

# Contents

Preface .....	7
---------------	---

## Digitization

*Gabriele Graube*

The nature of digitalisation and challenges for education systems and technology education

Digitalisation in the mirror of industrial revolutions .....	11
--	----

## Methodology and Design Technology

*Stefan Fletcher*

3D printing in design engineering education

Action model for the integration of 3D printing in design engineering lesson ..	31
---	----

*Phoebe Perlwitz & Jennifer Stemmann*

Serious games in technical education

A review .....	49
----------------	----

## Gender

*Veronika Becker, Gabriele Graube & Ingelore Mammes*

On the connection between socialisation, stereotypes and gender

Are career and study paths part of technical education?! .....	73
--	----

## Diversity

*Hao He, Johannes Strobel & Alexander F. Koch*

“Troublemakers”

An exploratory study on teachers’ perception in

relation to STEM .....	95
------------------------	----

## Language

*Julia Pötzl, Verena Rasp & Alfred Riedl*

Learning opportunities to promote language skills for industrial-technical occupations

Challenges in dual vocational education and training in Germany .....	119
---	-----

## Curriculum Development

*Ibrahim Delen, Kadir Demir, Dury Bayram,*

*Elise Quant & Ruurd Taconis*

Using technology to support design-based pedagogy in teacher education

A systematic review and cases from two different countries .....	135
--	-----

<i>Esther Booth, Ingelore Mammes &amp; Dieter Münk</i>	
Career choices of women and men in STEM	
Why gendered career choices are still an issue and how to address them . . . . .	169

<i>Martin Lang &amp; Wulf Bödeker</i>	
Education for sustainable development as a guiding principle of modern technology teaching	
Theoretical foundation and subject didactic implications . . . . .	187

<i>Charles Max</i>	
Investigating learning and teaching practices in Elementary Science and Technology education	
An integrated activity-theoretical framework . . . . .	211

## **International Communication in Technology Education – Developments**

<i>Marc J. de Vries</i>	
International communication in technology education – developments . . . . .	243
