1	Introduction	1
2	Problem Formulation	3
2.1	Data Model	3
2.2	Maximum Likelihood Method	5
2.2.1	Stochastic Signal Model	5
2.2.2	Deterministic Signal Model	6
3	EM and SAGE Algorithms	8
3.1	EM Algorithm	9
3.1.1	General Concepts	9
3.1.2	Stochastic Signal Model	11
3.1.3	Deterministic Signal Model	14
3.2	SAGE Algorithm	17
3.2.1	General Concepts	17
3.2.2	Deterministic Signal Model	20
3.3	Rate of Convergence	22
3.4	Comparative Convergence Analysis	24
3.4.1	Derivation of $\mathcal{I}_{EM}$, $\mathcal{I}_{SAGE}$ and $\mathcal{D}$	25
3.4.2	Convergence of EM and SAGE	28
3.4.3	Comparison of the Convergence Rates	29
3.5	Numerical Experiments	32
4	Fast EM and SAGE Algorithms	39
4.1	The Componentwise Rates of Convergence	39
4.2	Adapted Search Space	42
4.3	Numerical Experiments	44
5	Recursive EM and SAGE Algorithms	49
5.1	Stochastic Approximation	50
5.2	Recursive EM Algorithm	52
5.3	Recursive SAGE Algorithm	54
5.4	Asymptotic Properties	57

5.4.1	Convergence	59
5.4.2	Asymptotic Distribution	61
5.5	Application to DOA estimation	64
5.5.1	Stochastic Signal Model	64
5.5.2	Deterministic Signal Model	70
5.6	Numerical Experiments	74
5.6.1	SREM	75
5.6.2	DREM and DRSAGE	76
5.6.3	Comparison of SREM, DREM and DRSAGE	76
6	Experimental Results	83
7	Conclusion	89
A	Asymptotic Properties of Stochastic Approximation	91
A.1	Martingale and Martingale Difference	91
A.2	Ordinary Differential Equation	92
A.3	Convergence with Probability One	93
A.4	Asymptotic Distribution	96
B	Notation	98
	Bibliography	100
