Basilar artery, branches and aneurysms	256	Odontoid bones	298
Pontine rami	256	Assimilation of the atlas	298
A. cerebelli inferior anterior (AICA)	257	Paracondylar process – pneumatic process – paramastoid process	298
Posterior inferior cerebellar artery arising from the basilar artery	257	Basilar impression	298
Superior cerebellar artery	257	Infracranial spaces, muscles, vessels and nerves	300
Basilar artery, terminal branching	258	Fascia of the pharynx	300
Jugular foramen	259	Temporal fascia	301
Bony structures	259	Lateral pterygoid fascia	302
Shape	259	Pterygospinoe ligament (interpterygoid fascia)	303
Dura mater	260	Temperobuccinator band	303
Cranial nerves IX–XI and jugular foramen	261	Stylopharyngeal fascia	303
Arteries	261	Sphenopharyngeal (salpingopharyngeal, sphenopterygopharyngeal) fascia	304
Sinuses and nerves	263	Lamina profunda fasciae cervicalis	304
Dural portals for cranial nerves IX–XI	265	Pharyngeal fascia	304
Syndromes resulting from cranial nerve lesions ..	265	Spaces	304
Craniocervical junction and approaches	267	Spatium masticatorium	304
Soft tissues	269	Salpingopharyngeal space	305
Pars atlantica of the vertebral artery	272	Vagina carotica	305
Pars atlantica, lateral approach	273	Spatium parapharyngeum	305
Dorsal suboccipital approach	274	Prevertebral lamina and sympathetic trunk	305
Posterolateral approach	276	Infratemporal fossa: masticatory space, vessels, and nerves	306
Transoral-transnasal approach to the clivus and the upper cervical spine and its environment	277	Arteria maxillaris, origin	306
Primitive arteries of the region	278	Maxillary artery	306
A. intersegmentalis proatlantica with bilateral absence of the vertebral artery	279	Nerves in the masticatory space	307
Vertebrobasilar insufficiency	281	Parapharyngeal space: nerves	307
		Glossopharyngeal nerve	307
		Vagus nerve	309
		Accessory nerve	310
		Hypoglossal nerve	311
