Part I. Fuzzy Filters for Noise Reduction

1. Fuzzy Filters for Noise Removal 3
Manuel Guillermo Forero-Vargas and Leonardo Javier Delgado-Rangel

1 Introduction..... 3

2 Fuzzy filters 4

3 Extension to color of gray level fuzzy filters 18

4 Applications..... 18

5 Conclusion 22

References 24

2. Fuzzy Filters for Noise Reduction in Images 25
Hon Keung Kwan

1 Introduction..... 25

2 Definitions of fuzzy filters 28

3 Simulations and results 32

4 Concluding remarks 33

References 40

3. Real-time Image Noise Cancellation Based on Fuzzy Similarity 54
Ivan Kalaykov and Gustav Tolt

1 Introduction..... 54

2 Fuzzy-similarity-based noise cancellation 57

3 Experiments..... 64

4 Hardware implementation of FSB filters 68

5 Conclusions 70

References 71

4. Fuzzy Rule-Based Color Filtering Using Statistical Indices .	72
<i>Spiros Fotopoulos, Antony Fotinos and Socrates Makrogiannis</i>	
1 Introduction	72
2 Principles of the filtering method	74
3 The proposed fuzzy color filters	78
4 Experimental results	92
References	96

Part II. Fuzzy Filters for Edge Detection and Segmentation

5. Fuzzy Based Image Segmentation	101
<i>Otman Basir, Hongwei Zhu and Fakhri Kararay</i>	
1 Introduction	101
2 Fuzzy approaches for image segmentation	103
3 A robust fuzzy integral based image segmentation	110
4 Experimental results	120
5 Conclusions	123
References	125
6. Fuzzy Thresholding and Histogram Analysis	129
<i>Manuel Guillermo Forero-Vargas</i>	
1 Introduction	129
2 Membership function	130
3 Degree of fuzziness	133
4 Unified formulation	136
5 Threshold determination	140
6 Applications	143
7 Multilevel luminance thresholding	147
8 Color processing	148
9 Color application	149
10 Conclusion	150
References	151
7. Color Image Segmentation by Analysis of 3D Histogram with Fuzzy Morphological Filters	153
<i>Aymeric Gillet, Ludovic Macaire, Claudine Botte-Lecocq and Jack-Gerard Postaire</i>	
1 Introduction	153
2 Fuzzy subset extracted from the 3D color histogram	156
3 Mode detection by fuzzy morphological filters	158
4 Experimental results	168
5 Conclusion	174
References	176

8. Fast and Robust Fuzzy Edge Detection	178
<i>Hamid R. Tizhoosh</i>	
1 Introduction	178
2 Existing fuzzy edge detectors	179
3 Images as fuzzy sets	180
4 Heuristic membership functions	181
5 From membership functions to rules	182
6 Fuzzy complement-cased edge detection	183
7 Robust estimation of degree of edginess	188
8 Conclusions	192
References	193
9. Fuzzy Data Fusion for Multiple Cue Image and Video Segmentation	195
<i>Spyros Ioannou, Yannis Avrithis, Giorgos Stamou and Stefanos Kollias</i>	
1 Introduction	195
2 The proposed system architecture	198
3 Fuzzy segmentation fusion	201
4 Simulation results	205
5 Conclusions	208
References	210

Part III. Fuzzy Filters for Image Enhancement

10. Fuzzy Image Enhancement in the Framework of Logarithmic Models	219
<i>Vasile Pătraşcu, Vasile Buzuloiu and Constantin Vertan</i>	
1 Introduction	219
2 The fundamentals of the logarithmic model	220
3 Image fuzzification	224
4 Gray level image enhancement by affine transforms	228
5 Color image enhancement by affine transforms	231
6 Conclusions	235
References	236
11. Observer-Dependent Image Enhancement	238
<i>Hamid R. Tizhoosh</i>	
1 Introduction	238
2 Communication model of image understanding	241
3 Necessary requirements	242
4 Structure of an observer-dependent system	244
5 Experimental verification of system performance	255
6 Possibilities for performance increase	268
References	268

Part IV. Specific Applications of Fuzzy Filters

12. Fuzzy Techniques in Digital Image Processing and Shape Analysis	273
<i>Vassilios Chatzis and Ioannis Pitas</i>	
1 Fuzzy estimators and fuzzy filters	273
2 Fuzzy cell Hough transform	283
3 Generalized fuzzy mathematical morphology	292
4 Conclusions	301
References	303
13. Adaptive Fuzzy Filters and Their Application to Online Maneuvering Target Tracking	306
<i>Mohammad B. Menhaj</i>	
1 Introduction	306
2 Preliminaries	307
3 Kalman-Based filter designs	311
4 The adaptive fuzzy filters	312
5 Conclusion	332
References	333
14. Lossy Image Compression and Reconstruction Based on Fuzzy Relational Equation	339
<i>Hajime Nobuhara, Yasufumi Takama, Witold Pedrycz, Kaoru Hirota</i>	
1 Introduction	339
2 Image compression method based on fuzzy relational equation (ICF)	340
3 Fast image reconstruction method of ICF	345
4 Improvement of quality of reconstructed image	346
5 Additional features of ICF	350
6 Conclusions	352
References	353
15. Avoidance of Highlights through ILFOs in Automated Visual Inspection	356
<i>Aureli Soria-Frisch</i>	
1 Introduction	356
2 Intelligent localized fusion operators (ILFOs)	357
3 Automated determination of fuzzy measures in ILFOs	361
4 Highlights filtering through ILFOs	362
5 Automated visual inspection: application report	365
6 Conclusions	369
References	371
Appendix Color Images	372
Index	384
