

Table of Contents

Preface	v
---------------	---

Lectures given during the Symposium	ix
---	----

Meinolf Geck

Modular Harish-Chandra series, Hecke algebras and (generalized) q -Schur algebras	1
--	---

Jonathan Brundan and Alexander S. Kleshchev

Tensor products and restrictions in type A	67
--	----

Raphaël Rouquier

Block theory via stable and Rickard equivalences	101
--	-----

Robert Boltje

Alperin's weight conjecture in terms of linear source modules and trivial source modules	147
---	-----

Marc Cabanes and Jeremy Rickard

Alvis–Curtis duality as an equivalence of derived categories	157
--	-----

Stephen R. Doty and Daniel K. Nakano

Relating the cohomology of general linear groups and symmetric groups	175
---	-----

Jie Du

Generalized q -Schur algebras and the ways to approach them	189
---	-----

Meinolf Geck and Raphaël Rouquier

Filtrations on projective modules for Iwahori–Hecke algebras	211
--	-----

Corneliu Hoffman

Projective representations for some exceptional finite groups of Lie type 223

Nicholas J. Kuhn

Splitting fields and twisted group rings for the finite general linear groups 231

Kay Maagard and Pham Huu Tiep

Irreducible tensor products of representations of finite
quasi-simple groups of Lie type239
