Invited Paper

Data Dependence in Combining Classifiers	1
<i>Mohamed S. Kamel and Nayer M. Wanas</i>	

Boosting

Boosting with Averaged Weight Vectors	15
<i>Nikunj C. Oza</i>	
Error Bounds for Aggressive and Conservative AdaBoost.....	25
<i>Ludmila I. Kuncheva</i>	
An Empirical Comparison of Three Boosting Algorithms on Real Data Sets with Artificial Class Noise	35
<i>Ross A. McDonald, David J. Hand, and Idris A. Eckley</i>	
The Beneficial Effects of Using Multi-net Systems That Focus on Hard Patterns	45
<i>J. Arenas-García, A.R. Figueiras-Vidal, and A.J.C. Sharkey</i>	

Combination Rules

The Behavior Knowledge Space Fusion Method: Analysis of Generalization Error and Strategies for Performance Improvement	55
<i>Šarunas Raudys and Fabio Roli</i>	
Reducing the Overconfidence of Base Classifiers when Combining Their Decisions.....	65
<i>Šarunas Raudys, Ray Somorjai, and Richard Baumgartner</i>	
Linear Combiners for Classifier Fusion: Some Theoretical and Experimental Results	74
<i>Giorgio Fumera and Fabio Roli</i>	
Comparison of Classifier Selection Methods for Improving Committee Performance.....	84
<i>Matti Aksela</i>	
Towards Automated Classifier Combination for Pattern Recognition	94
<i>Alper Baykut and Aytül Erçil</i>	

Multi-class Methods

Serial Multiple Classifier Systems Exploiting a Coarse to Fine Output Coding	106
<i>Josef Kittler, Ali Ahmadyfard, and David Windridge</i>	

Polychotomous Classification with Pairwise Classifiers: A New Voting Principle.....	115
<i>Florin Cutzu</i>	

Multi-category Classification by Soft-Max Combination of Binary Classifiers	125
<i>Kaibo Duan, S. Sathiya Keerthi, Wei Chu, Shirish Krishnaji Shevade, and Aun Neow Poo</i>	

A Sequential Scheduling Approach to Combining Multiple Object Classifiers Using Cross-Entropy	135
<i>Derek Magee</i>	

Binary Classifier Fusion Based on the Basic Decomposition Methods	146
<i>Jaepil Ko and Hyeran Byun</i>	

Fusion Schemes Architectures

Good Error Correcting Output Codes for Adaptive Multiclass Learning ...	156
<i>Elizabeth Tapia, José Carlos González, and Javier García-Villalba</i>	

Finding Natural Clusters Using Multi-clusterer Combiner Based on Shared Nearest Neighbors	166
<i>Hanan Ayad and Mohamed Kamel</i>	

An Ensemble Approach for Data Fusion with Learn++	176
<i>Michael Lewitt and Robi Polikar</i>	

The Practical Performance Characteristics of Tomographically Filtered Multiple Classifier Fusion	186
<i>David Windridge and Josef Kittler</i>	

Accumulated-Recognition-Rate Normalization for Combining Multiple On/Off-Line Japanese Character Classifiers Tested on a Large Database	196
<i>Ondrej Velek, Stefan Jaeger, and Masaki Nakagawa</i>	

Beam Search Extraction and Forgetting Strategies on Shared Ensembles ..	206
<i>V. Estruch, C. Ferri, J. Hernández-Orallo, and M.J. Ramírez-Quintana</i>	

A Markov Chain Approach to Multiple Classifier Fusion	217
<i>S.P. Luttrell</i>	

Neural Network Ensembles

A Study of Ensemble of Hybrid Networks with Strong Regularization	227
<i>Shimon Cohen and Nathan Intrator</i>	
Combining Multiple Modes of Information	
Using Unsupervised Neural Classifiers	236
<i>Khurshid Ahmad, Matthew Casey, Bogdan Vrusias, and Panagiotis Saragiotis</i>	
Neural Net Ensembles for Lithology Recognition	246
<i>R.O.V. Santos, M.M.B.R. Vellasco, F.A.V. Artola, and S.A.B. da Fontoura</i>	
Improving Performance of a Multiple Classifier System	
Using Self-generating Neural Networks	256
<i>Hiroataka Inoue and Hiroyuki Narihisa</i>	

Ensemble Strategies

Negative Correlation Learning and the Ambiguity Family of Ensemble Methods	266
<i>Gavin Brown and Jeremy Wyatt</i>	
Spectral Coefficients and Classifier Correlation	276
<i>Terry Windeatt, R. Ghaderi, and G. Ardeshir</i>	
Ensemble Construction via Designed Output Distortion	286
<i>Stefan W. Christensen</i>	
Simulating Classifier Outputs for Evaluating Parallel Combination Methods	296
<i>H. Zouari, L. Heutte, Y. Lecourtier, and A. Alimi</i>	
A New Ensemble Diversity Measure Applied to Thinning Ensembles	306
<i>Robert E. Banfield, Lawrence O. Hall, Kevin W. Bowyer, and W. Philip Kegelmeyer</i>	
Ensemble Methods for Noise Elimination in Classification Problems	317
<i>Sofie Verbaeten and Anneleen Van Assche</i>	

Applications

New Boosting Algorithms for Classification Problems with Large Number of Classes Applied to a Handwritten Word Recognition Task	326
<i>Simon Günter and Horst Bunke</i>	
Automatic Target Recognition Using Multiple Description Coding Models for Multiple Classifier Systems	336
<i>Widhyakorn Asdornwised and Somchai Jitapunkul</i>	

A Modular Multiple Classifier System for the Detection of Intrusions in Computer Networks.....	346
<i>Giorgio Giacinto, Fabio Roli, and Luca Didaci</i>	
Input Space Transformations for Multi-classifier Systems Based on n-tuple Classifiers with Application to Handwriting Recognition.....	356
<i>K. Sirlantzis, S. Hoque, and M.C. Fairhurst</i>	
Building Classifier Ensembles for Automatic Sports Classification	366
<i>Edward Jaser, Josef Kittler, and William Christmas</i>	
Classification of Aircraft Maneuvers for Fault Detection.....	375
<i>Nikunj C. Oza, Kagan Tumer, Irem Y. Tumer, and Edward M. Huff</i>	
Solving Problems Two at a Time: Classification of Web Pages Using a Generic Pair-Wise Multiple Classifier System.....	385
<i>Hassan Alam, Fuad Rahman, and Yuliya Tarnikova</i>	
Design and Evaluation of an Adaptive Combination Framework for OCR Result Strings	395
<i>Elke Wilczok and Wolfgang Lellmann</i>	
Author Index	405
